## Circuit Breakers

Select from over 40 different variations of circuit breakers — AFCI, GFCI, AFCI/GFCI, GFPE and Standard — with various amp ratings in one or two pole options. This extensive collection gives you the flexibility to populate The Leviton Load Center with advanced circuit breaker protection to help ensure a safer living environment.

### Features and Benefits

- All plug-on design — no wiring to the circuit breaker\*
- Connects to your home's Wi-Fi network
- At final installation, simply plug-on the circuit breaker
- Leviton GFCI, AFCI and Dual Function circuit breakers feature reset lockout and will not reset if Ground or Arc Fault protection is compromised
- Leviton circuit breakers always meet the most stringent UL requirements
- Rocker-style switches require less activation force
- Color indicators in the handles designate operational status at-a-glance
- Intuitive LEDs communicate trip condition and type of fault (AF/GF)
- Line-side wiring ensures LEDs remain illuminated even when in tripped state
- White circuit breakers are clean and sleek

\*For applications up to 60A when using copper wire; or 50A when using aluminum wire

## Types of Circuit Breakers

- **Standard** — Provides overcurrent and AFCI, GFCI, or dual-function protection
- **2nd Gen Smart** — Features the same overcurrent and fault protection as our standard circuit breakers with added smart capabilities like turning breakers ON or OFF remotely, a breakdown of consumption per circuit, and customized electrical anomaly notifications all in the My Leviton app\*

\*Requires purchase of LWHEM. My Leviton app available on the App store and Google Play.
