

2020 INDOOR AIR QUALITY

ne.carrierenterprise.com

draft template - 44139

Print Date: 11/4/2020

We offer a full range of products to solve any IAQ issue.

Make the Invisible Visible Common Indoor Air Issues

Issue/Source	Symptom	Solution
Particle Allergens Pets, secondhand smoke, dust mites, wood smoke	Known to trigger and worsen asthma and allergy symptoms	Air Purifier
Chemical Pollutants Cleaners, paints, adhesives, pesticides, cosmetics and air fresheners	Nausea and headaches. At high levels, can cause eye irritation	Ventilator
Carbon Dioxide Simple breathing. Burning candles, gas, wood and other combustibles	Drowsiness, poor concentration	Ventilator
Relative Humidity Too much or not enough moisture in the air	Moist air - mold and dust mites Dry air - nosebleeds, dry eyes and skin	Dehumidifier, Humidifier
Mold & Bacteria Dampness	Coughing, respiratory issues	UV Lamp

HI-EFFICIENCY AIR CLEANERS

NQ CLARIFIER

Clarifier

Portable – 350 CFM
4 levels of filtration (HEPA) as well as an ultraviolet purification.
Only 28" high. Ideal for residential, light commercial, patient rooms, clinics, and restaurants

Item#	Brand	Description
NQ CLARIFIER	NQ	PORTABLE AIR PURIFIER , HEPA/UVC, 350CFM

NQ400-R-M

NQ400

Wall Mounted – 400 CFM
Mechanical filtration (HEPA) as well as an ultraviolet purification.
Space saving and ideal for dental clinics, exam rooms, restaurants, and gyms.

NQ400-R-M	NQ	WALL HUNG AIR PURIFIER, HEPA/UVC,400 CFM,115V
-----------	----	---

NQ500-R-M

NQ500

Mobile, 500 CFM (Healthcare, Commercial)
2 pre-filters, HEPA filter, ultraviolet purification
Ideal for operating rooms, isolation, and ICUs

NQ500-R-M	NQ	MOBILE AIR PURIFIER, HEPA/UVC, 500 CFM,115V
-----------	----	---

NQ1000-R-M

NQ1000

Mobile, 1000 – 2000 CFM (Healthcare, Commercial)
2 pre-filters, HEPA filter, ultraviolet purification (Six germicidal UV lamps)
Ideal for labs, waiting rooms, gyms, and large common areas

NQ1000-R-M	NQ	MOBILE AIR PURIFIER, HEPA/UVC, 1347 CFM,115V
------------	----	--

NQ CLARIFIER Free-Standing Air Purification System

The NQ Clarifier is the pinnacle of air clarification and portability. As regarded experts, we have been providing Airborne Infection control solutions to thousands of worldwide medical facilities for over 27 years.

The NQ Clarifier purifies air with 2 proven processes:

4 Stages of Mechanical Filtration

1. 10 μm particulate pre-filter
2. Formulated activated carbon filter
3. HEPA filter ASHRAE – H14 (99.99% at 0.3 μm)
4. Carbon impregnated post filter

Ultraviolet Germicidal Irradiation (UVGI)

Single high output UVC bulb providing a total UV dosage of 26,000 $\mu\text{Wsec/cm}^2$ to inactivate micro-organisms

Efficacy

- ✓ Viruses Including Coronavirus (COVID-19)
- ✓ Bacteria
- ✓ Molds/Fungi
- ✓ Allergens

Deployment

- ✓ Mobile, Quickly Deployed
- ✓ Autonomous
- ✓ Low Maintenance
- ✓ Economical
- ✓ No Chemicals/Added Materials

Application

- ✓ Residential
- ✓ Commercial
- ✓ Medical
- ✓ Industrial
- ✓ Military

Clarifier - Portable – UVC Air Purifier 350 CFM
 4 levels of filtration (HEPA) as well as an ultraviolet purification. Residential, light commercial, patient rooms, clinics, restaurants

MEET THE CARRIER OPTICLEAN™ NEGATIVE AIR MACHINE

Right now, the world is more focused than ever on ways to slow and prevent the spread of disease. With more than a century of expertise in indoor environments, Carrier has developed a solution to help do just that.

HOSPITAL ROOM

Carrier OptiClean™ can be used in hospitals to help prevent the spread of COVID-19 by keeping potentially contaminated air within a confined space, cleaning it with HEPA-grade filtration and then ventilating it outside.

CARRIER OPTICLEAN™

DUAL-MODE NEGATIVE AIR MACHINE AND AIR SCRUBBER

FN1AAF006000 – MAXIMUM 600 CFM
FN1AAF015000 – MAXIMUM 1500 CFM

The Carrier OptiClean negative air machine is a portable, maximum 600 CFM or maximum 1500 CFM solution primarily designed to help convert normal hospital rooms into airborne infectious isolation rooms (AIIR). Designed to comply with ASHRAE's Standard 170 for Ventilation of Health Care Facilities, the Carrier OptiClean unit uses a 99.97% efficient filter and a heavy duty, yet quiet, motor to remove filtered contaminated air from the room. The resulting negative air pressure, or "vacuum effect," helps limit the spread of airborne contaminants into surrounding areas. If negative pressure is not required, such as an open-air, temporary hospital, retail space, dental office or residence, the machine can be used as an air scrubber, pulling air in, removing many contaminants, and discharging cleaner air back into the space.

Product Highlights and Specifications

- 99.97% efficient, long-life HEPA filter removes particles as small as 0.3 microns
- Standard MERV 7 or higher pre-filter
- Maximum 600 CFM or maximum 1500 CFM
- Meets or exceeds the ASHRAE Standard 170: Ventilation of Health Care Facilities
- HEPA filter rack and sealing design meet air leakage requirement
- Vertical design for smaller footprint compared to many competitors
- Portable and adaptable to nearly any appropriately-sized location
- Heavy-duty, lockable casters for easy transport
- Three-speed selector switch for various air flow ranges :
 - 200 CFM/400 CFM/600 CFM (006 size)
 - 500 CFM/1,000 CFM/1,500 CFM (015 size)
- Red filter indicator light alerts user when it's time to replace a filter
- Green on/off switch illuminates when the unit is on and operating
- Ten-foot long power cord with strain relief
- Exhaust transition plate to standard 10-inch round (006 size) or 12-inch oval (015 size) duct included (negative air machine application only)
- Galvanized steel, pre-painted cabinet is fully insulated
- 115V
- UL® listed
- Cabinet dimensions:
 - 17-5/8" W x 22-1/16" D x 49-5/8" H (006 size)
 - 21-1/8" W x 22-1/16" D x 53-7/16" H (015 size)
- Operating Weight: 125 lbs (006 size), 150 lbs (015 size)
- One-year limited warranty

Bring Peace of Mind to Your Customers this Fall

IAQ Options That Make a Home Comfortable & Clean

Infinity® Air Purifier

Our Best Defense

Doors and windows invite pollen, friends and family spread bacteria and viruses, fine dust flies off furniture and floors, and don't forget about hair and dander from pets. It's all trapped inside, circulating in the air that you breathe. Because your indoor air is under constant attack, you need an effective defense – the kind you get with the Infinity Air Purifier.

Clearing the Air

Carrier® EZ Flex™ Cabinet and Filter

Today's homes are more energy-efficient than ever – sealed tighter and better insulated to keep heated or cooled air on the inside. The unfortunate side effect is that these same homes also do a better job retaining dust, dirt, pollen and more, trapping them inside to circulate and recirculate throughout your living spaces. These particles settle on furnishings, pollute the indoor air and rob your comfort system of efficiency by restricting airflow and making it work a little harder. The Carrier EZ Flex cabinet and filter can help alleviate those issues, with the MERV 13 model effectively clearing the air of more than 90% of airborne particles as small as 1.0 microns in size.™

Filtration Efficiency for Particle Sizes*	EZ Flex™ Filter and Cabinet	
	MERV 13**	MERV 10**
3.0 - 10.0 microns (E3)	E3 ≥ 90%	E3 ≥ 85%
1.0 - 3.0 microns (E2)	E2 ≥ 90%	50% ≤ E2 < 65%
0.30 - 1.0 microns (E1)	E1 ≤ 75%	N/A
Germicidal Capability	None	
Filter	Replaceable No cleaning required

UV Lights

Germicidal Ultraviolet (UV) Lamps

Your heating and cooling system is the unsung hero of your home, constantly running in the background to keep you cozy and comfortable. As air passes through the cooling coil, mold spores, bacteria and fungi stick to its damp surfaces. Buildup of these contaminants can reduce system performance and lead to the release of harmful mold spores and unpleasant odors into your home.

To help alleviate these issues, the Carrier® germicidal UV lamp is mounted near the cooling coil where fungus and microbes can grow. The intense UV light is designed to kill bacteria and mold growing on and around the indoor coil, enhancing system efficiency and improving the quality of your indoor air.

Fresh Air Ventilation

Fresh air ventilation offers a controlled solution for bringing fresh air into your home. It's efficient because it ventilates without the energy loss you would experience through an open window or screen door. Whole-home ventilation is more important than ever with today's more tightly sealed, energy-efficient homes that tend to trap airborne pollutants to circulate throughout your home.

Humidity Management

Humidifiers

A Carrier® humidifier can “moisturize” dry, heated, winter air, making your home feel more comfortable. That’s important because during the heating season, your home can feel drier than the desert. Properly humidified air can help relieve the discomfort of dry nasal passages, itchy skin and static shocks.

Honeywell

When installed into your home's heating and cooling system, a Honeywell Whole-House Media Air Cleaner traps and filters airborne particles and contaminants passing through the duct system insuring cleaner air is distributed to all rooms in your home. Media Air Cleaners capture up to 96% of airborne particles passing through the HVAC system, and maintain high airflow in your heating and cooling system so that it functions at full efficiency. Get the benefits of a whole-house solution for improving the air in your home with a Honeywell Media Air Cleaner.

Highly Effective –
Deep-pleated media filters have a large surface area to capture more airborne particles. Captures both microscopic particles like dust and smoke in addition to larger contaminants like mold spores and pet dander.

Replace Less Often –
Lasts up to four times longer than a standard one-inch furnace filter. Replace every 6-12 months versus monthly or quarterly changes.

Simple Maintenance –
Simply open the door to replace the filter.

Easy to Upgrade –
Can be easily converted to a higher-performance F300 Electronic Air Cleaner.

Whole-House –
Cleans the air in all rooms throughout your home, using your HVAC system to distribute clean air.

Widely Compatible –
Works with most gas, oil and electric forced air furnaces and air conditioning systems.
