OF ALL
CONSTRUCTION
FATALITIES

IN 2020
THERE WERE

5,160

NONFATAL
HEAD INJURIES

RESULTING IN MISSED DAYS OF WORK
IN THE CONSTRUCTION INDUSTRY

Injuries from slips, trips & falls are some of the most common on the jobsite. They are the leading cause of fatalities in the construction industry, accounting for just over one third of all fatalities. In 2021, there were 370 fatalities in the construction industry from slips, trips and falls. These injuries as well as many struck by incidents cause oblique impacts, a combination of both linear and rotational forces. Oblique impact forces can be passed to the brain causing traumatic brain injuries or TBIs. The construction industry has the greatest number of both fatal and nonfatal traumatic brain injuries. As jobsites continue to be dynamic environments, the risk in TBIs continues to be prevalent in this industry.

**SLIPS, TRIPS & FALLS LEAD
TO OBLIQUE IMPACT FORCE WHICH
RESULT IN TBIS**

ADVANCED SLIP, TRIP & FALL PROTECTION

BOLT™ SAFETY HELMET w/ IMPACT ARMOR™ LINER

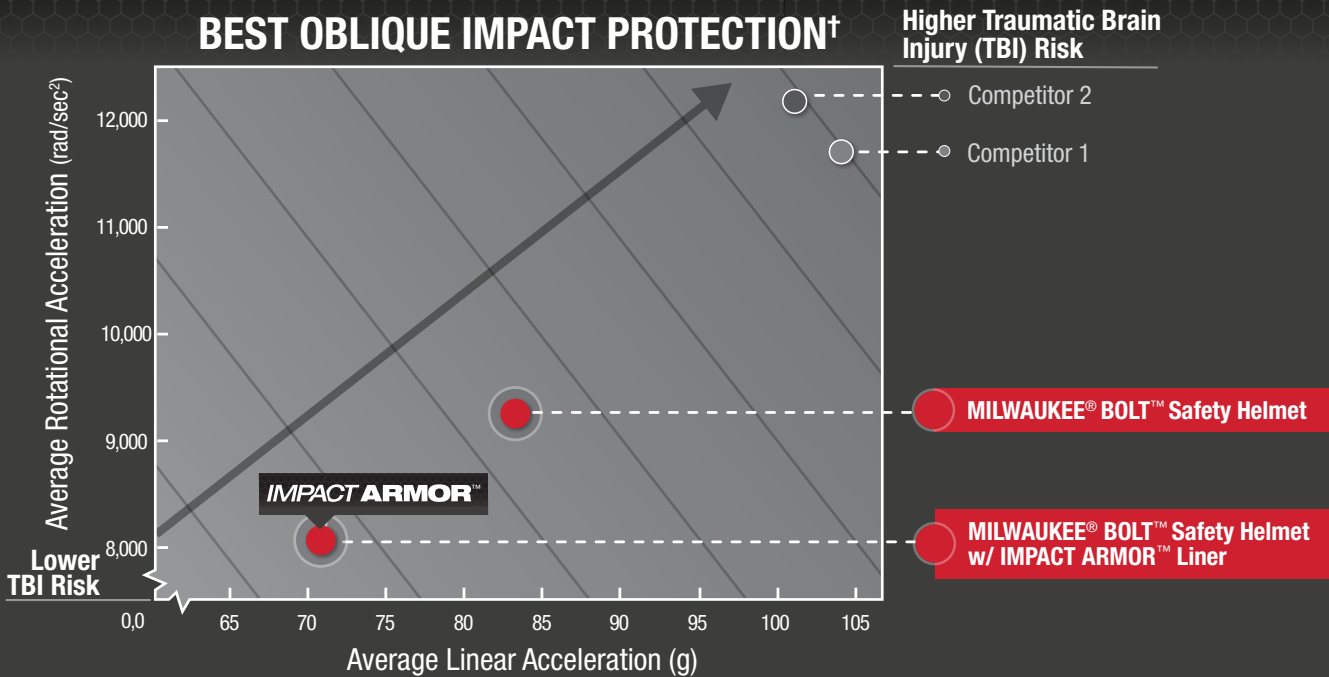

IMPACT ARMOR™

LINER DELIVERS THE BEST OBLIQUE IMPACT PROTECTION†

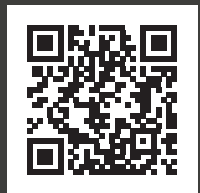

Utilizing RHEON™ technology

BEST OBLIQUE IMPACT PROTECTION†

† Based on impacts at a 45° angle at a speed of 6.5 m/s averaged across 16 testing locations around the full helmet circumference.
