Max2000® & AV's™

Max2000® Aviation Snips

Nothing outcuts, outmaneuvers or outlasts MAX!

Easy-to-Spot, color coded thermoplastic grips permanently fitted over full length steel handle shafts offer strength, comfort and sure handling.

Ambidextrous, one-hand operation latch is accessible from top or side.

Permanent riveted handles will not loosen and latch will not hang up.

Handle to Head Linkage produces powerful compound leverage.

Extra-long-life compression spring.

Narrower Grip Opening accommodates large or small hands without sacrificing cutting length.

Hardened steel blades and generous cutting lengths are unchanged.

Offset models feature: Hardened alloy steel and a forged steel lower jaw produce a strong, sharply defined cutting edge.

The Max2000 Double Cut Snip

employs a best of all worlds close tolerance design for consistent performance. A curved cutting edge on the center jaw reduces cutting force required and large relief grinds on all jaws minimize drag. The double cut blades feed smoothly, cut cleanly without surface distortion, and easily navigate metal seams encountered in round metal duct and stove pipe. A self-starting point on center jaw makes short work of blind cuts.

M2004

New!

Max2000 Left, Right, and Combination Aviation Snips feature alloy steel blades with serrated lower jaws for solid gripping power in sheet metals, vinyl plastics, layered metals and seams (including "S" cleats).

M2001

M2002

M2003

The Max2000 Bulldog Snip features shorter blades with a serrated lower jaw for controlled notching and trimming out to the blade tip in layered sheet metals and metal seams.

M2005

Versatile Max2000 Offset Right and Left Aviation Snips feature a serrated upper jaw of hardened alloy steel and a forged steel lower jaw to produce a strong, sharply defined cutting edge for superior offset maneuverability & cutting performance.
