

# Steps for Printing Your YOR Health eGift Card

(for Mail or Hand-Delivery)

It's easy to print your own professional-looking eGift Card.  
The resulting printout may be presented as a gift to your recipient..

## Things you will need:

+ Standard printer  
(color or black/white ink)

+ 8 ½ x 11 sheet of  
paper or cardstock

+ Packaging and wrapping  
materials (optional)

### 1 DOWNLOAD

Download a copy of the eGift Card. Save it to a specified location that is easy to find.

### 2 PREPARE TO PRINT

When you are ready to print, locate and open the copy of the eGift Card that you saved. Make sure you have added your paper of choice to the printer.

### 3 PRINT

Follow your computer's print instructions. Most standard office and household printers are equipped to print eGift Cards. Colored ink will look best, but black/white ink is okay, too. Click Print.

### 4 FOLD IN HALF (long edge first)

Fold the printed sheet in half along the long edge first so the picture is on the front.

### 5 FOLD AGAIN (short edge)

Fold once more so your message and the card code are on the inside.

### 6 THAT'S IT!

Prepare the card for gifting however you desire. Your eGift Card is now ready to mail or hand-deliver.
