

Electrode Humidifier

Improve comfort and save energy with

THE ELECTRODE HUMIDIFIER

Balanced Humidity Control

Air that is too dry soaks up moisture from everything it touches in your home — your woodwork, wood floors and furnishings — not to mention giving you dry skin, chapped lips, and a jolt of static electricity. And air with too much moisture can cause condensation and frost on windows, which can damage your window frames.

The Honeywell Electrode Humidifier takes those worries away through humidity levels that are just right. You'll enjoy healthier conditions, improved comfort and protected furnishings.

Simple Care

Maintenance is easy thanks to the disposable canister. A light on the unit indicates when to call your contractor for quick canister replacement.

Set It And Forget It

The Electrode Humidifier comes with a HumidiPRO™ digital humidity control and also works seamlessly with Honeywell VisionPRO® 8000, Prestige® IAQ and Lyric™ thermostats. Your contractor can help you choose which is best for your needs. Each will make automatic adjustments to maintain the humidity level most comfortable for you — 35 to 55 percent relative humidity is considered the optimal range.*

*ASHRAE Standard

Out Of Sight, Out Of Mind

The Honeywell Electrode Humidifier is installed into your home's central heating and cooling system to deliver whole-home humidification. Unlike portable units, it's quiet. Plus, there are no clunky tanks to fill because it automatically fills itself.

Reduce your heating bills — because humidified air feels warmer, you'll be able to cut costs by turning your thermostat down.

On days when you feel a little dry, the Humidity Boost on the HumidiPRO controller can increase relative humidity at the touch of a button.

The HumidiPRO controller automatically protects against window condensation and frost.

Auto-adaptive technology in the Electrode Humidifier adapts to changing water conditions.

Quiet operation means you wouldn't know it's working if you weren't so comfortable.

The Honeywell Electrode Humidifier Is A Smart Choice

Proper humidity levels make a huge difference for comfort and savings.

Choose the Honeywell Electrode Humidifier if anyone in your home has experienced:

- Dry skin
- Dry or scratchy throat
- Chapped lips
- Unpleasant shocks from carpet or electronics
- Static cling

Or if your home has:

- Hardwood flooring
- Wood furnishings
- Paintings or artwork
- Musical instruments
- Uncomfortable temperatures in winter
- High utility bills
