1	ABOUT AUTHOR:	10
2	INTRODUCTION TO THE PARALLEL SYSTEMS	11
2.1	Parallel Systems	11
2.2	Purpose of Parallel Processing	11
2.3	Summary	12
3	TYPES OF PARALLEL PROCESSOR SYSTEMS	13
3.1	Single Instruction stream, Single Data stream (SISD)	13
3.2	Single instruction multiple data (SIMD)	14
3.3	Multiple instruction streams, single data stream (MISD)	15
3.4	Multiple instruction stream, multiple data stream (MIMD)	15
3.5	Parallel systems	17
4	PARALLEL PROGRAMMING MODELS	18
4.1	Introduction	18
4.2	Interaction methods	18
4.2.1	Shared memory	18
4.2.2	Message Sending	19
4.2.3	Implicit interaction	19
4.3	Overview	19
4.3.1	Shared Memory Model on distributed memory machine	20
4.3.2	Distributed memory Model on distributed memory machine	20
4.3.3	Threads Model	21
4.3.4	Message Sending Model	22
4.3.5	Data Parallel Model	22
4.3.6	Hybrid Model	23
4.4	Designing Parallel Programs	23
4.4.1	Automatic verses Manual Parallelization	23
4.4.2	Automatic parallelization	24
4.4.3	Techniques	24
4.5	Partitioning	25
4.6	Domain Decomposition	25
4.7	Functional Decomposition	25
4.8	ECOSYSTEM MODELING	25
4.9	SIGNAL PROCESSING	26

4.10	CLIMATE MODELING	26
4.11	Communications	26
4.11.1	COMMUNICATION OVERHEAD	27
4.11.2	VISIBILITY OF COMMUNICATIONS	27
4.11.3	SYNCHRONOUS VS. ASYNCHRONOUS COMMUNICATIONS	27
4.12	Summary	28
5	PARALLEL COMPUTING- EXAMPLE	29
5.1	Array Processing	29
5.2	MPI Example	31
5.3	PI Calculation	36
5.4	Parallel Solution	36
5.5	MPI pi Calculation Example	37
5.6	Parallel Solution	40
5.7	HEAT2D Example	41
6	PARALLEL ALGORITHM	48
6.1	Introduction	48
6.2	Modeling parallel computations	48
6.3	Basic operations on sequences, lists, and trees	49
6.3.1	Sums	49
6.3.2	Scans	50
6.4	Multiprefix and fetch-and-add	51
6.5	Pointer jumping	51
6.6	Parallel Algorithms MPI- -Examples	52
6.6.1	Parallel Algorithm-Example-1	52
6.6.2	Parallel Algorithm-Example-2	59
6.6.3	Parallel Algorithm-Example-3	62
6.7	Application -Parallel Computing	65
6.7.1	Application-centric parallel software	65
7	INTRODUCTION TO DISTRIBUTED SYSTEMS	67
7.1	Benefits and challenges of distributed systems	68
7.1.1	Working of Distributed System	68
7.1.2	Types of distributed systems	68
7.2	Distributed System Example	69
8	DESIGN- DISTRIBUTED SYSTEM	71
8.1	Design a distributed system	71
8.2	Distribution Transparency Hard	75
8.3	Policy and what mechanisms	77
8.4	Hiding Communication Latency	77
8.5	Synchronous Request-Example	78

8.6	Asynchronous Request-Example	78
8.7	Caching and Replication	79
8.8	Summary	80
9	PROGRAMMING: SOCKETS	81
9.1	Sockets	81
9.2	Client Setup	81
9.2.1	Object	81
9.2.2	EchoClient	82
9.3	Server-Setup	83
9.3.1	ServerSocket Object	83
9.3.2	ServerSocket Class	84
9.3.3	EchoServer	84
9.4	Implementation of UDP	85
9.5	Coding:	86
10	DISTRIBUTED SYSTEM ARCHITECTURES	91
10.1	Architectures	91
10.2	Software Architectural Styles	91
10.2.1	Layered Architecture	91
10.2.2	Communication Protocols	92
10.2.3	Server in Python	93
10.2.4	The Socket Interface	93
10.3	Application Layering	93
10.4	Search Engine	93
10.5	Object-based Architecture	93
10.6	Distributed Objects in Java	94
10.7	Service-oriented Architecture	96
10.8	RESTful Architectures	96
10.9	RESTful Operations	97
10.10	Publish-Subscribe Architecture	97
10.11	Publish-Subscribe Architecture	97
10.11.1	Dynamics	98
10.12	MQTT Protocol in Java	98
10.13	Coding :	99
10.14	rest-client	99
10.15	test-REST	100
11	ARCHITECTURE-CYBER-PHYSICAL SYSTEMS	103
11.1	Fundamental System Concepts	104
11.1.1	Systems	104
11.1.2	System Boundary	104
11.1.3	Cyber-Physical Systems and System-of-Systems	104

11.2	Systems of systems	106
11.3	Main Elements of Cyber-Physical Systems-of-Systems	106
11.3.1	Constituent System	107
11.3.2	Environmental dynamics	108
11.3.3	Concept of Overlapping Entourages of CSs:	108
11.4	cyber physical system layers	108
11.5	Physical Layer:	109
11.5.1	Sensors:	109
11.6	Network Layer:	110
11.7	Storage Layer:	110
11.8	Informational Interface Layer	110
11.9	Processing and Analytic Layer:	111
11.10	Application Layer:	112
11.11	Cyber-Physical Systems Architecture Requirements and Related Aspects	112
11.12	Communication in Cyber-Physical Systems-of-Systems:	113
11.12.1	Direct vs. Indirect Communication:	113
11.13	Relied Upon Interface (RUI)	114
11.14	Exercises 1 : Review Questions and Answers	116
11.14.1	Review Questions	116
11.14.2	Review Questions-Answers	117
11.15	Summary	117
12	MODEL-DRIVEN ENGINEERING	119
12.1	Models and metamodels	119
12.1.1	Model	120
12.2	Model definition	120
12.3	Metamodel	120
12.3.1	Metamodel definition	121
12.4	Meta-metamodel, metamodel and model	122
12.5	Modeling language	123
12.6	Classification of a modeling language	123
12.7	Designing a metamodel for CPSoS	125
12.8	CPS metamodel examples	126
12.8.1	Meta Object Facility	127
13	BLOCKLY 4SOS	131
13.1	Blockly 4SoS	131
13.2	Modelling SoS	131
13.3	Simulation Environment for SoS	136
14	PROJECT -CYBER PHYSICAL SYSTEMS	141
14.1	Project -Cyber Physical systems	141

14.2	Project Requirements	143
14.2.1	Architecture:	143
14.3	Project Communication	144
14.3.1	Time	144
14.3.2	Dynamicity	144
14.3.3	Dependability	144
14.4	Blockly4SoS model	145
14.5	Implementation of Project	145
14.6	Description Project Execution	146
14.7	Project Code	147
15	PROJECT USING MATLAB-SMART-FARM	164
15.1	Introduction to Smart Farm Project:	164
15.2	System Implementation:	164
15.2.1	Environment Models:	165
15.2.2	Sensor Models:	165
15.2.3	Multi-Robot Lidar Sensor:	165
15.3	System Architecture:	165
15.4	System Modeling	167
15.4.1	Robot Visualizer and Lidar Sensor:	167
15.4.2	Obstacle avoidance logic and 2PC protocol concept:	168
15.4.3	Architecture of North and South Farm and Store house:	168
15.5	Implementation of Two-Phase Commit protocol:	169
15.6	Requirements:	170
15.7	Problem Encountered:	171
16	CONCLUSIONS	174
