1 1/2" PVC or ABS

**WATCO Innovator™ Bath
Waste Series Overflow
Assembly creates a
water-tight seal.**

**Requires no tools to
install, just hands.**

Wide range of finishes.

Always A Step Ahead

The INNOVATOR™ Advantages

- Eliminates all screws
- Eliminates need for expensive test plug (591 Series requires a low-cost separate plug)
- Eliminates possible leaks due to loose overflow attachment
- Eliminates dual inventory of one- and two-hole overflow plates
- Eliminates labor

How the WATCO Innovator™ Series works

Overflow, without face plate, showing the built-in test cover (591 requires separate plug) and the star nut tightly threaded onto the overflow elbow pipe, which holds the overflow to the tub.

After the leak test is performed, the built-in vinyl test cover (or separate plug for the 591) is removed from the overflow opening.

The overflow face plate is then snapped onto the specially designed points of the star nut. No time-consuming screws are needed! It's a great patent-pending design to simplify a better bath waste installation.

All models come with plastic strainer body test plug. After use, plug is easily replaced by stopper.

Available options:

Half-Kit – Without the Pipe and Tee

Rough-In (RI) & Stopper/Faceplate (SF) boxed separately at no extra charge

Trim Kits (Stopper, Faceplate & Strainer Body) in a wide range of finishes
