

# SmartTool™

## & SmartClip™ Fastening System

For fast, uniform layout of PEX to a wire grid with foamboard base

Easy top-loading SmartClip magazine

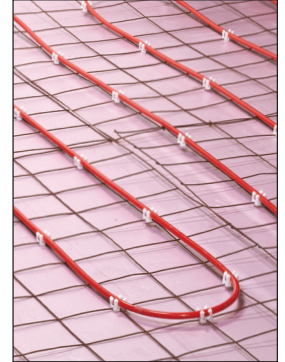

Use the SmartTool standing comfortably

SmartClip is design for a secure 4 point wire connection

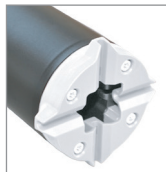

Protective plastic-to-plastic PEX connections

Uniform layout ensures even radiant heating surface.

## 80% Faster - 100% Smarter

**SM1**  
SmartTool™

**SM2**  
SmartClip™

- One-person operation is 80% faster than traditional methods.
- SmartClips™ are installed with the aid of an easy-to-use, top loading, magazine fed SmartTool™ Stapler.
- The ergonomic SmartTool™ attaches SmartClips™ to the wire grid from a standing position to save knees and back.
- Installed SmartClips™ lift the PEX tubing from the wire to allow thorough concrete encasement and coverage.
- The PEX is also installed from an easy standing position by pressing into place with one foot while distributing the tubing along the clip layout.
- Plastic-to-plastic connections eliminate risk of fastener corrosion or abrasion of PEX.
- Straighter, more uniform layout of PEX is assured with this smart fastening system.
