EXHAUST WALL VENT

2023 NEW PRODUCT

SWC PRODUCT LINE

New for 2023 is our new SWC (Side Wall Cap) product for exhaust applications. The single flap wall vent serves as a path for exhaust air to exit the home with maximum airflow.

MODERN DESIGN

Introducing for 2023 is our single flap wall vent, designed to allow for maximum airflow and is aesthetically appealing. Made from a polymer resin with a UV additive offers protection from the sun.

INSTALLATION EASE

Installing the SWC series is easy with all four mounting locations being accessible. The frame of the wall vent allows for easy caulking to prevent leaks.

MULTI- USE

The SWC series of single flap wall vent allows for you to use for clothes dryer and bath fan exhaust applications. This vent is offered with and without tail pipe for replacement or new installations.

EXHAUST AIRFLOW

Today's clothes dryers and bath fans have more powerful fans to exhaust air to the outside. The single flap wall vent is the least restrictive vent to get this done.
