

# TUBE BENDERS

The MalcoEdge™ line of tube benders delivers clean, kink-free bends across single-size manual tools, mechanical multi-size kits, and hydraulic-powered solutions—giving HVACR pros the right tool for every job.

## TUBE BENDER HARD CASE KITS

### TBMS

#### MANUAL RATCHETING TUBE BENDER MULTI-SIZE KIT

The all-in-one solution for tube bending. Multi-size manual bending kit for clean, consistent bends in tight spaces

- Multi-Size Bending Kit creating 90° Bends
- 90° Indicator Feature – Lets you know when the tube has accurately reached a perfect 90°
- Smooth Operation Prevents Kinks & Flattening
- Compact & Field-Ready
- Sizes in kit: 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 7/8"
- Intended for use with soft drawn copper only

### HYB

#### HYDRAULIC TUBE BENDER MULTI-SIZE KIT

Hydraulic kits deliver added power and reduced effort for larger tubing and repeat jobs.

- Hydraulic power makes delivering precision results easy regardless of tubing size from 1/4" to 7/8"
- Produces more consistent bends
- Requires less physical effort
- Better for repetitive or heavy-duty jobs
- Sizes in kit: 1/4", 5/16", 3/8", 1/2", 5/8", 3/4", 7/8"
- Intended for use with soft drawn copper only

## TBK4

### 4-TUBE BENDER KIT

The 4-Tube Bender Kit is designed to prevent kinks, flattening, or crushing of copper tubing. This color-coded set supports sizes from 1/4" to 5/8". Each support facilitates smooth, damage-free bends, ensuring reliable system performance and preventing flow restrictions.

- Crush-Free Bending
- Reusable
- Clean line set bends

#### Color-Coded Tube Benders:

			
Red 1/4" (6.35mm)	Green 3/8" (9.52mm)	Yellow 1/2" (12.7mm)	Blue 5/8" (15.87mm)

## MANUAL BENDER MODEL OPTIONS

Our single-size manual tube benders are your fastest solution available when speed is the top concern. The go-to tool when strength constraints aren't a concern, they are your fastest, most efficient tool in hand. Its lightweight, grab-and-go design makes it perfect for service calls, and repeat work where setup time matters.

- Clean, Consistent Bends
- Fast Mechanical Bending
- Kink-Free Performance
- Lightweight Design
- Intended for Use With Soft Drawn Copper Only
- 180 Degree Bend Capability
