## Dbx venue 360 manual pdf

The control app for all 4 major OSes dbx took the flagship Driverac® 260, improved its features, added more. result? 3 input, 6 output driversc venu360. VENU360 provides all the processing and flexibility required between your mixers and amplifiers to customize and protect your loudspeakers. With the latest advances in Ethernet control through DBX's proprietary AutoIQ™ and AFS™ algorithms, additional input channels, an Android, iOS, Mac or Windows® devices and updated wizards, Driverac VENU360 continues the driver's legacy of great-sounding, powerful and affordable loudspeaker management processors for a new generation. AutoIQ™ new, improved AutoIQ algorithm ensures a highly accurate, fast and non-intrusive automated EQ experience. With an RTA mic listening in your room, the updated Driverac Venu360 AutoIQ algorithm automatically sets the speaker level and room EQ in a matter of seconds using sign sweep. This means that adjustments in the room can now be made very quickly, without subjecting viewers to long broadcasts of annoying, pink noise. AutoIQ is now located in the output processing phase, which means independent sections of the system can be automatically equalized. This allows autoEQ foh system as well as platform monitors, areas and tower delays to be used on! Enhanced AFS™ enhanced AFS™ algorithms to eradicate faster, more accurate response, without adversely affecting the tone of your system. Nothing is turned away to the audience like annoying and potentially painful audio reaction. Fortunately, DBX engineers have revisited their already stellar advanced response suppression algorithms and made it work even better. Driverac listens to VENU360 and anticipates feedback and never even has a chance to have a chance while automatically removing it. Updated Wizard Setup function updated wizards make the initial set up easier, while ensuring speaker tuning and other settings are up-to-date. Wizard tasks in Driverac VENU360 guide you through easy, step-by-step processes to help you get the most out of your loudspeaker system. Wizards help you configure routing, level balancing, autoiq, advanced response suppression, and provide access to updated speaker tuning available for most major speaker brands. The addition of a monitor wizard makes it easy to configure and optimize platform monitors. Mobile Control connect to DriverAc VENU360 through your local network with your Android, iOS, Mac or Windows device to customize the sound of your loudspeaker system so it feels and performs better. The app allows you directly with compressor, graphic EQ, parametric EQ, crossover settings, speaker profiles and its attractive, easy-to-use graphical user interface Lets.
