

SAVE SPACE AND TIME WITH THE TANDEM AFCI

Tandem Combination Arc Fault Circuit Interrupter

Feed two separate circuits from one position. Siemens new Tandem AFCI circuit technology fits new or existing construction and is NEC® 210.12 compliant.

Minimizes the need for sub-feeding panels and saves space in a load center

Ease of troubleshooting with LED trip indicators

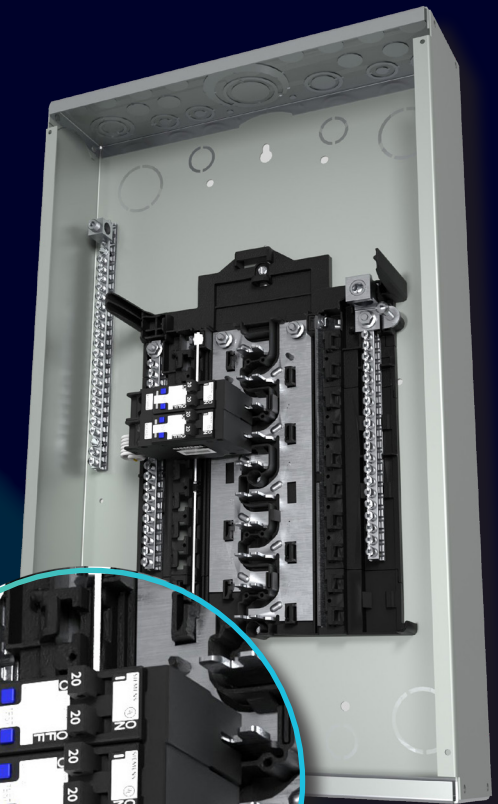

Equipped with lug wire indicator flags - showing when load wires are correctly inserted

Available in pigtail and Plug-On Neutral types

Traditional pigtail style meets extension or modification requirements for legacy or Murray load centers
