

High Efficiency Condensing Unit Heater for Commercial, Industrial & Residential Comfort

REZNOR®

Model UEZ

**Ultimate efficiency,
aesthetics, durability,
and cleanliness**

INDUSTRIAL APPLICATIONS

- Warehouses
- Dock Door Areas
- Factories

COMMERCIAL APPLICATIONS

- Retail
- Dealerships
- Vehicle Repair Shops
- Transportation Terminals

AGRICULTURAL-HORTICULTURAL APPLICATIONS

- Greenhouses

RESIDENTIAL APPLICATIONS

- Workshops
- Garages

Why Choose Reznor?

With over 130 years' experience in gas heating and air conditioning, Reznor manufactures a wide range of industrial and commercial HVAC solutions. Technological development and innovation have been the hallmarks of Reznor® products. As a result of our pioneering role in heating, makeup air and ventilating equipment, our products are the most advanced in engineering design to satisfy a multitude of applications.

ULTIMATE EFFICIENCY

Model UEZ Advantages:

- **Industry-leading energy efficiency** – up to 93%-unit efficiency and uses up to three times less electricity than competitor models
- **Environmentally-friendly** – improves overall energy performance and contributes to compliance with LEED green building rating system
- **Easy to install, operate and maintain** – lowest clearances in the industry
- **Improved indoor air quality** – separated combustion eliminates contaminants, negative building pressure, and wind
- **Consistent, reliable operation** – engineered with decades of unit heating expertise and built with durable components
- **Aesthetically-pleasing** – coordinates with a multitude of space designs and sizes

Field-Installed Options:

- Vertical and horizontal vent assemblies
- Integrated vertical louvers and downturn nozzles
- Manual gas shutoff valve
- Hanger kits
- Single-stage thermostat
- Multiple unit control (up to five units)

Model UEZ Features:

- **91–93% thermal efficiency** achieved through secondary heat exchanger
- **Seven sizes** from 55,000–310,000 BTUh
- Natural gas (propane conversion kit included)
- TCore3™ 409 stainless steel primary heat exchanger for models 130-310
- MacroChannel® design on secondary heat exchanger for models 130-310
- **Sealed control compartment** houses all electrical components
- **Integrated circuit board** with seven-segment display and external status LED
- **Removable front face** and three-tone **scratch-resistant paint** on cabinet
- **Hinged access door** panel with quarter-turn latch
- **External terminal strip** for 24V wiring and built-in disconnect switch
- **Four-point suspension** standard (sizes 055–110 may also use two-point suspension)
- **Patented single burner combustion system** including one-piece burner assembly
