Enhanced Design and Quality: Z6930-XL Model

- The new Z6930-XL model transforms the Zurn family of sensor faucets with a fresh, smooth, and uninterrupted exterior design.
- The new slim line aerators and sensor lens are hidden from view, reducing potential theft and vandalism while adding to the smooth design.
- In the event that the sensor lens wears out or becomes damaged, the lens itself is offered as an affordable replacement part, easily repaired in the field.

Self Sustaining and Water Conserving

- Zurn E-Z Sensor Faucets have the option of adding the hydro-generator adaptor, providing up to 10+ years of battery life.
- All E-Z sensor models are available with low-flow options, down to 0.35 gallons per minute.
- Guard against potential flooding with the automatic sensor time-out feature. A power down occurs after 30 seconds even if an object is in the sensor detection area.

Labor Savings and Versatility

- Zurn E-Z sensor faucets are quick and easy to install with electrical and below-deck components mounted in-line with the shank of the spout, eliminating additional mounting hardware.
- Zurn offers several models in a lead-free compliant version designated by the -XL suffix to coincide with the safe drinking water act legislation.
- Multiple power options are available: battery-operated, hardwired, or plug-in.
- Zurn E-Z Sensor Faucets are versatile to meet the needs of every commercial application.

AquaSense® Accessories

Options

Flow Control Options

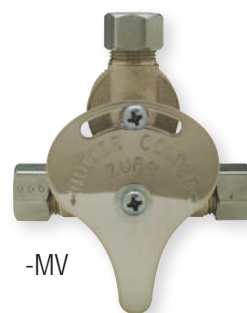

- F 0.5 gpm/1.9 Lpm vandal-resistant non-aerated
- J 1.5 gpm/ 5.7 Lpm vandal-resistant laminar flow
- K 1.0 gpm/ 3.8 Lpm vandal-resistant laminar flow
- L 1.0 gpm/ 3.8 Lpm vandal-resistant aerator
- M 0.35 gpm/1.3 Lpm vandal-resistant non-aerated

Power Supply Choices (sold separately)

- ACA 6 VDC plug-in power converter
- HW6 Hardwired power converter
- GEN Hydro-generator retrofit kit (1.0 and 1.5 gpm only)

Accessories

- CP4 Cover plate 4" [102] centers
- CP8 Cover plate 8" [203] centers
- MV Temperature mixing valve
- SH Supply hoses for mixing valve
- TMV Thermostatic mixing valve for multiple faucets
- TMV-1 Thermostatic mixing valve for single faucets

AquaSense® E-Z Sensor Faucets

New Product Development and Importance of Voice of the Customer

Zurn recognizes the changing needs of our customers. Our goal is to deliver high quality, proven performance products that surpass life-cycle expectations. Continuous improvement and confidence in the voice of the customer are key factors to Zurn Engineered Water Solutions®.

The Zurn AquaSense E-Z Sensor Faucet has been a trusted commercial fixture for over 15 years. As technology enhancements and environmental conditions evolve, Zurn has expanded efforts in design, research, and collection of customer opinions. The result – an

Engineer

- **Durability**

All cast brass spout design and consistent mounting hardware on all Zurn sensor faucet products.

- **Reliability**

Zurn customers have come to expect consistency and simplicity with our state-of-the-art electronics and installation process.

Contractor

- **Ease of Installation**

The new Z6930-XL installs exactly the same as the current Zurn E-Z faucet offering. The spout mounts above deck, with the below deck electronic box mounting in-line with the shank of the spout faucet. Everything assembles in line with the faucet spout.

- **Warranty**

The Z6930-XL E-Z Sensor Faucet boasts a 5-year warranty while all other E-Z sensor faucets include a 3-year warranty.

Architect

- **Design**

Smooth, crisp designs that are more modern and suitable for any commercial application.

- **Sustainability**

The optional hydro generator kit utilizes turbine technology converting water usage into power-charging energy – extending the battery life to 10+ years.

Building Owner

- **Ease of Maintenance**

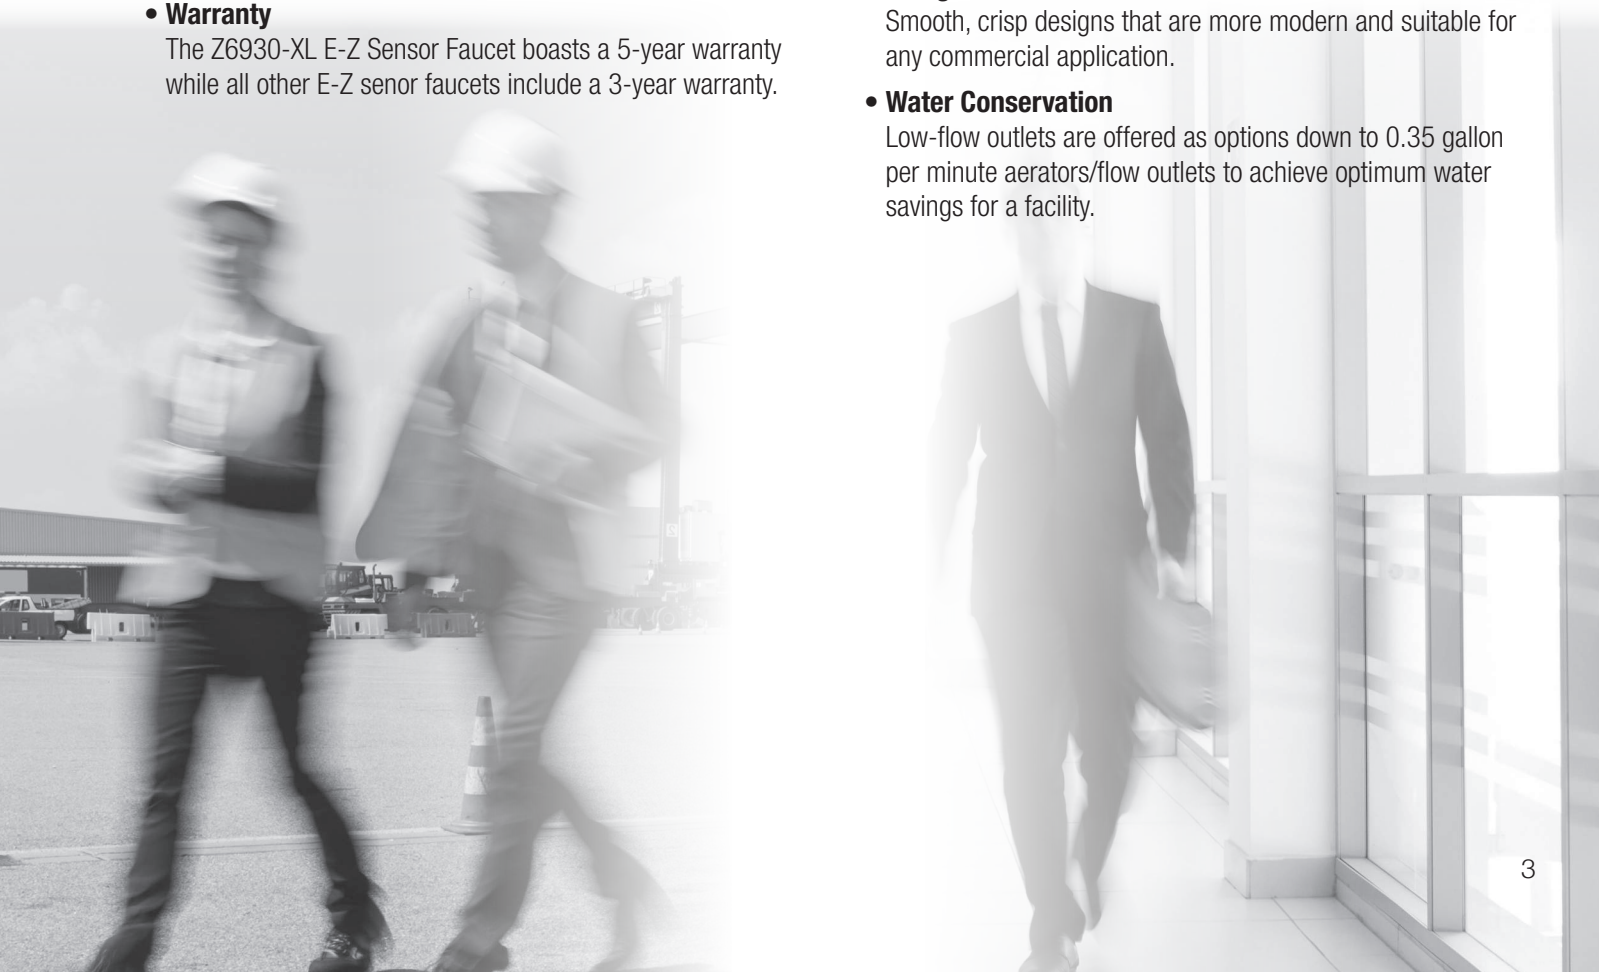

Zurn E-Z Sensor Faucets reduce power consumption through state-of-the-art electronic modules. Customers have recognized savings from an average 3-year battery life to nearly 4 years for most applications.

- **Design**

Smooth, crisp designs that are more modern and suitable for any commercial application.

- **Water Conservation**

Low-flow outlets are offered as options down to 0.35 gallon per minute aerators/flow outlets to achieve optimum water savings for a facility.

AquaSense® E-Z Sensor Faucets Applications

Healthcare

Healthcare is one of the fastest growing new and retrofit construction industries in the commercial sector. Hospitals and healthcare facilities need hygienic and bacteria preventative products to ensure optimum patient care. Zurn Sensor Faucets are hands-free, sensor activated products that eliminate the likelihood of transferring germs and bacteria. Zurn also offers lead-free sensor faucet models to further promote the health and safety of users in the healthcare industry.

Education

Schools and universities are one of the most at-risk commercial segments for passing along germs, bacteria, and illnesses. Converting to hands-free sensor operated products, such as Zurn E-Z Sensor Faucets, greatly reduces the chances of infectious bacteria from being spread from student to student.

High Profile Office Space

Commercial office space is the ideal market for both new and retrofit construction. The conversion from manual operated products to sensor is becoming more relevant. As high profile offices renovate and build new facilities, it is important to offer modernistic designs of products, such as sensor faucets, and the promotion of hands-free sanitation is preferred.

Transportation

Airports, train stations, and bus stations are just three examples of high traffic environments where germs and bacteria love to spread. Specifying and installing sensor plumbing products in high traffic environments greatly mitigates health risks with respect to spreading germs. Zurn Hardwired Sensor Faucets are ideal for high volume transportation facilities to save on maintenance costs of replacing batteries and ensuring that products remain functioning for the end user.
