Introduction

In this edition I reveal more proofs of people making a lot of money with the same techniques we've been using since 2019. It's a kind of online book arbitrage can never be saturated. It's something that still works and is creating fortune for many folks, especially absolute beginners. This is because it really doesn't have to do with having technical or previous knowledge.

As long as you have internet and a computer, you can [do this alone](#) if you follow this guide, or you can [join us and start selling inside our community](#). So, wherever you are in the world, I just want to let you know you can do this strategy.

If you read this book to the end, close off all distractions, pay close attention and give yourself the chance to learn this stuff, and finally take action (work for 1 to 2 hours daily) I promise you will make at least \$10k per month.

What we're going to talk about is how absolute beginners have made a ton of money using one or two of our methods. These methods do not even require marketing, which is really weird for a community that's all about Internet marketing, but you actually don't need marketing.

You don't need anything like SEO, Facebook ads, Google ads, blogging, or content marketing. It's not affiliate marketing or multilevel marketing. You don't need to know programming or even email marketing. You don't need your own website. I think you get the picture that this is very different, right?

There were so many success stories with our strategy. I've never seen so many success stories like ours. This is a really unique strategy that is taught only in our own community teaching and our students are having so much success with it.

So if you're super busy in life, and you find marketing stuff just so much, then know that ours is actually just a strategy that need no marketing to work and make a residual income online. You can even build this out into a business, although it's really just a strategy and methods that work.

Briefly this is a strategy that is really eye opening. It's the stuff you can do by finding a little need in the marketplace and then finding a really simple way to fulfill that need at a awesome profits.

I've been doing online businesses for almost 20 years and I have never seen anything that is as good as this. So I'm really excited to show you this. In fact, this is going to be the first time we are publicly showing this method. So I'm really excited about it. Now before we get started, let's do this.

Let's look at some results so you can kind of see what's possible with these methods. I want you to see how much money you can potentially make with this and get you excited.

Let's Look At Some Results

Let's start with Andrew in our community. Below is a screenshot he sent to our Facebook group.

A screenshot of a Facebook conversation starter from a user named Andrew. The header shows a profile picture of a couple, the name 'Andrew', and the text 'Conversation Starter · Yesterday at 8:00 A'. Below the header, the text 'Our best 30 days:' is followed by a table of performance metrics. The table has four columns: 'Total order items', 'Units ordered', 'Ordered product sales', and 'Avg. units/order'. The values are 2,928, 3,092, \$97,719.42, and 1.06 respectively. The 'Ordered product sales' value is highlighted with a red rectangular box.

Total order items	Units ordered	Ordered product sales	Avg. units/order
2,928	3,092	\$97,719.42	1.06

As you can see on the screenshot, he said this is his best 30 days. This month he did over \$97,000 in sales!

Now there's one thing I want to mention. A lot of times you guys see a lot of numbers, especially if you're looking at businesses like Shopify, drop shipping or other different businesses, and you'll see people talking about sales numbers. Sales numbers are useless, right? **Profit** is the important number.

So with our particular methods, about 50 - 60% of what you see here is the net profit. So Andrew here took home around \$50,000 to \$60,000 profit for that single month. So just keep that in mind.

A screenshot of a Facebook conversation starter from the same user, Andrew. The header shows the same profile picture, name 'Andrew', and text 'Conversation Starter · Yesterday at 8:01 A'. Below the header, the text 'Best week:' is followed by a table of performance metrics. The table has four columns: 'Total order items', 'Units ordered', 'Ordered product sales', and 'Avg. units/order'. The values are 1,157, 1,226, \$38,946.97, and 1.06 respectively. The 'Ordered product sales' value is highlighted with a red rectangular box.

Total order items	Units ordered	Ordered product sales	Avg. units/order
1,157	1,226	\$38,946.97	1.06

In his best week, he did a single week of almost \$39,000.

This method is extremely profitable as you're about to see. By the way, all of these people saw the exact same information you're about to see and they're getting some crazy results.

 **Kathy** Conversation Starter

HAPPY FRIDAY! Sales Stats Function BACK UP. 🙌📊 Here is my 30 Day . Creeping up to \$50K in a month, but not sure it will hit.

Total order items	Units ordered	Ordered product sales	Avg. units/order item
2,256	2,323	\$46,806.39	1.03

For Kathy, in her 30 day period, she made \$46,000 , so close to \$25,000 profit in a single month. You run the mat. You're looking at \$560,000 per year in sales. That is a large amount of money.

 **Kris** 59 mins

Last week I hit 60k... Last check 70k.

Total order items	Units ordered	Ordered product sales
1,925	2,054	\$70,208.05

**Over \$10,000
In A Single Week**

For Kris, this was pretty cool. A single week of \$10,000. He's done over \$70,000 already, and that is some big numbers for a single week.
