Cover image: Approximately 65,000 ft (20,086 m) of 5/8 in. RAUPEX® O₂ barrier pipe was used in the in-floor radiant and cooling system and the snow and ice melting system at the Sheridan College Davis Campus Skilled Trades Centre in Brampton, Ontario. The facility features a tri-generation system, which simultaneously produces chilled and hot water, along with electricity output, not only for the three-story, 12,077 m² (130,000 ft²) building, but also for the district heating and cooling network serving the Brampton campus.

1. RAUPEX® UV shield pipe

RAUPEX UV shield pipe is manufactured using the REHAU high-pressure peroxide method for crosslinked polyethylene (PEXa). RAUPEX UV shield pipe has a co-extruded PE shield that protects the pipe against ultraviolet light (sunlight) for one year. All RAUPEX UV shield pipe meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3 and is certified to NSF Standards 14/61. RAUPEX UV shield pipe is manufactured in the USA by REHAU in a plant using a quality management system that is certified to ISO 9001. RAUPEX UV shield pipe is for use with the EVERLOC® compression-sleeve system certified to ASTM F877 and the REHAU F1960 cold expansion fitting system certified to ASTM F1960. See REHAU *Technical Bulletin TB261* for other compatible PEX fitting systems.

3/8 in. RAUPEX red UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235331-502+	3/8 in. RAUPEX red UV shield pipe, 500 ft coil (152.4 m)	500 ft	10.5	23.1	18 coils
235331-002+	3/8 in. RAUPEX red UV shield pipe, 1000 ft coil (304.8 m)	1000 ft	21.0	46.2	9 coils

+This item is not stocked. Lead times may vary.

1/2 in. RAUPEX red UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235351-102	1/2 in. RAUPEX red UV shield pipe, 100 ft coil (30.5 m)	100 ft	2.6	5.8	1 coil
235351-302	1/2 in. RAUPEX red UV shield pipe, 300 ft coil (91.4 m)	300 ft	7.8	17.2	1 coil
235351-502	1/2 in. RAUPEX red UV shield pipe, 500 ft coil (152.4 m)	500 ft	13.1	28.9	1 coil
235351-002	1/2 in. RAUPEX red UV shield pipe, 1000 ft coil (304.8 m)	1000 ft	26.3	57.9	1 coil
235351-152	1/2 in. RAUPEX red UV shield pipe, 500 ft (152.4 m)	5 (100 ft) coils/box	13.1	28.9	1 box
235351-352	1/2 in. RAUPEX red UV shield pipe, 1500 ft (457.2 m)	5 (300 ft) coils/box	41.1	90.5	1 box

3/4 in. RAUPEX red UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235371-102	3/4 in. RAUPEX Red UV shield pipe, 100 ft coil (30.5 m)	100 ft	4.9	10.9	1 coil
235371-302	3/4 in. RAUPEX Red UV shield pipe, 300 ft coil (91.4 m)	300 ft	14.7	32.3	1 coil
235371-502	3/4 in. RAUPEX Red UV shield pipe, 500 ft coil (152.4 m)	500 ft	24.6	54.3	1 coil
235371-152	3/4 in. RAUPEX Red UV shield pipe, 500 ft (152.4 m)	5 (100 ft) coils/box	24.6	54.3	1 box
235371-002	3/4 in. RAUPEX Red UV shield pipe, 1000 ft coil (304.8m)	1000 ft	48.9	108.0	1 box

1 in. RAUPEX red UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235381-102	1 in. RAUPEX red UV shield pipe, 100 ft coil (30.5 m)	100 ft	7.9	17.5	1 coil
235381-302	1 in. RAUPEX red UV shield pipe, 300 ft coil (91.4 m)	300 ft	23.8	52.4	1 coil
235381-502	1 in. RAUPEX red UV shield pipe, 500 ft coil (152.4 m)	500 ft	39.7	87.5	1 coil

20 ft straight lengths RAUPEX red UV shield pipe

Article no.	Description	Package quantity bag	Unit weight		Minimum order
			kg	lb	
235351-022	1/2 in. RAUPEX red UV shield pipe, 20 ft (6.1 m)	50 pcs (1000 ft)	0.5	1.2	1 bag
235371-022	3/4 in. RAUPEX red UV shield pipe, 20 ft (6.1 m)	25 pcs (500 ft)	1.0	2.2	1 bag
235381-022	1 in. RAUPEX red UV shield pipe, 20 ft (6.1 m)	25 pcs (500 ft)	1.6	3.5	1 bag

Straight lengths are packaged in a single outer bag.

3/8 in. RAUPEX blue UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235331-501+	3/8 in. RAUPEX blue UV shield pipe, 500 ft coil (152.4 m)	500 ft	10.5	23.1	18 coils
235331-001+	3/8 in. RAUPEX blue UV shield pipe, 1000 ft coil (304.8 m)	1000 ft	21.0	46.2	9 coils

+This item is not stocked. Lead times may vary.

1/2 in. RAUPEX blue UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235351-101	1/2 in. RAUPEX blue UV shield pipe, 100 ft coil (30.5 m)	100 ft	2.6	5.8	1 coil
235351-301	1/2 in. RAUPEX blue UV shield pipe, 300 ft coil (91.4 m)	300 ft	7.8	17.2	1 coil
235351-501	1/2 in. RAUPEX blue UV shield pipe, 500 ft coil (152.4 m)	500 ft	13.1	28.9	1 coil
235351-001	1/2 in. RAUPEX blue UV shield pipe, 1000 ft coil (304.8 m)	1000 ft	26.3	57.9	1 coil
235351-151	1/2 in. RAUPEX blue UV shield pipe, 500 ft (152.4 m)	5 (100 ft) coils/box	13.1	28.9	1 box
235351-351	1/2 in. RAUPEX blue UV shield pipe, 1500 ft (457.2 m)	5 (300 ft) coils/box	41.1	90.5	1 box

3/4 in. RAUPEX blue UV shield pipe

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb

2. EVERLOC+® compression-sleeve fittings

EVERLOC+ compression-sleeve fittings and sleeves are designed specifically for use with REHAU PEXa pipe. Installation is performed with EVERLOC+ compression-sleeve tools. Follow all published REHAU *Technical Guidelines*.

EVERLOC+ polymer fittings are produced from a polyphenylsulfone (PPSU) material. EVERLOC+ LF brass fittings are produced from ECO Brass® (UNS C69300 or CW724R).

EVERLOC+ compression sleeves are produced using a specially formulated PEXa material and are designed specifically for use with EVERLOC+ fittings. All EVERLOC+ fittings and sleeves comply with the lead-free requirements of the *U.S. Safe Drinking Water Act*. Order PEXa compression sleeves separately from fittings.

4. EVERLOC+ compression-sleeve tools

EVERLOC+ power tool standard kit

The EVERLOC+ power tool standard kit is specifically designed for assembling 1/2, 3/4 and 1 in. EVERLOC+ fittings. The tool kit comes complete with the following:

- EVERLOC+ power tool base unit (Article no. 105106-003)
- EVERLOC+ expander adapter QC (Article no. 105167-001)
- EVERLOC+ expander heads QC: 1/2 in. (Article no. 105074-001), 3/4 in. (Article no. 105076-001), 1 in. (Article no. 105077-001)
- EVERLOC+ compression jaws (set): 1/2 in. (Article no. 105084-001), 3/4 in. (Article no. 105088-001), 1 in. (Article no. 105091-001)
- (2) DeWALT® 12V Li-ion batteries (DCB127)
- DeWALT® 12V/20V Li-ion battery charger, 120VAC (DCB107)
- RAUCUTTER (Article no. 137495-001)
- Tool case (Article no. 318135-003)
- Grease (Article no. 224989-001) and cleaning brush (Article no. 224988-001)
- Operating instructions

EVERLOC+ XL power tool standard kit

The EVERLOC+ XL power tool standard kit is specifically designed for assembling 1 1/4, 1 1/2 and 2 in. EVERLOC+ fittings. The tool kit comes complete with the following:

- EVERLOC+ XL power tool base unit (Article no. 105994-002)
- EVERLOC+ XL power tool support handle (Article no. 105995-001)
- EVERLOC+ XL expander adapter QC (Article no. 105744-001)
- EVERLOC+ XL expander heads QC: 1 1/4 in. (Article no. 105078-001), 1 1/2 in. (Article no. 105079-001), 2 in. (Article no. 105080-001)
- EVERLOC+ XL compression jaws (set): 1 1/4 in. (Article no. 105094-001), 1 1/2 in. (Article no. 105096-001), 2 in. (Article no. 105098-001)
- (2) MAKITA® 18V Li-ion batteries (BL1840B)
- MAKITA® 18V Li-ion battery charger, 120VAC (DC18RC)
- Large ratchet cutter (Article no. 131558-001)
- Tool case (Article no. 321251-001)
- Grease (Article no. 224989-001), cleaning brush (Article no. 224988-001) and operating instructions
- Accessory item sold separately:
- EVERLOC+ XL power tool kit trolley (Article no. 324373-001)

418669-001	8 in. straight copper stub, 1/2 in. EVERLOC+	50	153	0.34	1 box

7. F1960 cold expansion fittings

REHAU F1960 cold expansion fittings and rings are for use with REHAU PEXa pipes only. The maximum temperature and pressure ratings of the REHAU F1960 fitting system is in accordance with ASTM F877 and CSA B137.5 for SDR9 PEX, see REHAU pipe product submittals for ratings. Installation is performed with commercially available F1960 cold expansion tools. Follow all published REHAU *Technical Guidelines*. All REHAU F1960 fittings and rings comply with the lead-free (LF) requirements of the U.S. *Safe Drinking Water Act*.

F1960 PEX reinforcing rings

Galvanized support channels

Galvanized support channels are made of carbon roll-formed steel and designed to support RAUPEX pipe in sizes 3/4, 1, 1-1/4, 1-1/2, and 2 in. The support channels are snapped onto the PEXa pipe, adding rigidity and durability to overhead and exposed installations in commercial plumbing and hydronic distribution applications. The channels may be cut to size and are supported using typical clevis hangers.

Article No.	Description	Length		Package quantity	Unit weight		Minimum order
		m	ft		kg	lb

Protection tape

Protective tape for wrapping EVERLOC+ or REHAU F1960 joints that may come into contact with foaming agents and solvents in closed-cell foam insulation kits.

Tape dimensions: 2 in. wide x 100 ft long (50 mm x 30 m)

Article No.	Description	Package quantity	Unit weight		Minimum order
		box	g	lb	
246869-001	Protective tape, red	3 rolls/box	284	.626	box

Rubber tape

Scotch® 2242 linerless, self-bonding, waterproof, Ethylene Propylene Rubber (EPR) tape for wrapping of EVERLOC+ or REHAU F1960 joints prior to burying or concealing when required and for joints that may come into contact with foaming agents and solvents in closed-cell foam insulation kits.

Tape dimensions: 2 in. wide x 15 ft long (50 mm x 4.57 m)

1. RAUPEX® UV shield pipe

RAUPEX UV shield pipe is manufactured using the REHAU high-pressure peroxide method for crosslinked polyethylene (PEXa). RAUPEX UV shield pipe has a co-extruded PE shield that protects the pipe against ultraviolet light (sunlight) for one year. All RAUPEX UV shield pipe meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3 and is certified to NSF Standards 14/61. RAUPEX UV shield pipe is manufactured in the USA by REHAU in a plant using a quality management system that is certified to ISO 9001.

RAUPEX white UV shield pipes in the sizes below are listed for use in residential fire sprinkler systems in accordance with UL 1821. RAUPEX red and blue UV shield pipes are not certified for fire sprinkler systems. RAUPEX pipes may not be used for fire sprinkler applications other than those defined in NFPA 13D or IRC P2904. RAUPEX white UV shield pipe for residential fire sprinkler applications is listed for use with FIREPEX compression-sleeve fittings and the EVERLOC+ compression-sleeve fitting system.

Straight lengths are packaged in a single outer bag.

2. FIREPEX® compression-sleeve fittings

The FIREPEX residential fire sprinkler system serves the requirements for fire sprinkler systems as defined by National Fire Protection Association (NFPA) Standard 13D *Installation of Sprinkler Systems in One- and Two- Family Dwellings and Manufactured Homes* and the International Residential Code Section P2904

EVERLOC+ compression-sleeve fittings and sleeves are designed specifically for use with REHAU PEXa pipe. Installation is performed with EVERLOC+ compression-sleeve tools. Follow all published REHAU *Technical Guidelines*. EVERLOC+ polymer fittings are produced from a polyphenylsulfone (PPSU) material. EVERLOC+ LF brass fittings are produced from ECO Brass® (UNS C69300 or CW724R). EVERLOC+ compression sleeves are produced using a specially formulated PEXa material and are designed specifically for use with EVERLOC+ fittings. All EVERLOC+ fittings and sleeves comply with the lead-free requirements of the U.S. Safe Drinking Water Act. Order PEXa compression sleeves separately from fittings.

EVERLOC+ fittings listed below are certified by NSF International for use in potable water applications in accordance with NSF/ANSI 14/61, as well as FIREPEX residential fire sprinkler systems in accordance with UL 1821.

4. EVERLOC+ compression-sleeve tools

EVERLOC+ power tool standard kit

The EVERLOC+ power tool standard kit is specifically designed for assembling 1/2, 3/4 and 1 in. EVERLOC+ fittings. The tool kit comes complete with the following:

- EVERLOC+ power tool base unit (Article no. 105106-003)
- EVERLOC+ expander adapter QC (Article no. 105167-001)
- EVERLOC+ expander heads QC: 1/2 in. (Article no. 105074-001), 3/4 in. (Article no. 105076-001), 1 in. (Article no. 105077-001)
- EVERLOC+ compression jaws (set): 1/2 in. (Article no. 105084-001), 3/4 in. (Article no. 105088-001), 1 in. (Article no. 105091-001)
- (2) DeWALT® 12V Li-ion batteries (DCB127)
- DeWALT® 12V/20V Li-ion battery charger, 120VAC (DCB107)
- RAUCUTTER (Article no. 137495-001)
- Tool case (Article no. 318135-003)
- Grease (Article no. 224989-001) and cleaning brush (Art. 224988-001)
- Operating instructions

1. RAUPEX® O₂ barrier pipe

RAUPEX O₂ barrier pipe is manufactured using the REHAU high-pressure peroxide method for crosslinked polyethylene (PEXa). RAUPEX O₂ barrier pipe has a co-extruded oxygen diffusion barrier that exceeds the strict requirements of DIN 4726. All RAUPEX O₂ barrier pipe meets or exceeds the requirements of ASTM F876, CSA B137.5 and PPI TR-3. RAUPEX O₂ barrier pipe also complies with the requirements of the CSA B214 installation code for hydronic heating systems. RAUPEX O₂ barrier pipe for use with the EVERLOC+® compression-sleeve system certified to ASTM F877, the REHAU F1960 cold expansion fitting system certified to ASTM F1960, and RAUPEX compression nut fittings. See *REHAU Technical Bulletin TB261* for other compatible PEX fitting systems. RAUPEX O₂ barrier pipe is manufactured by REHAU in a plant using a quality management system that is certified to ISO 9001.

2. Radiant heating plate systems

Aluminum heat transfer plates are used in joist space installations to enhance heat transfer and improve efficiency. Radiant heating plate systems outperform talon-up joist space construction installations. Plate systems are suitable for both new construction and retrofit residential applications.

RAUPLATE™ radiant heating system

RAUPLATE heat transfer plates are designed with two pipe channels 8 in. on-center. RAUPLATE is screwed to the underside of the subfloor in the joist space and RAUPEX pipe snaps into the plates.

Plates measure: 8.7 x 47 in. (22 x 119 cm)

Article no.	Description	Nominal length		Package quantity	Unit weight		Minimum order
		m	ft		kg	lb	
298926-001	RAUPLATE heat transfer plate for 1/2 in. RAUPEX	1.2	4	20 pcs/box	0.70	1.50	1 box

Heat transfer plate, heavy gauge

Aluminum heat transfer plates are screwed into the joist space and RAUPEX pipe to snap into the plate.

Plate measure: 3.4 x 48 in. (8.9 x 121.9 cm) with pre-drilled 1/8 in. holes

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb

3. Radiant heating panel systems

Radiant heating panel systems are installed directly on top of the subfloor, and for some installations in walls or ceilings behind gypsum board.

RAUPANEL™ high-performance radiant heating system

Furring strips are to be used in conjunction with 8 in. return bends to facilitate proper spacing of RAUPANEL and to provide a nailing surface for the floor covering. Installed without furring strips, RAUPANEL allows for a pipe spacing of 6 in. (152 mm) on-center. Reference the table below for product dimensions and square footage. Follow *RAUPANEL System Installation Guide (855.625)* for instructions on design and use of this product. RAUPANEL is 5/8 in. thick and designed for use with 3/8 in. RAUPEX O₂ barrier pipe.

RAUBOARD™ radiant heating system

RAUBOARD low-profile heat transfer panels are screwed to the subfloor or wall/ceiling joists, then the 10.1 mm RAUPEX pipe snaps into the groove. A small bead of silicone is applied to the groove before installing the pipe. RAUBOARD panels measure 1/2 in. thick with pipe spacing of 6 in. (152 mm) on-center.

4. Radiant heating mat systems

RAUMAT™ is a pre-assembled roll of RAUPEX O₂ barrier pipe intended for radiant heating and cooling systems to be installed in large, open slab areas. RAUMAT is custom designed and built to project-specific requirements. Contact your local REHAU sales office for availability. RAUMAT is custom-made for each project, therefore article numbers, pricing, options and lead times vary.

RAUMAT pre-assembled radiant mat system with 5/8 in. RAUPEX pipe

RAUMAT is custom-made for each project, therefore article numbers, pricing, options and lead times vary. Contact your local REHAU sales office for availability.

Options

- Length - Custom lengths 40 to 250 ft
- Width - Custom width up to 6.5 ft
- Spacing - Custom spacing (1 in. OC increments)
- Pipe - RAUPEX O₂ barrier 5/8 in.
- Circuits - Up to 5 circuits per RAUMAT (equal length)
- Tails - Customizable per project requirements
- Supports - PEX rails every 6 ft

RAUMAT pre-assembled radiant mat system with 3/4 in. RAUPEX pipe

RAUMAT is custom-made for each project, therefore article numbers, pricing, options and lead times vary. Contact your local REHAU sales office for availability.

Options

- Length - Custom lengths 40 to 250 ft
- Width - Custom width up to 6.5 ft
- Spacing - Custom spacing (2 in. OC increments)
- Pipe - RAUPEX O₂ barrier 3/4 in.
- Circuits - Up to 5 circuits per RAUMAT (equal length)
- Tails - Customizable per project requirements
- Supports - PEX rails every 6 ft

RAUPEX® SPEED hook-and-loop radiant system

RAUPEX SPEED hook-and-loop radiant system is used in floors to efficiently and evenly distribute heat transfer from RAUPEX SPEED pipe into or out of the room. The system can be installed in a concrete slab on grade, suspended slab or above suspended wood floor and encased in a thin slab overpour.

1/2 in. RAUPEX SPEED O₂ barrier pipe

RAUPEX SPEED O₂ barrier pipe includes a hook-and-loop tape for fastening to the RAUPEX SPEED mat or iBoard, without the need for staples, pins or clips.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
160950-300	1/2 in. RAUPEX SPEED O ₂ barrier pipe, 300 ft coil (91.4 m)	300 ft	7.8	17.2	1 coil
160950-001	1/2 in. RAUPEX SPEED O ₂ barrier pipe, 1000 ft coil (304.8 m)	1000 ft	26.3	57.9	1 coil

RAUPEX SPEED mat

The RAUPEX SPEED hook-and-loop mat has an adhesive bottom, allowing it to be installed on different insulation materials, slabs or other substrates. The loop part of the hook-and-loop system on the top of the mat works with the hook-and-loop tape of the RAUPEX SPEED O₂ barrier pipe for fastening without the need for staples, pins or clips.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
320893-100	RAUPEX SPEED mat, roll	218.2 ft ² (20.21m ²)	15.6	34.4	1 roll

RAUPEX SPEED iBoard

The RAUPEX SPEED iBoard combines an R-value insulation board with the hook-and-loop fastening system for radiant overpour applications. The hook-and-loop tape on the RAUPEX SPEED pipe (Article no. 160950-300, 160950-001) fastens to the loop surface of the iBoard without the need for staples, pins or clips. The imprinted grid pattern on the iBoard enables fast and accurate pipe layout. Tape may be used to join or repair iBoard.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
422069-001	RAUPEX SPEED iBoard R5 (4 ft x 8 ft x 1.25 in.)	320 ft ² (29.73m ²)	21.55	47.5	+
422071-001	RAUPEX SPEED iBoard R10 (4 ft x 8 ft x 2.38 in.)	160 ft ² (14.86 m ²)	31.98	70.5	+
427469-001	RAUPEX SPEED iBoard tape	2 in. (W) x 108 ft (L)	0.28	0.63	1 roll

+Lead times and minimum order quantity vary per project. Contact sales office for details.

RAUPEX SPEED door spreader

The RAUPEX SPEED door spreader with pipe guide aids in the installation of the RAUPEX SPEED hook-and-loop radiant systems by guiding the pipe above the mat or iBoard during the installation process.

5. PRO-BALANCE® manifolds and accessories

PRO-BALANCE 1 in. stainless steel manifold with gauges

Delivered pre-assembled and ready to install. Use with 10.1 mm and 3/8, 1/2, 5/8 and 3/4 in. RAUPEX pipes using REHAU manifold connections (sold separately). Compatible with REHAU manifold valve actuator (Article no.260166-002).

Each PRO-BALANCE 1 in. manifold comes complete with the following:

- 1 in. NPT supply and return manifold isolation valves with gaskets (Article no. 316250-002) and mini thermometers (Article no. 250218-001)
- Visual flow gauges/isolation valves (0 to 2 GPM) on stainless steel supply header (Article no. 316252-002)
- Circuit balancing/isolation valves on stainless steel return header (Article no. 316254-002)
- Air vent drain valves with gaskets (Article no. 316257-002)
- Mounting brackets (Article no. 261386-001)
- Vent key and holder
- Installation instructions
- Manifold circuit chart

Notes:

- Manifold lengths above include the isolation ball valves 2.44 in. (62 mm) and the air vent/boiler drain valves 2.24 in. (57 mm)
- Maximum flow is 2.0 GPM (0.13 l/s) per circuit; and a total manifold flow of no more than 20 GPM (1.26 l/s)
- Depth of manifold is 3.9 in. (10.0 cm) with bracket, valves and mini thermometers installed
- Can be joined to other manifold sections using 1 in. BSPP unions (Article no. 316258-002)

PRO-BALANCE 1 1/4 in. stainless steel manifold with gauges

For use with 10.1 mm and 3/8, 1/2, 5/8 and 3/4 in. RAUPEX pipes using REHAU manifold connections (sold separately).

Each PRO-BALANCE 1 1/4 in. manifold comes complete with the following:

- 1 1/4 in. NPT supply and return manifold isolation ball valves with thermometer sockets and flat gaskets (Article no. 343626-001)
- Two 1 1/4 in. BSPP end caps with gaskets (Article no. 343631-001)
- Visual flow gauges (0 to 4 GPM) on supply side (Article no. 343625-001)
- Circuit balancing/isolation valves on return side (Article no. 316254-002)

EVERLOC+ connections for PRO-BALANCE stainless steel manifolds

EVERLOC+ R-20 connections are for use with RAUPEX pipes and PRO-BALANCE manifolds and manifold circuit isolation valves (Article no. 302047-001). These swivel nut connections install onto PRO-BALANCE manifolds without special tools. All fitting sizes include EVERLOC+ insert with installed O-ring, and swivel nut in one assembly. Installation of RAUPEX pipe is performed with EVERLOC+ compression-sleeve tools. Order EVERLOC+ PEXa compression sleeves separately (see page 3.21). EVERLOC+ R-20 connections are not for potable applications. Follow all published *REHAU Technical Guidelines*.

F1960 connections for PRO-BALANCE stainless steel manifolds

F1960 R-20 connections are for use with RAUPEX pipes and PRO-BALANCE manifolds, as well as manifold circuit isolation valves (Art. 302047-001). These swivel nut connections install onto PRO-BALANCE manifolds without special tools. All fitting sizes include F1960 connection with installed O-ring, and swivel nut in one-piece assembly. Order F1960 PEXa reinforcing rings separately (see page 3.29). Installation of RAUPEX pipe is performed with commercially available F1960 cold expansion tools. F1960 R-20 connections are not for potable applications. Follow all published *REHAU Technical Guidelines*.

PRO-BALANCE manifold replacement flow gauges

PRO-BALANCE flow gauge kits can be used to replace flow gauges on the supply side of the PRO-BALANCE manifolds and connect directly with a 3/8 in. threaded connection. The replacement flow gauges have an integrated shutoff valve that is manually activated with a common vent key. Liquid thread sealant should be used when reinstalling flow gauges. Thread sealant should be liquid, medium strength sealant.

Article no.	Description	Package quantity	Unit weight g	Unit weight lb	Minimum order

PRO-BALANCE manifold circuit isolation valve

This nickel plated 1/4 turn ball valve attaches to R-20 circuit outlets on the supply side of 1 in. PRO-BALANCE manifold to allow for complete shut-off. Standard 1/4 in. vent key (supplied with each manifold) is used to operate the valve. Install flow-stop valves by hand onto R-20 outlets of the manifold. Do not use thread sealant. Thread the valve clockwise until it stops. If necessary, back the valve off to align the valve stem with the front of the manifold. May only be used with 3/8, 1/2 and 5/8 in. R-20 outlets.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
302047-001	PRO-BALANCE manifold circuit isolation valve, nickel plated	10/box	0.12	0.26	1 box

PRO-BALANCE manifold NPT isolation ball valve sets

Nickel plated valves with integrated thermometer housings on each side of the valve bodies. Mini thermometers (Article no. 250218-001) can be set into these housings to give accurate readings of temperatures on both supply and return sides of the PRO-BALANCE manifold. Includes gaskets. Mini thermometers are sold separately.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
316250-002	1 in. NPT x 1 in. BSPP valve set w/ thermometer housings, nickel plated	Set of 2	0.42	0.92	1 set
343626-001	1 1/4 in. NPT x 1 1/4 in. BSPP valve set w/ thermometer housings, nickel plated	Set of 2	2.10	4.63	1 set

PRO-BALANCE manifold air vent/boiler drain combination set

Nickel plated set includes air vent/boiler drain combination pieces with union nuts and gaskets. Manual air vent opens with 1/4 in. vent key (supplied with each manifold). Boiler drain ball valve includes male garden hose thread (GHT). Gasketed caps included.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
316257-002	1 in. BSPP air vent/boiler drain combination set w/ gaskets, nickel plated	1 set of 2	444	0.98	1 set

PRO-BALANCE manifold adapter fitting

For use with PRO-BALANCE 1 1/4 in. manifolds to transition 1 1/4 in. BSPP female x 1 in. BSPP male in order to use air vent/boiler drain combination set (Article no. 316257-002). Painted brass with stainless steel finish to match PRO-BALANCE manifolds.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
343628-001	1 1/4 in. BSPP female x 1 in. BSPP adapter, painted brass with stainless steel finish	1 set of 2	129	0.28	1 set

PRO-BALANCE manifold brass automatic air vent

This brass automatic air vent replaces a manual air vent on air vent/boiler drain pieces (Article no. 316257-002) to allow automatic elimination of entrained air in a hydronic system.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
250212-001	Brass automatic air vent 3/8 in. BSPP	1	142	0.31	1

PRO-BALANCE manifold end caps

Nickel plated end caps are used to cap off the end of a PRO-BALANCE manifold headers when not using the end accessories, i.e. air vent/boiler drain (Article no. 316257-002). Includes gasket.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
316248-002	1 in. manifold end cap w/ gasket, nickel plated	1	100	0.22	1
343631-001	1 1/4 in. manifold end cap w/gasket, nickel plated	1	100	0.22	1

PRO-BALANCE manifold BSPP 90° angle pieces

Nickel plated 90° angle piece used to install manifold isolation valves at a right angle to manifold. Includes union nut and gasket.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
316249-002	1 in. BSPP 90° angle piece w/ gasket, nickel plated	1	343	0.76	1
343632-001	1 1/4 in. BSPP 90° angle piece w/ gasket, nickel plated	1	429	0.95	1

PRO-BALANCE manifold blind plug

PRO-BALANCE nickel plated blind plugs are used in place of the flow gauges on the supply side of the PRO-BALANCE manifolds. Liquid thread sealant should be used when installing blind plug. Thread sealant should be a liquid type that is medium strength, so that the fitting can be removed using just hand tools.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
298186-001	Blind plug 3/8 in. BSPP, nickel plated	1	17	0.04	1

PRO-BALANCE manifold union sets

BSPP x BSPP nickel plated unions are used to connect two or more PRO-BALANCE manifolds together in series. Includes union nuts and gaskets. May be used to extend an installed manifold.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
316258-002	1 in. BSPP unions w/ gaskets, nickel plated	1 set of 2	300	0.60	1 set
343627-001	1 1/4 in. BSPP unions w/ gaskets, nickel plated	1 set of 2	220	0.49	1 set

PRO-BALANCE manifold protective cap

327715-001	Rubber gasket for 1 1/4 in. manifold valve	1	2.27	0.005	1

PRO-BALANCE manifold brackets

1 1/4 in. galvanized steel manifold brackets are for use with PRO-BALANCE 1 in. manifolds; 1 1/2 in. galvanized steel manifold brackets are for use with PRO-BALANCE 1 1/4 in. manifolds

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
261386-001	1 1/4 in. steel manifold bracket	Set of 2	0.45	1.0	1 set
261396-001	1 1/2 in. steel manifold bracket	Set of 2	0.50	1.1	1 set

PRO-BALANCE manifold extension kit

Brass extension kit to add a circuit to an existing PRO-BALANCE 1 in. manifold. The extension kit includes a supply section with a visual flow gauge, a return section with a circuit balancing/isolation valve and two gaskets.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
250225-100	Brass extension kit for PRO-BALANCE manifold	1	1.0	2.2	1

PRO-BALANCE pressure differential bypass module

This modular accessory connects directly to PRO-BALANCE manifold. Normally, a constant speed circulator is sized assuming that all circuits in a zone valve system may be open. The pressure differential bypass module provides a means to control the excess flow (velocity) that would otherwise occur when actuators close. Installation of this module onto the 1 in. PRO-BALANCE manifolds creates an automatically regulated flow path such that operating zone circuits do not see unnecessarily high flow.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
281541-001	PRO-BALANCE pressure differential bypass module	1	1.3	2.8	1

PRO-BALANCE mixing module

Intended for small radiant heating applications using a fixed "set point" temperature supply. Designed to fit directly to the left or right of the PRO-BALANCE manifold. The supply temperature to the manifold may be adjusted between 68 and 158°F (20 and 70°C), by means of temperature controlled injection valve. The injection valve has features that can limit the manual adjustment of the valve to prevent tampering and/or over-heating. The module pump would be typically energized by a room thermostat via a relay. The relay could be energized by a thermostat or via the end of the actuator of one of the REHAU electronic boxes.

Specifications:

- H Max. acceptable working temperature/pressure: 176°F (80°C) / 87 psi (6 bar)
- H Pump: Grundfos UP 15-58-130 mm 1 in. BSPM connections; 3-speed cast iron "SUPERBRUTE"; Integral check valve; 115 VAC, 2 pole, single phase; flow range: 0 to 17.5 US GPM; Head range: 0 to 19 ft

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
281501-001	PRO-BALANCE mixing module	1	4.10	9	1

PRO-BALANCE white surface mount manifold cabinets

PRO-BALANCE manifold cabinets for surface installations. Cabinets are made from galvanized steel with basic white powder coat finish (RAL 9016 / Pantone 705). Internal brackets allow for mounting of PRO-BALANCE 1 and 1/4 in. manifolds. Removable cover-plate below door provides finished look (27 in. / 69 cm). Steel door includes cam latch. Keyed locks can be added separately, see (Article no. 217688-001).

Article no.	Description	Typical station configuration	Package quantity	Unit weight		Minimum order

PRO-BALANCE white flush mount manifold cabinets

PRO-BALANCE manifold cabinets for flush installation. The cabinets are made from galvanized steel and the frame/door assembly is basic white powder coat finish (RAL 9016 / Pantone 705). Internal brackets allow for mounting of PRO-BALANCE manifolds. Pipe knockouts on both sides allow for pipe connections to the manifold. Cabinet has adjustable legs (0-5.7 in. / 0-15 cm) and screed cover-plate (sold separately) to stand the cabinet on the floor with an existing opening. Legs may be removed and the enclosure can be mounted in the wall cavity. The frame/door assembly is adjustable to account for the thickness of the gypsum or other wall coverings (0-1.5 in. / 0-4 cm). Steel door includes cam latch. Keyed locks can be added separately, see (Article no. 217688-001)

217688-001	Keyed lock for PRO-BALANCE manifold cabinets	19 mm square	41	0.09	1 set

6. Zone controls and thermostats

Manifold actuator controls– wiring junction box with transformers

The REHAU manifold actuator controls are designed to simplify the wiring process. Easy to follow PC board and secure screw terminal layout eliminates problems caused by incorrect wiring. External indicator lights confirm operation sequence and diagnostic feedback. The unit includes two built-in 40 VA transformers. Extra fuses provided.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
298276-001	4 manifold actuator control	1	2.45	5.45	1
298286-001	6 manifold actuator control	1	2.68	5.87	1

Zone pump relay controls– wiring junction box with transformer and priority

The REHAU zone pump relay controls are designed to simplify the wiring process. Easy to follow PC board and secure screw terminal layout eliminates problems caused by incorrect wiring. External indicator lights confirm operation sequence and diagnostic feedback. Each unit includes a 15 VA transformer ready to power thermostats. Relays are individually fuse protected. Two spare fuses built-in.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
298726-001	3 zone pump relay control	1	1.49	3.28	1
298756-001	4 zone pump relay control	1	1.52	3.35	1
298766-001	6 zone pump relay control	1	1.64	3.62	1

Zone control modules

The zone control module provides a convenient low-voltage wiring panel for thermostats and manifold valve actuators. The zone control module is for use with REHAU thermostats (Article no. 236487-002, 398022-001 and 398023-001) and manifold valve actuators (Article no. 260166-002, 260167-001).

The zone control module may control up to four or six zones (thermostats), with up to eight or twelve actuators (maximum two per zone). Each zone has a terminal for end-switch wires, provided on REHAU manifold valve actuators, to operate circulator pumps, boiler, etc. (through a separate low-voltage relay). For more than six zones (thermostats), additional modules can be connected using standard wire.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
243047-001	Zone control, 4 zone module	1	0.45	1.0	1
243077-001 ⁺	Zone control, 6 zone module	1	0.56	1.2	1

⁺This item is not stocked. Lead times may vary.

Dual sensing digital thermostat

This 3-wire thermostat offers system set-up capabilities with simple, easy-to-use menus. There is a reduced operating mode which may be used for nighttime and vacation periods. With the optional floor sensor this thermostat can regulate either the floor or the room temperature or both. In that case the floor sensor is used as a temperature limiter, either high or low limit. Additional features include pump exercise, °F or °C capabilities and air/floor priority.

Notes:

- H Floor/slab sensor requires two additional wires—from slab sensor to thermostat
- H Requires 24 VAC power source
- H For optional floor sensor use Article no. 236497-001

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
236487-002	Dual sensing digital thermostat	1	96	0.21	1

10K floor sensor

Optional floor sensor for dual sensing thermostats. To be used only with Dual sensing digital thermostat (Article no. 236487-002).

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
236497-001	10K floor sensor (9.8 ft / 3 m)	1	62	0.14	1

Single-stage non-programmable radiant heating thermostat with floor sensor

Single-stage non-programmable radiant heating thermostat with floor sensor is designed specifically to control hydronic radiant heating zones using pulse width modulation (PWM) technology. Simple up and down buttons and a display with large type make this thermostat easy to read and use. Included slab sensor measures radiant floor temperature to protect the floor from overheating and to enhance comfort.

The thermostat requires 24 VAC power supply and can be used to directly control up to seven REHAU manifold actuators (Article no. 260166-002, 260167-001). This thermostat can also be used with REHAU zone controls. 4-conductor 18 AWG or similar wire is recommended for all 24 VAC wiring.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
398022-001	Single-stage non-programmable RFH thermostat (519)	1	0.27	0.60	1

Two-stage programmable radiant heating thermostat with floor sensor

Two-stage programmable radiant heating thermostat offers three modes of operation: one stage of heating, one stage of heating and one stage of cooling with fan, or two stages of heating with fan. Included slab sensor measures radiant floor temperature to protect the floor from overheating and to enhance comfort. The programmable schedule supports either a 7-day or 24-hour schedule with 2 or 4 events per day. A permanent temperature hold button overrides the programmable schedule.

The thermostat requires 24 VAC power supply and can be used to directly control up to seven REHAU manifold actuators (Article no. 260166-002, 260167-001). This thermostat can also be used with REHAU zone controls. 4-conductor 18 AWG or similar wire is recommended for all 24 VAC wiring.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
398023-001	Two-stage programmable RFH thermostat (521)	1	0.27	0.60	1

Accessories for digital thermostat

The floor sensor (Article no. 236397-001) can be used for floor warming applications and/or to help limit (maximum and/or minimum) floor temperatures. Sensor is completely encased in a protective jacket and can be encased in concrete (it is recommended to slide sensor through a short protective conduit where the wires enter/exit the concrete or gypsum cement). Sensor comes with 10 ft (3 m) of 2-conductor wire.

The Adapter Plate (Article no. 315837-001) covers the paint ring left behind when replacing other thermostats, so that no patching or painting the wall is required. The plate also allows the thermostat to be installed onto a single-gang electrical box and includes screws for mounting the adapter plate and the device that attaches to it. This adapter is compatible with thermostats Article no. 398022-001 and Article no. 398023-001.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
236397-001	Floor sensor for digital thermostat	1	26	0.06	1

7. EVERLOC+® compression-sleeve fittings

EVERLOC+ compression-sleeve fittings and sleeves are designed specifically for use with REHAU PEXa pipe. Installation is performed with EVERLOC+ compression-sleeve tools. Follow all published *REHAU Technical Guidelines*. EVERLOC+ polymer fittings are produced from a polyphenylsulfone (PPSU) material. EVERLOC+ LF brass fittings are produced from ECO Brass® (UNS C69300 or CW724R). EVERLOC+ compression sleeves are produced using a specially formulated PEXa material and are designed specifically for use with EVERLOC+ fittings. All EVERLOC+ fittings and sleeves comply with the lead-free requirements of the U.S. Safe Drinking Water Act. Order PEXa compression sleeves separately from fittings.

8. F1960 cold expansion fittings

REHAU F1960 cold expansion fittings and rings are for use with REHAU PEXa pipes only. The maximum temperature and pressure ratings of the REHAU F1960 fitting system is in accordance with ASTM F877 and CSA B137.5 for SDR9 PEX, see REHAU pipe product submittals for ratings. Installation is performed with commercially available F1960 cold expansion tools. Follow all published *REHAU Technical Guidelines*. All REHAU F1960 fittings and rings comply with the lead-free (LF) requirements of the U.S. Safe Drinking Water Act.

F1960 PEX reinforcing rings

9. RAUPEX compression nut fittings

RAUPEX split-ring compression nut brass fittings are machined from solid brass stock. Integral fitting/insert design provides positive clamping and sealing action with split compression ring.

RAUPEX MPT adapters

Dual adapter fittings connect RAUPEX pipe to threaded fitting (first size) or copper pipe (second size) in sizes indicated. Make solder or threaded connection before connecting to RAUPEX pipe.

Article no.	Description	Package quantity			Unit weight		Minimum order
		bag	box	carton	g	lb	
260987-001	1/2 in. RAUPEX x 1/2 in. MPT or 1/2 in. C female (sweat)	5	25	150	136	0.30	1 bag
267567-001	5/8 in. RAUPEX x 1/2 in. MPT or 1/2 in. C female (sweat)	5	25	150	135	0.30	1 bag
260357-001	3/4 in. RAUPEX x 3/4 in. MPT or 1/2 in. C female (sweat)	1	15	90	229	0.50	1 bag
260477-001	1 in. RAUPEX x 1 in. MPT or 3/4 in. C female (sweat)	1	10	60	305	0.67	1 box

RAUPEX copper adapters

Copper adapter fittings connect RAUPEX pipe to copper pipe in sizes indicated. Make solder connection before connecting to RAUPEX pipe.

Article no.	Description	Package quantity			Unit weight		Minimum order
		bag	box	carton	g	lb	
260997-001	1/2 in. RAUPEX x 1/2 in. C female (sweat)	5	30	180	108	0.24	1 bag

+This item is not stocked. Lead times may vary.

Balancing ball valve, compression nut to copper

Balancing ball valves combine a balancing screw with a ball valve in one unit. Make solder connection before connecting to RAUPEX pipe.

Article no.	Description	Cv	Package		Unit weight		Minimum order
			box	carton	kg	lb	
260847-001+	1/2 in. RAUPEX x 1/2 in. C female (sweat) balancing valve	0 to 3.0	12	72	350	0.78	1 each

+This item is not stocked. Lead times may vary.

11. Copper manifolds

Pre-cut copper manifolds

Manifolds are type L copper with open ends in sizes indicated. One end is copper male while the opposite end is flared to copper female (sweat). manifold pieces may be combined to make longer manifolds. Copper outlets are high-temperature brazed (lead-free) into headers at 2 in. on-center so manifolds cannot be cut to length. 1/2 in. copper outlets are 2 in. long. Use with REHAU fittings and valves to assemble complete manifolds for heating applications.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
261326-001	1 in. copper manifold, (2) 1/2 in. outlets	1	0.19	0.43	1
261336-001	1 in. copper manifold, (3) 1/2 in. outlets	1	0.26	0.58	1
261346-001	1 in. copper manifold, (4) 1/2 in. outlets	1	0.34	0.75	1

Manifold header stock

Manifolds are type L copper with open ends in sizes indicated. Copper outlets are high-temperature brazed (lead-free) into headers. Each manifold is 72 in. (180 cm) long with 24 outlets at 3 in. on-center. Manifolds can easily be cut to length. Do not exceed maximum flow rates listed above. Use with REHAU fittings and valves to assemble complete manifolds for heating applications.

Article no.	Description	Max GPM	Header size	Outlet size	Package quantity	Unit weight		Minimum order
						kg	lb	
250810-001	1 x 1/2 in. copper manifold	20	1 in.	1/2 in.	5	2.3	5.1	1
250817-001	1 x 3/4 in. copper manifold	20	1 in.	3/4 in.	4	2.6	5.8	1

250840-001	2 x 3/4 in. copper manifold	75	2 in.	3/4 in.	2	5.1	11.2	1

+This item is not stocked. Lead times may vary.

Plastic manifold bracket

Brackets are made of reinforced nylon. A 1.57 in. (40 mm) offset allows supply/return manifold clearance. These brackets are used with 1 in. and 1 1/4 in. diameter copper manifolds using supplied flexible spacers.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
261266-001	Plastic manifold brackets	1 set of 2	0.18	0.40	1 set

End cap vent drains

End cap vent drain pieces are for use with copper manifolds for radiant and SIM applications. They allow connection of an automatic air vent (1/8 in. NPT) and a drain valve (1/2 in. NPT) to the end of the copper manifold. Use standard 1/8 in. NPT air vent.

Note: The REHAU automatic air vent (Article no. 250212-001) does not work with the end cap vent drains due to different thread sizes and is only for use with PRO-BALANCE brass manifolds.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
250820-901+	1 1/4 in. end cap vent drain	1	0.23	0.50	1
250840-901	2 in. end cap vent drain	1	0.42	0.93	1

+This item is not stocked. Lead times may vary.

12. Installation accessories

Steel support bends

3/8, 1/2, 5/8 and 3/4 in. steel support bends snap over RAUPEX pipe. 1 in. steel support bends slide onto pipe.

+This item is not stocked. Lead times may vary.

Universal fixing rail 3/8 to 3/4 in.

Universal fixing rail is molded with alternating small/large tabs to hold pipe in place. The small tabs hold 3/8 and 1/2 in. RAUPEX pipes, while the large tabs hold 5/8 and 3/4 in. RAUPEX pipes. Alternating tabs are spaced at 4 in (10 cm). Flat bottom and pre-drilled holes for mounting. Clips at the end allow pieces to be snapped together to make longer lengths.

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb

Plastic holding pin

Plastic holding pins are used to secure RAILFIX fixing rail and universal fixing rail (Article no. 266407-001) to rigid insulation.

Article no.	Description	Package quantity		Unit weight		Minimum order
		bag	box	g	lb	
259268-001	Plastic holding pin	500	5000	1.46	0.003	1 bag

Galvanized support channels

Galvanized support channels are made of carbon roll-formed steel and designed to support RAUPEX pipe in sizes 3/4, 1, 1-1/4, 1-1/2, and 2 in. The support channels are snapped onto the PEXa pipe, adding rigidity and durability to overhead and exposed installations in commercial plumbing and hydronic distribution applications. The channels may be cut to size and are supported using typical clevis hangers.

Article no.	Description	Length		Package quantity	Unit weight		Minimum order

13. PEX pipe installation tools

EVERLOC+ power tool standard kit

The EVERLOC+ power tool standard kit is specifically designed for assembling 1/2, 3/4 and 1 in. EVERLOC+ fittings. The tool kit comes complete with the following:

- EVERLOC+ power tool base unit (Article no. 105106-003)
- EVERLOC+ expander adapter QC (Article no. 105167-001)
- EVERLOC+ expander heads QC: 1/2 in. (Article no. 105074-001), 3/4 in. (Article no. 105076-001), 1 in. (Article no. 105077-001)
- EVERLOC+ compression jaws (set): 1/2 in. (Article no. 105084-001), 3/4 in. (Article no. 105088-001), 1 in. (Article no. 105091-001)
- (2) DeWALT® 12V Li-ion batteries (DCB127)
- DeWALT® 12V/20V Li-ion battery charger, 120VAC (DCB107)
- RAUCUTTER (Article no. 137495-001)
- Tool case (Article no. 318135-003)
- Grease (Article no. 224989-001) and cleaning brush (Article no. 224988-001)
- Operating instructions

RAUTACKER 3D stapler

RAUTACKER 3D foam staples are used when installing RAUPEX pipe on rigid foam board insulation in radiant heating and snow and ice melting applications. Extruded polystyrene foam board is recommended. The polyethylene (PE) staples with retention barbs are supplied in magazines of 25 staples. The 1 3/8 in. staple is for use with minimum 1 in. (25 mm) thick insulation. The 2 3/8 in. staple is for use with minimum 1 1/2 in. (38 mm) thick insulation.

RAUTACKER 3D foam 1 3/8 in. staples work with 3/8, 1/2 and 5/8 in. pipe. RAUTACKER 2 in. and 2 3/8 in. staples can be used with any pipe diameter. RAUTACKER 2 3/8 in. staples are required for 3/4 in. pipe. Typically, one staple is required every 3 ft (90 cm) on straight runs of pipe with an additional staple in the middle of bends.

RAUTACKER 3D foam staples are installed from a standing position using the RAUTACKER 3D stapler tool. This lightweight tool can be loaded with 120 staples at a time. Follow all published installation instructions.

RAUTACK foam staples

For use with RAUPEX pipe to install on rigid foam board insulation (extruded polystyrene is recommended). RAUTACK foam staples work with 3/8, 1/2, 5/8 and 3/4 in. RAUPEX pipes installed in radiant and SIM applications. The 1 1/2 in. staple is for use with minimum 1 in. (25 mm) thick insulation. The 2 1/4 in. staple is for use with minimum 1 1/2 in. (38 mm) thick insulation. Typically only one staple is required every 3 ft (90 cm) on straight runs of pipe, with one staple in the middle of bends.

Note: For use with legacy RAUTACKER stapler tool.
NOT compatible with RAUTACKER 3D stapler tool (Article no. 298956-001).

Hand power (HP) stapler tool

For use with RAUPEX pipe to install on wooden subfloor systems. The HP stapler tool installs plastic staples with integral steel nail (Article no. 266297-001) without the use of air power or electricity. HP staples work with 3/8, 1/2 and 5/8 in. RAUPEX pipe installed in radiant applications.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
266287-001	Hand power (HP) stapler tool	1	2.5	5.5	1
266297-001	Hand power (HP) 1 1/2 in. plastic staple	500/box	0.004	0.009	1 box

Pneumatic stapler

Pneumatic stapler tool fastens RAUPEX pipe to a wooden subfloor. For use with 3/8 and 1/2 in. RAUPEX pipe, tool comes complete with pogo stick extension arm so it can be used from a standing position. Special design prevents firing until tool head is securely around pipe. Use only the Spotnails® staples (Article no. 432105-001, 3610PG-10M) listed above or equal; 1 in. (25 mm) crown, 1 1/4 in. (32 mm) leg, 16-gauge chisel point.

14. Electronic controls

Radiant floor heating (RFH) controls

The floating action mixing control (Article no. 236317-001) is an outdoor reset control designed to control the mixed supply water temperature to a radiant system. The floating action mixing control operates a 24 VAC floating action 3 or 4-way mixing valve actuator (Article no. 260526-001, Article no. 260566-001) to regulate the supply water temperature while still protecting a non-condensing boiler against flue gas condensation. This control also provides for boiler operation, primary pump operation and secondary pump operation.

The variable speed mixing control (Article no. 236327-001) is an outdoor reset control designed to control the mixed supply water temperature to a radiant system. The variable speed mixing control operates a variable speed injection pump to regulate the supply water temperature while still protecting the boiler against flue gas condensation. This control also provides for boiler operation, primary pump operation, and secondary pump operation.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
236317-001+	Floating action mixing control (360)	1	1.4	3.1	1
236327-001+	Variable speed mixing control (361)	1	1.4	3.0	1

+This item is not stocked. Lead times may vary.

Single-zone SIM controls, low voltage

The single-zone SIM control (654) operates hydronic equipment to melt snow or ice from any surface including driveways, walkways, patios, business entrances, parking ramps, loading docks, hospital entrances, helipads or car wash bays. The surface temperature for snow melting is controlled automatically to reduce operating energy costs.

The control has an automatic start and stop function when used with the snow/ice sensor (090) (Article no. 236357-001). Automatic start with a timed stop is available when used with the aerial snow sensor (095) (Article no. 315836-001). The control can operate a dedicated hydronic boiler or a mixing device. Isolation relays are required to operate line voltage pumps.

The aerial snow sensor (095) is an aerial mounted sensor that detects falling snow and allows the single-zone SIM control (654) (Article no. 315839-001) to automatically start the snow melting equipment. System stop is provided by the control's timer or by manual disable. The sensor mounts to a nominal 1/2 in. (16 mm) metal or PVC conduit or pole. The sensor is well suited to adding automatic start to an existing snow melt system. This sensor can only be used with the single-zone SIM control (654) (Article no. 315839-001).

Article no.	Description	Package quantity	Unit weight		Minimum order
			g	lb	
315839-001	Single-zone SIM control low voltage (654)	1	590	1.3	1
315836-001+	Aerial snow sensor (095)	1	180	0.4	1

+This item not stocked. Lead times may vary.

Snow and ice melt (SIM) controls

The Wi-Fi snow melting control (670) operates hydronic heating equipment designed to melt snow and/or ice from roads and walkway surfaces. This control works with the 090 snow/ice sensor (Art. 236357-001) or 095 Aerial snow sensor (Art. 315836-001) to automatically detect snow or ice and operates a single boiler to supply heat to the slab. Boiler return protection is provided to non-condensing boilers using a mixing valve or variable speed injection mixing pump.

The Wi-Fi Single Zone SIM controller (671) is designed to operate mechanical equipment to melt snow off an outdoor slab. It is used in hydronic snow melting applications. This product uses a snow/ice detection sensor in order to automatically melt snow using pulse width modulation (PWM) and slab outdoor reset to maintain slab temperature. It is capable of controlling a single boiler, a system pump, and providing a signal when melting is enabled.

Additional control and monitoring can be done with the using the TEKMAR Connect mobile application, available for iOS and Android.

Article no.	Description	Package quantity	Unit weight		Minimum order

15. Mixing valves

Variable speed injection mixing module

Used to supply design temperature water to the PRO-BALANCE or HLV manifolds. Capability up to 120,000 Btu/hr. Single compact unit Includes an electronic variable speed injection mixing control, variable speed pump and system circulator with air elimination valve. Extremely versatile, the variable speed mixing module is equipped to be set up as an outdoor reset control, a set point control or a delta T limiting control.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
281731-001*	Variable speed mixing module	1	8.4	18.5	1

**This item is not stocked. Lead times may vary.*

Modulating mixing valves

REHAU modulating mixing valves are a powerful cost effective alternative for zone mixing with such features as outdoor reset, boiler return temperature protection and warm weather shut down (WWSD).

- Maximum operating pressure – 300 psi (2,100 KPa)
- Fluid temperature range – 20 to 240°F (-7 to 115°C) @ 135°F (57°C) ambient
- Adjustable setpoint dial 80 to 180°F (27 to 82°C)
- Selectable 15°F (-9°C) setback
- Optional boiler protection set at 135°F (57°C)

Article no.	Description	Cv	Package quantity	Unit weight		Minimum order

**This item is not stocked. Lead times may vary.*

Thermostatic 3-way mixing valves

Thermostatic mixing valves control supply water temperature for small-sized radiant systems. Sensing element is a wax/copper compound mounted within the valve body. Provides rapid stabilization of supply water temperature. Temperature is adjusted with the knob located at the top of the valve body. For feedback on temperature adjustments place a thermometer downstream of the valve. Compression-type fitting for copper distribution piping or NPT type for threaded pipe. Size valve based on Cv rating (GPM @ 1 psi pressure loss, 2.3 feet headloss).

Specifications:

- Maximum input temperature – 195°F (90°C)
- Regulated output temperature range – as listed
- Maximum working pressure – 145 psi (10 bar; 1 MPa)
- Regulation accuracy – +/- 3.6°F (2°C) at a minimum flow of 0.5 GPM (2 l/m)
- Material – brass body

Control motor for mixing valve up to 2 in.

Use with mixing valves 2 in. and smaller for motor operated control. The motor is controlled by REHAU outdoor reset/mixing controls. Operates on 24 Volt AC input provided through these controls. No additional installation kit is required. Built-in end switch is included. Manual override of mixing valve is possible by pulling out and turning the knob. Be sure to adjust the motor speed setting on electronic mixing controls to 96 seconds.

Specifications:

- Ambient temperature range – 22 to 130°F (-5 to 55°C)
- Torque – 53.10 in. lbs
- Protection type – NEMA 1 (IP 40)
- Supply voltage – 24 VAC, 50 - 60 Hz
- Power consumption – 2 VA (watts) when operating

Article no.	Description	Motor speed	Package quantity	Unit weight		Minimum order
				kg	lb	
260526-001	600 series motor with end switch for valves up to 2 in.	96 sec	1	0.5	1.2	1

3-way brass mixing valves

Compact 3-way brass mixing valves for control of radiant or SIM supply water temperature. Suitable for motor controlled radiant or SIM applications with 600 series control motor (Article no. 260526-001). When choosing a mixing valve, size according to flow (Cv) and not pipe size, for more accurate mixing. This often means using a valve that is one size smaller than supply/return pipes.

Specifications:

- Maximum operating pressure – 145 psi (10 bar)
- Maximum operating temperature – 230°F (110°C)
- Minimum operating temperature – -15°F (-10°C)
- Maximum mixing differential pressure – 14.5 psi (1 bar)
- Maximum diverting differential pressure – 20 psi (2 bar)
- Maximum torque – 45 lbf-in (5 Nm)

16. Hydronic accessories

Pressure differential bypass valves

Pressure differential bypass valves divert excess flow when one circulator pump is used with multiple zones, reducing wear on the pump, avoiding noise problems in the control valves and allowing more stable temperature control. Valves are pressure-adjustable. Connections (union ends) are to copper pipe for 1/2 and 3/4 in. valves. The 1 in. valve is supplied with 1 in. MPT union ends.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
260517-001 ⁺	1/2 in. C female (sweat) pressure bypass valve	1	0.68	1.5	1
260527-001 ⁺	3/4 in. C female (sweat) pressure bypass valve	1	0.91	2.0	1
267987-001 ⁺	1 in. MPT pressure bypass valve	1	1.40	3.0	1

⁺This item is not stocked. Lead times may vary.

Thermometer

Thermometers are recommended in radiant/SIM supply and return pipes to monitor fluid temperatures. REHAU immersion well thermometers have a 2 1/2 in. dial, reading from 50 to 250°F (10 to 120°C).

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
260967-001	Thermometer with 3/4 in. solder well fitting	1	0.13	0.29	1

Combination temperature/pressure gauge

The combination temperature/pressure gauge has a 2 1/2 in. dial reading from 0 to 100 psi and 30 to 240°F (-1 to 115°C). 1/4 in. NPT back-mounted connection for installation in a pipe tee/fitting. The immersion gauge contacts the water directly to give the highest degree of temperature and pressure accuracy. For use in radiant and SIM applications.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
266417-001	Combination temperature/pressure gauge	1	0.14	0.30	1

Heat exchangers

Compact stainless steel heat exchanger for use in radiant and SIM projects. Applications include: radiant systems using a domestic hot water tank as the heat source to separate heating water from drinking water (check local codes), SIM systems using concentration of glycol (antifreeze) different than the rest of the hydronic system. CSA and UL approved. Can provide more than 100,000 Btu/hr, depending on temperatures and flow rates. Has 1/4 - 20 studs for mounting.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
266477-001	Heat exchanger, 3/4 in. MPT connections (100,000 Btu load)	1	1.3	2.85	1
266487-001 ⁺	Heat exchanger, 3/4 in. MPT connections (150,000 Btu load)	1	1.5	3.2	1

⁺This item is not stocked. Lead times may vary.

O₂
Barrier to
DIN 4726

For updates to this publication and the most current technical instructions, safety information and manufacturer's recommendations, visit na.rehau.com/resourcecenter

1. INSULPEX[®] pipe

INSULPEX pipe consists of O₂ barrier PEXa pipe encased in closed-cell polyurethane (PUR) foam insulation, with a protective low-density polyethylene (PE) outer casing. REHAU O₂ barrier pipe is made of high-quality crosslinked polyethylene, manufactured using the high-pressure peroxide method (PEXa). REHAU O₂ barrier pipe has a co-extruded oxygen diffusion layer that complies with the requirements of DIN 4726. REHAU O₂ barrier pipe is manufactured by REHAU in a plant using a quality management system that is certified to ISO 9001.

INSULPEX pipe meets the requirements of DIN 16892 and 16893. The size listed in the description is the nominal diameter in millimeters, according to DIN 16893. Metric pipes are SDR11 and are compatible with SDR11 compression-sleeve fittings. Refer to *INSULPEX Technical Manual* (Article no. 855.630) for pipe dimension details, capacities and temperature/pressure ratings.

One-pipe system – coils

One carrier pipe in the size listed, within PUR insulation and a corrugated PE outer casing.

Article no.	Description	Maximum coil size		Unit weight		Minimum order
		ft	m	kg/m	lb/ft	
423418-001	25 mm INSULPEX O ₂ barrier pipe (91)	1640	500	1.2	0.8	35 ft

2. INSULPEX end caps

Heat shrink end caps

Heat shrink end caps provide a seal around the end of INSULPEX, sealing onto RAUPEX pipe and the PE casing to protect against water infiltration in buried applications. Follow installation instructions in the *INSULPEX Installation Guide* (855.631).

Heat shrink end caps, one-pipe system

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
209961-001	25/32/40/50 mm INSULPEX heat shrink end cap	1	0.12	0.26	1

Wall sealing rings

Neoprene wall sealing rings fit tightly over the INSULPEX casing, and are meant to be located at wall penetrations. Barbed design prevents pull out. Use the sizing chart in the *INSULPEX Technical Manual* (855.630) or from the pipe diameters chart located on page 4.4, to determine the correct wall sealing ring.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
240363 -001	91 mm ID wall sealing ring (5.25 in. OD)	1	0.45	1.00	1

3. INSULPEX insulation kits

Universal tee insulation kits are for use with various pipe diameters. Insulation is NOT included with these kits. Follow directions included with kit.

Universal coupling shroud + heat shrink kits

Kits include heat shrink sleeves for sealing around INSULPEX pipes.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330068-001	Small coupling shroud insulation kit, for up to 142 mm INSULPEX casing OD	1	1.6	3.5	1
330069-001	Large coupling shroud insulation kit, for up to 225 mm INSULPEX casing OD	1	4.1	9.0	1

Universal elbow shroud + heat shrink kits

Kits include heat shrink sleeves for sealing around INSULPEX pipes.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330026-001	Small elbow shroud insulation kit, for up to 142 mm INSULPEX casing OD	1	2.5	5.5	1
330027-001	Large elbow shroud insulation kit, for up to 225 mm INSULPEX casing OD	1	6.0	13.2	1

Universal tee shroud + heat shrink kits

Kits include heat shrink sleeves for sealing around INSULPEX pipes.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330024-001	Small tee shroud insulation kit, for up to 142 mm INSULPEX casing OD	1	2.8	6.2	1
330025-001	Large tee shroud insulation kit, for up to 225 mm INSULPEX casing OD	1	5.6	12.3	1

Heat shrink sleeves

Article no.	Description	Unit weight		Minimum order
		kg	lb	
297991-033 ⁺	Shrink sleeve for small insulation kit, for up to 142 mm INSULPEX casing OD	0.79	1.74	1 m
297992-040 ⁺	Shrink sleeve for large insulation kit, for up to 225 mm INSULPEX casing OD	0.96	2.12	1 m

⁺This item is not stocked. Lead times may vary.

Universal coupling shell assembly kits

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330056-001 ⁺	Small coupling shell kit, for up to 126 mm INSULPEX casing OD	1	2.2	4.9	1
352038-001 ⁺	Large coupling shell kit, for up to 182 mm INSULPEX casing OD	1	5.2	11.5	1

Order sealing rings separately per the outer diameter of the INSULPEX pipe.

⁺This item is not stocked. Lead times may vary.

Universal elbow shell assembly kits

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330057-001 ⁺	Small elbow shell kit, for up to 126 mm INSULPEX casing OD	1	2.1	4.6	1
352039-001 ⁺	Large elbow shell kit, for up to 182 mm INSULPEX casing OD	1	4.4	9.7	1

Order sealing rings separately per the outer diameter of the INSULPEX pipe.

⁺This item is not stocked. Lead times may vary.

Universal tee shell assembly kits

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330055-001 ⁺	Small tee shell kit, for up to 126 mm INSULPEX casing OD	1	2.8	6.2	1
351054-001 ⁺	Large tee shell kit, for up to 182 mm INSULPEX casing OD	1	3.6	7.9	1

Order sealing rings separately per the outer diameter of the INSULPEX pipe.

⁺This item is not stocked. Lead times may vary.

INSULPEX sealing rings and plugs

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
330017-001 ⁺	91 mm small shell kit sealing ring	1	0.33	0.73	1

SDR11 Modular Tee

5. SDR11 Modular Tee

The SDR11 Modular Tee provides maximum design flexibility with 288 different configurations ranging from 25 x 25 x 25 up to 110 x 110 x 110.

The variety of possibilities combined with the simplicity and reliability of REHAU's SDR11 compression joint technology, REHAU has a solution for any requirement.

Contact your REHAU sales representative for assistance with specific configurations.

- Custom made in a factory environment and each fitting is 100% quality and pressure tested prior to shipment
- Fittings are pre-assembled in factory
- No O-rings
- Delivery of these non-standard articles is 3 weeks from order

Description	Minimum Order
SDR11 Modular Tee 25 x 25 x 25 to 110 x 110 x 110	1

Modular Tee Schematic:

Simply provide your REHAU sales representative with your desired configuration and receive your custom made SDR11 Modular Tee.

For technical data, see REHAU product submittal PS980 at www.na.rehau.com/resourcecenter.com

Carbon steel tees

Welded carbon steel fitting includes three SDR11 brass sleeves (25 to 63 mm) or gunmetal (75 to 125 mm).
Not certified for potable water.

6. RAUTOOL™ PEX pipe installation tools

RAUTOOL M1 25 to 40 mm manual tool kit

The M1 manually operated tool is used for the assembling SDR11 compression-sleeve fittings in sizes 25, 32 and 40 mm.

Each M1 tool kit comes complete with the following:

- M1 basic tool
- Pipe expander QC (Article no. 214176-001)
- Ratchet pipe cutter (Article no. 315242-001)
- SDR11 expansion head QC 25 mm (Article no. 131567-001)
- SDR11 expansion head QC 32 mm (Article no. 131568-001)
- SDR11 expansion head assembly M1 40 mm (Article no. 137314-001)
- Set of SDR11 clamping jaws M1 25/32 mm (Article no. 137364-001)
- Set of SDR11 clamping jaws M1 40 mm (Article no. 201798-001)
- Grease and brush pack
- Rugged plastic transport case (Article no. 137415-001)
- Operating instructions

298296-001	M1 25 to 40 mm manual tool kit	1	10.1	22.2	1 kit

RAUTOOL G2 50 to 63 mm hydraulic tool kit

The G2 tool uses a battery hydraulic pump, a 10-ft (3 m) hydraulic hose with quick-release fittings and an actuating head that is used for both expansion and compression steps.

Each G2 tool kit comes complete with the following:

- Battery pump AP-3
- Li-ion battery 18V, 3Ah MAKITA® BL1830
- Battery charger 120VAC MAKITA® DC18RC
- Hydraulic cylinder with hydraulic hose G2
- Head assembly with 2 short + 2 long locking pins
- Pipe cutter for up to 63 mm (Article no. 131558-001)
- Deburring tool
- Basic transport case
- Operating instructions
- SDR11 expansion head G 50 mm (Article no. 137424-001)
- SDR11 expansion head G 63 mm (Article no. 137434-001)
- Set of SDR11 clamping jaws G 50 mm (Article no. 137624-001)
- Set of SDR11 clamping jaws G 63 mm (Article no. 137634-001)

Accessory items sold separately:

- Set of 2 short + 2 long locking pins (Article no. 137745-001)
- AP3 adapter to G1 hose (Article no. 212734-910)
- SDR11 expansion head G 40 mm (Article no. 138463-001)
- Set of SDR11 compression jaws G 40 mm (1 1/2 in.) (Article no. 137964-002)
- G1/G2 Expansion kit 75 to 110 mm RAUTOOL G (Article no. 137825-001)

G1/G2 expansion kit

Use with the G1 or G2 tool (purchased separately) for assembling SDR11 compression-sleeve fittings in sizes 75 to 110 mm.

This expansion kit comes complete with the following:

- Pipe cutter for 50 to 125 mm (Article no. 137394-001)
- Transport case extension (Article no. 244561-001)
- SDR11 expansion head G 75 mm (Article no. 137584-001)
- SDR11 expansion head G 90 mm (Article no. 137604-001)
- SDR11 expansion head G 110 mm (Article no. 137614-001)
- Set of SDR11 compression jaws G 75 mm (Article no. 137644-001)

RAUTOOL G2 125 to 160 mm hydraulic tool kits

For assembling SDR11 compression-sleeve fittings in sizes 125 to 160 mm.

The G2 125/160 mm tool kit comes complete with the following:

- Li-ion 36V 2.6Ah MAKITA® BL3626, charger sold separately
- 2 hydraulic cylinders with hydraulic hose G2 125 to 160 mm
- Head assembly with 2 short locking pins
- 2 long locking pins
- Y-distributor with quick couplings G2 125 to 160 mm
- Pipe cutter for 110 to 160 mm
- Deburring tool
- Basic transport case
- Transport case extension
- Operating instructions
- SDR11 expansion head G 125 mm
- SDR11 expansion head G 160 mm
- Set of SDR11 compression jaws G 160 mm
- Set of reducers G 160/125 mm

Accessory items sold separately:

- Pipe lubricant (Article no. 128953-003)
- 120VAC charger DC36RA (Article no. 430556-001)
- G1/G2 140 mm Expansion Kit (Article no. 206259-001)

1. RAUGEO™ pipe

RAUGEO PEXa pipes are recognized by the International Ground Source Heat Pump Association's (IGSHPA) *Design and Installation Standards Guide* as an accepted piping system for ground loop heat exchangers. RAUGEO PEXa pipes are manufactured using the REHAU high-pressure peroxide method for crosslinked polyethylene (PEXa).

RAUGEO PEXa pipe has a co-extruded grey UV shield that protects the pipe against ultraviolet light (sunlight) for an extended time. All RAUGEO PEXa pipe meets or exceeds the requirements of ASTM F876, F877, CSA B137.5 and PPI TR-3. RAUGEO PEXa pipe is manufactured by REHAU in a plant using a quality management system that is certified to ISO 9001.

RAUGEO ground loops are certified to CSA C448 and are recognized by the International Ground Source Heat Pump Association's (IGSHPA) *Design and Installation Standards Guide* as an accepted piping system for ground loop heat exchangers.

See applicable REHAU technical documents for detailed temperature and pressure ratings.

RAUGEO 1 in. double u-bends

One RAUGEO double u-bend coil comes packaged as two single u-bend coils with attachment hardware. Each RAUGEO U-bend comprises RAUGEO PEXa UV shield pipe with reinforced resin u-bend tip. Custom coil lengths are available upon request and with an extended lead time.

RAUGEO 1 in. single u-bends

Each RAUGEO u-bend comprises RAUGEO PEXa UV shield pipe with reinforced resin u-bend tip. Custom coil lengths are available upon request and with an extended lead time.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
630376-224 ⁺	RAUGEO single u-bend PEXa 1 in. CTS 210 ft coil (420 ft)	1	35.8	78.9	1
630376-924 ⁺	RAUGEO single u-bend PEXa 1 in. CTS 260 ft coil (520 ft)	1	43.7	96.4	1
630376-324 ⁺	RAUGEO single u-bend PEXa 1 in. CTS 310 ft coil (620 ft)	1	51.6	113.8	1
630376-374 ⁺	RAUGEO single u-bend PEXa 1 in. CTS 360 ft coil (720 ft)	1	59.6	131.3	1

⁺This item is not stocked. Lead times may vary.

RAUGEO collect pipe

RAUGEO collect is RAUGEO PEXa UV shield pipe for horizontal ground loops and system distribution piping.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
235381-324 ⁺	RAUGEO collect 1 in. CTS (300 ft)	300 ft	23.7	52.2	1 coil
235381-524 ⁺	RAUGEO collect 1 in. CTS (500 ft)	500 ft	39.5	87.0	1 coil
235381-824 ⁺	RAUGEO collect 1 in. CTS (800 ft)	800 ft	63.2	139.2	1 coil
235391-524 ⁺	RAUGEO collect 1 1/4 in. CTS (500 ft)	500 ft	56.9	125.5	1 coil
235391-824 ⁺	RAUGEO collect 1 1/4 in. CTS (800 ft)	800 ft	87.8	193.69	1 coil

⁺This item is not stocked. Lead times may vary.

2. Installation accessories

RAUGEO u-bend vertical ground loop accessories

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
222858-001+	RAUGEO u-bend 1 in. CTS pipe spacer	5000	0.04	0.10	1 package

+This item is not stocked. Lead times may vary.

RAUGEO collect horizontal ground loop accessories

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
236127-001	PE protection sleeve for 1 in. pipe	50 ft/coil	1.70	3.60	1 coil
236137-001+	PE protection sleeve for 1 1/4 in. pipe	150 ft/coil	6.10	13.4	1 coil
266237-001	1 in. polymer support bend	50 pcs/box	0.10	0.22	1 box
266727-001	1 1/4 in. polymer support bend	50 pcs/box	0.20	0.44	1 box
253625-001	3/4 and 1 in. heat shrink – 3.3 ft (1 m)	35 pcs/bag	0.12	0.27	1 meter

+This item is not stocked. Lead times may vary.

RAUGEO installation accessories

Bulkhead seal provides a water resistant seal for pipe penetrations through foundation walls.

Article no.	Description	Package quantity	Unit weight		Minimum order
			kg	lb	
285561-001+	Bulkhead seal ID 0.75 to 1.1 in.	1	0.60	1.32	1
285571-001+	Bulkhead seal ID 1.25 to 1.56 in.	1	0.59	1.29	1

+This item is not stocked. Lead times may vary.

3. Distribution manifolds

PRO-BALANCE® 1 1/4 in. stainless steel manifold with gauges

Each PRO-BALANCE 1 1/4 in. manifold comes complete with the following:

- 1 1/4 in. NPT supply and return manifold isolation ball valves with thermometer sockets and flat gaskets (Article no. 343626-001)
- Two 1 1/4 in. BSPP end caps with gaskets (Article no. 343631-001)
- Visual flow gauges (0 to 4 GPM) on supply side (Article no. 343625-001)
- Circuit balancing/isolation valves on return side (Article no. 316254-002)
- Mounting brackets (v 261396-001)
- Vent key, mounting hardware, installation instructions and manifold circuit chart

Article no.	Stations	Manifold length		Package quantity	Unit weight		Minimum order
		cm	in		kg	lb	
343373-001	2	19.0	12.20	1	4.39	9.68	1

HKV 1 1/4 in. brass manifolds

HKV 1 1/4 in. manifolds are for use in distributing and regulating the volume of flow in geothermal applications. HKV manifolds may be used with a variety of system fluids including propylene glycol, ethylene-based glycols and alcohol-based glycols. Manifolds are equipped with supply/shutoff valves and circuit balancing isolation valves which allow individual complete circuit isolation.

Pre-assembled and factory pressure-tested, these manifolds are for use with 1 in. RAUGEO pipe using REHAU manifold connections (sold separately).

Each HKV 1 1/4 in. manifold comes complete with the following:

- 1 1/4 in. NPT supply and return manifold isolation ball valves with thermometer sockets and flat gaskets
- Two 1 1/4 in. BSPP brass end caps with gaskets
- Isolation valves on supply side
- Circuit balancing/isolation valves on return side
- Mounting brackets, four drywall screws, vent key, installation instructions and manifold circuit chart

Compatible with manifold valve actuator (Article no. 260166-002). May be mounted in any orientation (e.g., inverted, horizontal). Mini thermometers (Article no. 250218-001) are sold separately.

Warranty

REHAU stands behind our products with a 25-year limited warranty on PEXa pipe and fittings.
www.na.rehau.com/warranties

Return policy

Each return will be reviewed individually. No material may be returned without our written permission and return authorization number. Only standard articles sold within the previous 12 months may be returned, no returns will be accepted for non-standard articles. No returns for custom-cut lengths of pre-insulated pipes. The minimum return value is be \$100 USD. Product must be received in original packaging and articles must be in saleable condition, all products returned to the distribution center are subject to quality inspection. Packages must have original labels, customer label must be removed prior to return. Any material which is authorized to be returned will be subject to a minimum twenty-five (25) percent restocking fee.
