# Contents

**1 Introduction** **11**
- 1.1 A very brief introduction . . . 11
- 1.2 Why study statistics? . . . 11
- 1.3 What is statistics? What are statistics? . . . 12
- 1.4 Sample and population . . . 13
- 1.5 Data types and Levels of Measurement . . . 14
- 1.6 The Levels of Measurement . . . 15
- 1.7 Chapter 1 questions . . . 17

**2 Presenting data** **18**
- 2.1 Organising data . . . 18
- 2.2 Building a frequency distribution . . . 18
- 2.3 Adjusting classes to close gaps . . . 21
- 2.4 Plotting the histogram . . . 21
- 2.5 Plotting a cumulative frequency graph . . . 23
- 2.6 The Box and Whisker plot . . . 24
- 2.7 Stem & Leaf diagram . . . 25
- 2.8 Chapter 2 questions . . . 26
- 2.9 Chapter 2 tutorial questions . . . 28

**3 Measures of location and spread** **29**
- 3.1 Measures of data centre . . . 29
- 3.2 Measures of spread . . . 30
  - 3.2.1 Variance & Standard Deviation . . . 31
  - 3.2.2 Inter Quartile Range (IQR) . . . 33
- 3.3 Standard Deviation in context . . . 36
  - 3.3.1 The Empirical Law . . . 36
  - 3.3.2 Chebychev's Inequality . . . 37
  - 3.3.3 Z scores . . . 38
  - 3.3.4 Detecting outliers . . . 39
- 3.4 Measures of skew . . . 40
  - 3.4.1 Pearson's coefficient of skew . . . 41
  - 3.4.2 Software coefficient of skew . . . 41
- 3.5 Chapter 3 questions . . . 43
- 3.6 Chapter 3 tutorial questions . . . 46

**4 Classical probability** **47**
- 4.1 Introduction . . . 47
- 4.2 Ways to assign probability . . . 48
  - 4.2.1 Classical probabilities . . . 48

4.2.2 Empirical probability . . . 49
4.2.3 Subjective probability . . . 49
4.3 Rules of addition: *OR* . . . 49
4.3.1 Mutual exclusivity: *The special rule of addition* . . . 49
4.3.2 Compliment rule . . . 50
4.3.3 Not mutually exclusive: *The general rule of addition* . . . 50
4.4 Rules of multiplication: *AND* . . . 51
4.4.1 Independence: *The special rule of multiplication* . . . 51
4.4.2 Not independent: *The general rule of multiplication* . . . 52
4.5 Conditional probability . . . 53
4.5.1 General rule for conditional probability . . . 54
4.6 Tree diagrams . . . 55
4.7 Chapter 4 questions . . . 57
4.8 Chapter 4 tutorial questions . . . 59

**5 DRV: Discrete random variables 60**
5.1 General DRV . . . 60
5.2 Specific DRV's namely: Binomial & Poisson . . . 62
5.2.1 The binomially distributed DRV . . . 62
5.2.2 The Poisson distributed DRV . . . 65
5.2.3 The Poisson probability formula . . . 68
5.3 Chapter 5 questions . . . 72
5.4 Chapter 5 tutorial questions . . . 73

**6 The Normal Distribution 75**
6.1 What is the Normal Distribution? . . . 76
6.2 The Normal Probability Density Function . . . 76
6.3 Calculating normal probabilities . . . 78
6.3.1 Calculating probabilities for given data values . . . 78
6.3.2 Reverse-Lookup: Finding a data value for a given probability . . . 79
6.4 The Central Limit Theorem (CLT) . . . 81
6.4.1 What is a sampling distribution? . . . 82
6.5 Calculating probability for sample means and proportions . . . 84
6.6 Chapter 6 questions . . . 87
6.7 Chapter 6 tutorial questions . . . 88

**7 In Brief: Sampling distributions and sampling methods 90**
7.1 Sampling distribution . . . 90
7.1.1 Student's t-distribution . . . 91
7.1.2 Sampling distributions and hypothesis testing . . . 92
7.2 Sampling methods . . . 92
7.2.1 Probabilistic sampling methods . . . 93
7.2.2 Comments . . . 93
7.2.3 Sampling errors . . . 94
7.3 Chapter 7: CLT probability questions . . . 98
7.4 Chapter 7: Basic sampling method questions . . . 99

**8 Parameter estimation: Confidence intervals for means and proportions 100**
8.1 Diagrammatic explanation of confidence intervals . . . 101
8.1.1 Using $z$ or $t$ distributions for estimating the mean . . . 102
8.1.2 Degrees of freedom . . . 102

8.2 Formulae for confidence intervals to estimate mean . . . 103
8.3 Formulae for confidence intervals to estimate proportion . . . 104
8.4 Finding the sample size to control the width of the CI . . . 105
8.5 Chapter 8 questions . . . 107
8.6 Chapter 8 tutorial questions . . . 108

**9 Hypothesis testing: Single sample tests for means and proportions 109**
9.1 The types of hypotheses . . . 110
9.2 Explaining hypothesis testing for the mean . . . 111
9.3 Hypothesis testing steps . . . 113
9.4 Hypotheses tests for means using the t-distribution . . . 115
9.5 Hypothesis tests for proportions . . . 116
9.6 Type I and II errors . . . 118
9.6.1 Type I and II examples . . . 121
9.7 Chapter 9 questions . . . 124
9.8 Chapter 9 tutorial questions . . . 126

**10 Two sample hypothesis tests for means and proportions 127**
10.1 Testing a difference between two means from independent samples . . . 127
10.1.1 Conditions for using the t-distribution . . . 129
10.2 Testing for differences in proportions from independent samples . . . 131
10.3 Paired t-test for dependent samples . . . 132
10.4 Chapter 10 questions . . . 136
10.5 Chapter 10 tutorial questions . . . 138

**11 Chi-Squared tests 139**
11.1 Goodness of fit tests . . . 140
11.2 Testing for independence . . . 142
11.3 Comments on Chi-squared tests . . . 144
11.4 Chapter 11 questions . . . 146
11.5 Chapter 11 tutorial questions . . . 149

**12 F-Tests & ANOVA: Single Factor Analysis of variance 150**
12.1 F-Test for equality of variance . . . 150
12.2 ANOVA: Single factor Analysis of variance . . . 153
12.3 The ANOVA calculations . . . 154
12.3.1 Putting it all together: The hypothesis test procedure . . . 159
12.3.2 Which group means are significantly different? . . . 160
12.4 The assumptions behind ANOVA . . . 162
12.5 Chapter 12 questions . . . 163
12.6 Chapter 12 tutorial questions . . . 165

**13 Correlation and linear regression 166**
13.1 Simple linear regression & correlation . . . 166
13.2 Product Moment Correlation Coefficient (PMCC) . . . 166
13.3 Observing correlation . . . 168
13.4 Spearman's Rank Correlation Coefficient SRCC . . . 170
13.5 Testing the significance of the correlation coefficients . . . 171
13.6 The Least Squares Regression line . . . 172
13.7 Deriving the formulae for slope and intercept . . . 173
13.8 Chapter 13 questions . . . 178

13.9 Chapter 13 tutorial questions . . . . . 180

**14 Appendix A: Tables** **181**
14.1 Normal distribution tables . . . . . 181
14.2 Students' t-distribution . . . . . 182
14.3 Fishers F-distribution . . . . . 183
14.4 Chi-Squared percentage points . . . . . 191
14.5 Random number tables . . . . . 193
14.6 Critical values for correlation . . . . . 194

**15 Appendix B: Stats mode on the Casio fx83-85 calculators** **196**
15.1 A Brief guide to Stats Mode on Casio fx83GT and fx85GT . . . . . 196
