VICARE APP

Vitoconnect OPTO2 with connections for the power supply adaptor and data connection via USB.

Stay WiFi connected, comfortable and in control with Vitoconnect and ViCare App.
The ViCare app and WiFi-ready Vitoconnect are designed to save time, money and energy with remote Internet connectivity and automatic operation. ViCare and Vitoconnect allow smartphone and tablet users to easily monitor and program their Viessmann boiler and stay in control anytime, anywhere
via the Internet.

Through simple programming with the ViCare app, users automatically save money on their heating costs and can see their savings in real time.

Automatically save energy
The system is designed to control and regulate your heating circuits. Swipe to the right or left to set the desired room temperature. With a touch you can change between "Normal" and "Party" (heating stays on for a longer time) mode.

When leaving the house ("Away"), lower the temperature so you can save energy and money, with one click. You can select different operating times for each day through the "Heating Schedule" feature to customize your heating system to your preferences.

A separate button on the home screen gives you plenty of energy saving tips.

System status at a glance
You can easily see if your heating operation is performing as intended. A yellow screen indicates maintenance is required. If the screen is red, your heating contractor's contact information will be displayed so you can conveniently connect with them.

WiFi Module Vitoconnect OPTO2
The WiFi-Module Vitoconnect is connected directly to the Vitotronic control console. At only 4 inches in size, the adapter is designed to be easily wall mounted.

The Module is connected to your local DSL-Router and registered via a simple plug and play procedure. To connect it to your ViCare app, simply scan the QR code that is included with the Module. The Vitoconnect is compatible with mobile devices operating on the iOS and Android operating systems. The free Viessmann ViCare app is available through the Apple® App Store and Google® Play.

ViCare compatibility with Viessmann boilers
The Vitoconnect OPTO2 module is available for purchase as an add-on feature for all Vitodens 200, Vitodens 222 and Vitocrossal 300, CU3A gas condensing boilers and Vitoligno 300-C wood biomass boilers. The Vitoconnect module is compatible with Viessmann wall hung, compact units and floor standing boilers with Vitotronic 200 and 300 controls with Ethernet connection, as well as solid fuel boilers with Ecotronic and system software version 2.12. For supported controls please see section Supported Controls.

ViCare controls the boiler function by connecting to the WiFi Module Vitoconnect OPTO2 via the building's existing DSL Router.

Comfort at a glance

- Easy to see the entire boiler operation
- Green means everything is operating correctly
- Yellow means upcoming maintenance required
- Red indicates assistance required from your heating contractor

Save on heating costs

- Program your boiler for ideal temperature and maximum cost savings
- Automatically save on heating costs
- Control at your fingertips

Customize your heating schedule

- Set it and forget it: Program your heating schedule to suit your individual preferences and lifestyle
