# Truly smart combustion measurement.

The new testo 300 Smoke Edition combustion analyzer with smart-touch technology.

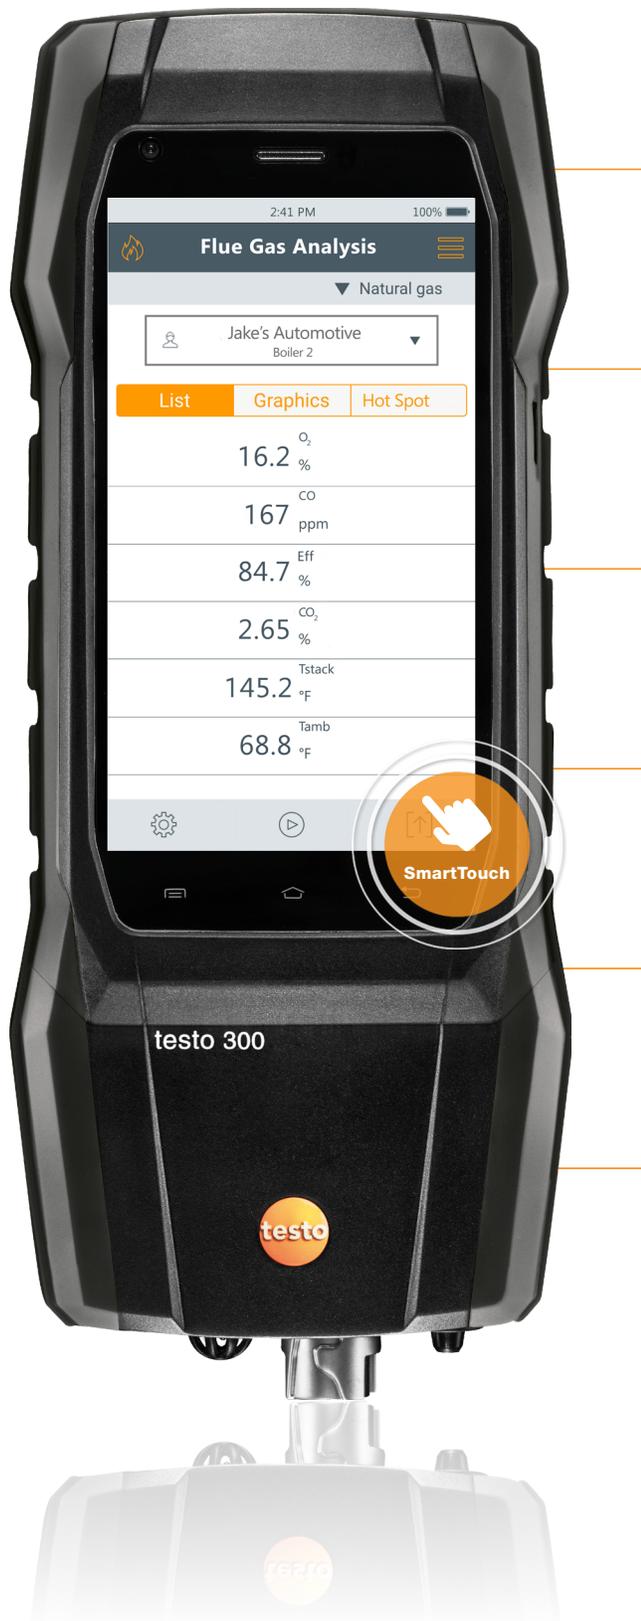

## Welcome to the Smart World of Testo.

In the smart world of today, a combustion analyzer needs to do much more than provide reliably accurate results. Key to technician efficiency is an instrument that performs before and after taking a measurement to ensure speed and accuracy through an intuitive interface designed to make work easier.

The user-friendly and highly efficient testo 300 was developed with this objective in mind. It is not just decades of experience in measuring technology. With smart-touch operation, robust construction and e-mailing of reports, the testo 300 will quickly become your indispensable companion for all measuring tasks involving heating.

# Truly efficient: **The advantages.**

### Operation via smart-touch

The smart-touch display responds immediately without any delay. That allows intuitive operation – just as easy as on your smartphone.

### E-mailing of reports

The testo 300 enables the convenient creation of documentation directly on site, and the dictation function even saves you typing in the process. You can send reports to the office or customers straight away via Wi-Fi.

### Keep an eye on all the measuring values

You can see all the system's parameters right away on the large 5" HD display.

### Get the result faster

Clearly structured menus for all relevant measurements are already stored in the measuring instrument and guide you efficiently through the application.

### Ready to use right away

No more waiting time. In standby mode, the testo 300 is ready to measure at the touch of a button.

### Completely worry-free

The testo 300 has quality sensor technology, measures high CO values up to 30,000 ppm and comes standard with the longest warranty in the industry.

# Truly robust: The construction.

Smart measuring technology is of little benefit if it can't keep going in tough day-to-day working conditions, because your measuring instrument is a partner that supports you every day in the efficient, problem-free performance of your tasks. This is precisely why the testo 300 has a particularly resilient and high-quality construction.

### Protected display

Scratch-resistant, recessed and with a special replaceable protective film.

### Secure mounting

4 strong magnets with rubber coating – particularly material friendly.

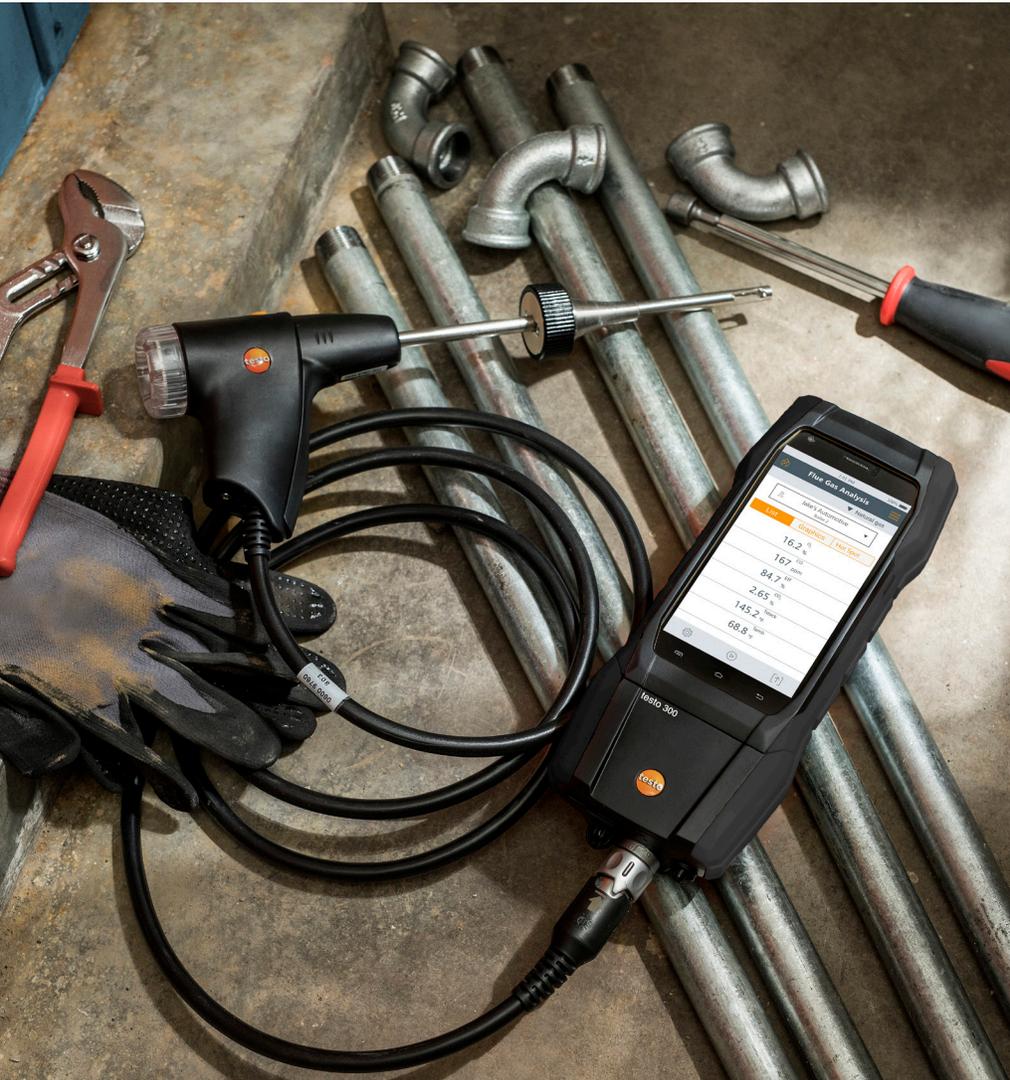

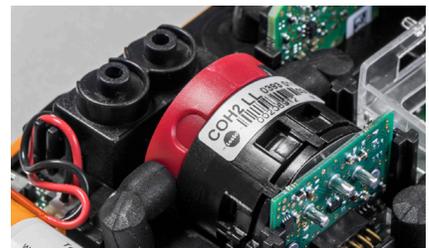

### Bolted housing

For that extra degree of stability when it really matters.

### Robust sensors

Optional: extremely durable O<sub>2</sub> sensor and automatic dilution up to 30,000 ppm CO.

# Truly flexible: Instrument configuration and probe system.

## A combustion analyzer perfectly tailored to your needs

The testo 300 doesn't just give you smart operation – the configuration also has that certain something. This means you can choose between a 2-year and 4-year warranty for the sensor technology. In addition to O<sub>2</sub> and CO, you can also add a third sensor slot for the measurement of NO<sub>x</sub> as an option. Various kits with special instrument configurations and individual accessories are available, specifically tailored to the requirements of your individual application.

## Versatile probes – quickly changed

### One handle for a variety of probes

A variety of probe shafts can easily be attached to the multi-functional handle. This ensures you enjoy a high level of flexibility in all applications. And you are ready to measure even more quickly, thanks to connection via a universal plug.

### Proven probes

You can use the testo 320, testo 330 and testo 330-1/-2 LL probes with their practical multiple plug for the testo 300 as well.

### New probes

New probes with anti-rotation USB C connection are available for temperature measurement, for example of flow and return temperatures, along with ambient CO measurement.

## testo interface function

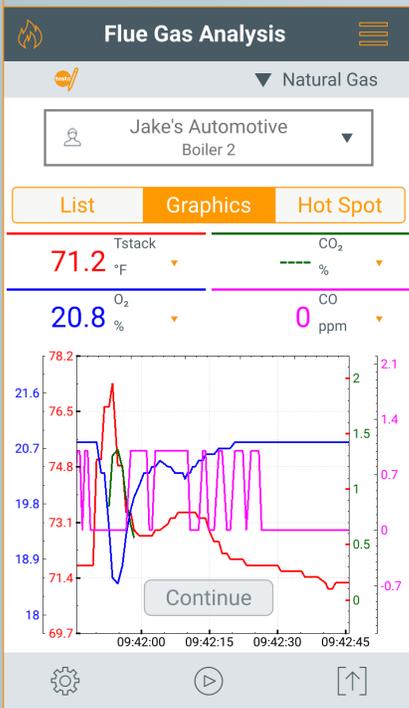

The testo 300 provides an interface with a variety of industry software. This enables you to access the testo 300's readings with your terminal devices and tools and to document them or further process them in your industry software.

# Truly intuitive: **The menus.**

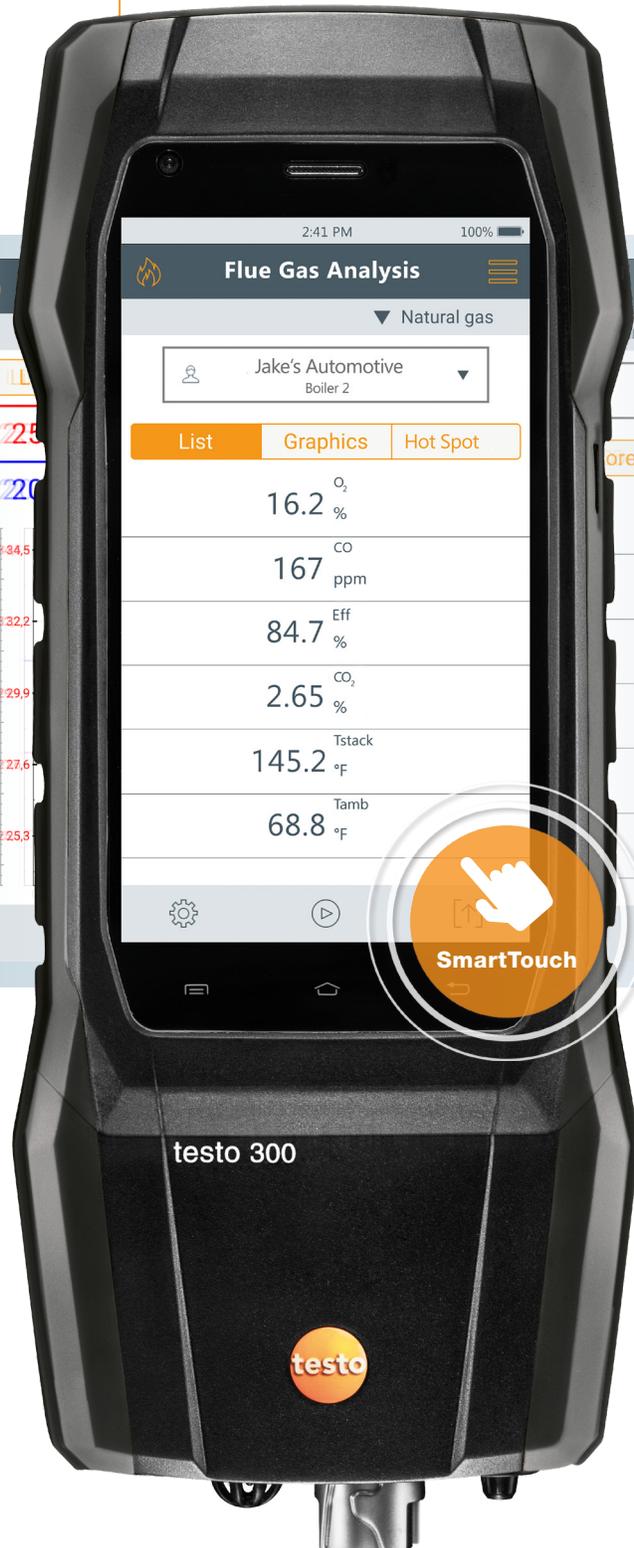

## Flue gas values as a graphic

See all the readings in a graphic progression display – and identify, for instance, how the flue gas loss relates to the CO value.

## Smart tracking of flue gas values

All the relevant values at a glance. The display can be individually configured and can easily be enlarged using the zoom-in function.

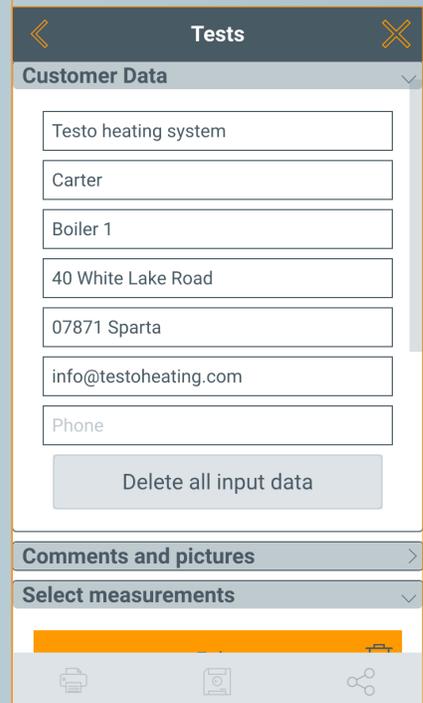

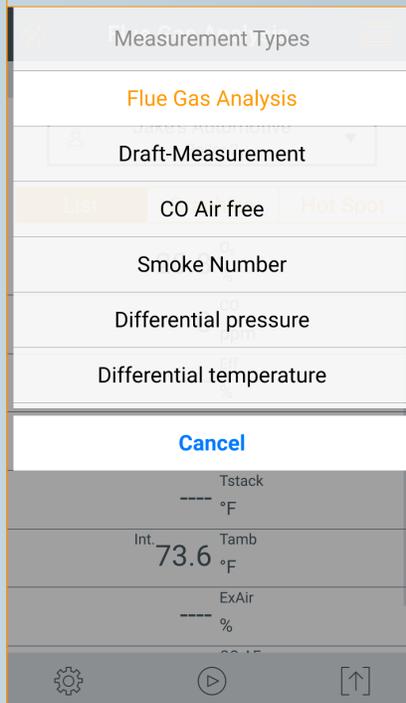

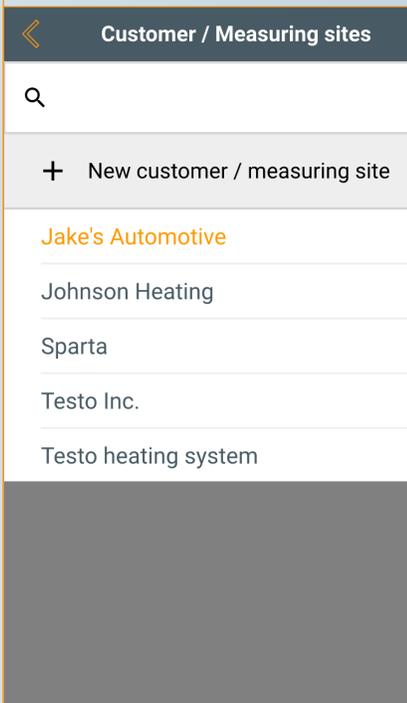

### Customer / measuring site

Integrated address book with details of the relevant heating system (e.g. manufacturer, system type, system name, serial no., fuel, etc.).

### Professional documentation

Create measurements with all the information about readings, customers and heating systems directly on site, add comments to them, have the measurements confirmed by the customer's signature and send the tests. You can also store your company logo. All PDF reports with all the important information are also saved in the instrument so that they are always readily available.

### Intuitive measurement menus

Clearly structured and explicit menus for all applications involving heating systems are already stored in the testo 300. This allows you to do your jobs even more efficiently.
