

## Lead-free Hydrants

### Commercial and Light Commercial Applications

The Federal Reduction of Lead in Drinking Water Act requires that any valve, fitting, or fixture coming in contact with potable water must be considered lead-free. Dedicated to water safety, Zurn exceeds federal requirements by offering lead-free hydrants in commonly overlooked potable water sources such as amusement parks, marinas, campgrounds, schools, playgrounds, and residential areas.

## Features and Benefits

### Water Safety

- Federal Reduction of Lead in Drinking Water Act compliant, safeguarding users against toxic contamination
- Ceramic hydrants with integral backflow preventer protects potable water from back siphonage

### Labor Savings

- Round body design of patented –EZ hydrants allow core-drilling to eliminate costly rework to damaged walls
- Use Z1320XL-EZ with hydrant box designed to fit one modular brick space for a time saving installation

### Extended Selection

- Available half-turn ceramic disc cartridge that lasts longer, reduces maintenance, and eliminates leaks
- Choose moderate climate or non-freeze hydrants to meet your commercial and residential needs
- Largest lead-free hydrant offering for wall, roof, ground, and yard applications
