- For charging all Li-Ion and LiHD slide-on battery packs (12 V - 36 V) with adapted battery pack charging current
- Patented "AIR COOLED" charging technology: battery pack cooling during charging for significantly reduced charging times
- Very low stand-by input power
- Processor-controlled charging management for gentle charging and maximum number of charging cycles
- One charger for everything: To charge all battery packs of the CAS brands: [www.cordless-alliance-system.com](http://www.cordless-alliance-system.com)
- "AIR COOLED" function: the patented principle is based on air-cooling the battery pack during the charging process. The battery packs are gently cooled down to the required charging temperature, and then during the charging process are constantly maintained at optimum temperature. With this principle, a higher tool life of the battery packs and up to 30% shorter total charging time can be achieved.
