

Lighting Controls Device Cleaning

Wall Switch Cleaning

It will occasionally be necessary to clean Acuity Brands wall switches. The following switches may be wiped down with a soft cloth or paper towel dampened with glass cleaner, vinegar and water, hydrogen peroxide, or a mild abrasive. Spray a limited amount on the cloth or paper towel prior to applying. Sealed wall plates are also available if spray cleaning of wall switch devices is required. See page two to learn more about our sealed wall plates.

NOTE: Do not spray cleaner on the switches directly, and do not wipe the switches down with a towel saturated (drips when wrung out) with cleaner.

Touchscreen Cleaning

The following touchscreens may be cleaned with a soft cloth moistened with rubbing alcohol or isopropyl alcohol.

nLight
nPOD GFX
FRESCO
FCS Touchscreen

The following touchscreens may be cleaned by:

Gently use a soft, lint-free cloth slightly moistened with a solution of mild liquid dish soap and warm water or disinfect the device with a soft cloth slightly moistened with 70% isopropyl alcohol. Do not directly spray any liquid or disinfecting solution on the device. Do not clean with any other chemical products.

nTS 7IN

Sealed Wall Plates

The SSW Series of Sealed Wall Plates are designed to protect wall switch devices from liquid by including a clear silicone rubber layer overlayed on the wall switch. If the ability to clean the switches using chemical spray disinfectants is desired, we recommend the use of the sealed screwless wall plate. The sealed screwless wall plate is a cover for the standard wall plate, designed with an IP54 rating. The sealed screwless wall plate covers the wall switch to prevent liquids from entering the wall switch while maintaining a tactile button feel. It is the ideal solution to help protect a wall switch from fluid entering the device while enabling the use of disinfectants recommended by the EPA for use against SARS-CoV-2, the coronavirus that causes COVID-19, which often require spraying or saturating the surface.

Features:

- IP54 Rating
- Compatible with SensorSwitch and nLight wall switches
- Available in three popular color finishes
- Must be ordered separately

Acuity Brands is committed to working with our customers to provide guidance on the most optimal way to interact with our lighting control solutions while maintaining a clean environment. Should you have any additional questions on the care and maintenance of our solutions, please contact us at 1-800-535-2465.

Note: The cleaning methods outlined in this document only apply to Acuity Brands® devices.
