

# SERVICE TOOLS

MalcoEdge™ service tools are designed to support critical HVACR tasks that demand accuracy, control, and reliability in the field. Built for diagnostics, installation, and system service, these tools help technicians perform precise adjustments and service operations with confidence.

## SMG

### SOLENOID SERVICE MAGNET

The Solenoid Service Magnet is a must-have tool for working with solenoid valves in air conditioning and refrigeration systems. This compact, durable magnet allows you to manually open or hold open solenoid valves without system power, enabling fast diagnostics, refrigerant recovery, or system flushing.

- Hands Free Operation
- No Power Needed
- Compact Design
- Strong Magnet

## DTW

### DIGITAL TORQUE WRENCH

The MalcoEdge™ DTW Digital Torque Wrench delivers precise torque control with an adjustable head, a wide 3–62 ft-lb range, and ±2% accuracy for critical HVAC-R applications.
