However, its recommended that you install only the latest version. How to install Java for WindowsFollowing is the steps for JDK 8 free download for 32 bit or JDK 8 download 64 bit and installation Step 1) Go to link. Click JDK Download for java JDK 8 download. Step 2) Next, Accept License License Charge Java 8 JDK for your version 32 bit or JDK 8 download for windows 10 64 bit. Step 3) When click on the installation link the popup will be open. Click I reviewed and accept the Oracle Technology Network License Agreement for Oracle Java SE to redirect you to the sign-in page. If you don't have an oracle account, you can easily sign up by adding the basics details of yours. Step 4) When the Java JDK 8 download is complete, run the exe to install JDK. Click Next Step 5) Select the PATH to install Java in Windows and click next. Step 6) After installing Java in windows, click Close How to set environment variables in Java: Path and ClasspathThe PATH variable PATH provides the location of executables such as javac, java, etc. It is possible to run a program without specifying PATH but you will need to provide full path of executable scans such as C:\Program Files\Java\jdk-13.0.1\bin\javac A.java instead of simple javac A.java CLASSPATH variable makes room for Library Files. Let's look into the steps to set up PATH and CLASSPATH Step 1) Right click On My Computer and Select Properties Step 2) Click Advanced System Settings Step 3) Click Environment Variables Step 4) Click new user variables button Step 5) Type PATH in variable name. Step 6) Copy the path to the bin folder that is installed in the JDK folder. Step 7) Paste bin folder path into Variable Value and click OK Button. Note: In case you already have a PATH variable created in your PC, edit the PATH variable to PATH = <JDK installation= directory=>\bin;%PATH%; Here, %PATH% appends the existing path variable to our new value Step 8) You can follow a similar process to specify CLASSPATH. Note: In case you java installation does not work after installation, change classpath to CLASSPATH = <JDK installation= directory=>\lib\tools.jar; Step 9) Click the OK button Step 10) Go to the command prompt and type javac commands.
