Dutch Cheat Sheet

Pronunciation

Dutch spelling is largely regular once you know the rules. A few sounds have no exact English equivalent.

Alphabet & Key Sounds

Letter(s)	Sound (English approximation)	Example
a (short)	<i>a</i> as in calm	appel (apple)
a (long)	<i>aa</i> as in father	maan (moon)
e (short)	<i>e</i> as in bet	bed (bed)
e (long)	<i>ay</i> as in say (without the glide)	zee (sea)

w	<i>w</i> as in wet (lips rounded)	water (water)
z	<i>z</i> as in zoo (softer)	zee (sea)
sch	<i>sg</i> — s + throaty ch; at end of word: s	schip (ship), fantastisch (fantastic)
ng	<i>ng</i> as in sing	lang (long)
nk	<i>nk</i> as in bank	bank (bench)

Stress

Stress usually falls on the first syllable of the root word. Prefixes like *be-*, *ge-*, *ver-*, *ont-* are unstressed. Compound words stress the first component.

- **wa**-ter (water), **Am**-ster-dam

- be-**grij**-pen (understand), ver-**haal** (story)
- **zee**-man (sailor — literally “sea-man”)

Final Devoicing

Voiced consonants become unvoiced at the end of a word:

- *b* sounds like *p*: heb → “hep”
- *d* sounds like *t*: hond → “hont”
- *v* sounds like *f*: schrijf → “schreif”
- *z* sounds like *s*: reis → “reis” (s-sound)

Basic Grammar

Word Order

Dutch word order is one of its trickiest features:

Main clause (V2 rule): The conjugated verb **MUST** be the second element. The subject need not be first.

- *Ik zie de walvis.* (I see the whale — subject first.)
- *Vandaag zie ik de walvis.* (Today see I the whale — time expression first, verb stays second, subject moves after verb.)
- *De walvis zie ik.* (The whale see I — object first for emphasis.)

Subordinate clause (SOV): All verbs go to the end.

- *Ik denk dat hij de walvis **ziet**.* (I think that he the whale sees.)
- *Hij zei dat hij de walvis **had gezien**.* (He said that he the whale had seen.)

Yes/no questions: Verb first.

- *Zie jij de walvis?* (See you the whale?)

Commands: Verb first.

- *Zie de walvis!* (See the whale!)

Articles

Two definite articles, one indefinite:

	Definite	Indefinite
Common gender (<i>de</i>)	de man, de zee	een man, een zee
Neuter (<i>het</i>)	het schip, het water	een schip, een water

- Roughly 75% of nouns are *de*-words. Learn *het*-words as you go.
- Plural is always *de*: **de** schepen (the ships), **de** mannen (the men).
- Diminutives (ending in *-je*, *-tje*, *-pje*, *-kje*, *-etje*) are always *het*: **het** scheepje (the little ship).

Nouns

Plural is usually **-en** or **-s**:

Singular	Plural	Rule
man	mannen	most nouns
vrouw	vrouwen	most nouns
tafel	tafels	nouns ending in -el, -em, -en, -er, -je
schip	schepen	short vowel → doubled consonant in plural (keep vowel short)
boot	boten	long vowel → single vowel in plural (keep vowel long)

There are irregular plurals: *stad* → *steden* (city), *kind* → *kinderen* (child).

No case system — nouns don't change form except for plural. The genitive is expressed with *van*: *de staart van de walvis* (the tail of the whale).

Adjectives

Adjectives get **-e** before most nouns. The exception: no -e for singular neuter nouns with *een* or no article.

	De-word	Het-word
With definite article	de grote walvis	het grote schip
With indefinite article	een grote walvis	een groot schip (no -e!)
With no article	grote walvis	groot schip (no -e!)
Predicative	De walvis is groot.	Het schip is groot.

Material adjectives end in **-en**: *houten* (wooden), *gouden* (golden), *zilveren* (silver).

Verbs

Three main groups: weak (regular), strong (vowel change), and irregular.

Present tense:

Person	Weak (werken – to work)	Strong (zien – to see)
ik (I)	werk	zie
jij/u (you)	werkt	ziet
hij/zij/het (he/she/it)	werkt	ziet
wij (we)	werken	zien
jullie (you all)	werken	zien
zij (they)	werken	zien

Note: When *jij* follows the verb (in questions), the -t drops: *Werk jij?* (Do you work?), *Zie jij?* (Do you see?).

Past tense:

Type	Rule	Example
Weak	stem + -de(n) or -te(n)	werkte, werkten
Strong	vowel change	zag, zagen (saw)

The 't kofschip rule: if the verb stem ends in t, k, f, s, ch, or p, the past ending is **-te(n)**; otherwise **-de(n)**. Example: werk (stem ends in k → 't kofschip) → werkte. Speel (stem ends in l → not in 't kofschip) → speelde.

Common strong verbs:

Infinitive	Past Sg.	Past Pl.	Past Participle	Meaning
zijn	was	waren	geweest	to be
hebben	had	hadden	gehad	to have
worden	werd	werden	geworden	to become
zullen	zou	zouden	—	shall / will
kunnen	kon	konden	gekund	can
mogen	mocht	mochten	gemogen	may
willen	wilde	wilden	gewild	to want
gaan	ging	gingen	gegaan	to go
komen	kwam	kwamen	gekomen	to come
doen	deed	deden	gedaan	to do
zien	zag	zagen	gezien	to see
zeggen	zei	zeiden	gezegd	to say
geven	gaf	gaven	gegeven	to give
nemen	nam	namen	genomen	to take
spreken	sprak	spraken	gesproken	to speak
staan	stond	stonden	gestaan	to stand
liggen	lag	lagen	gelegen	to lie
zitten	zat	zaten	gezet	to sit
lopen	liep	liepen	gelopen	to walk
roepen	riep	riepen	geroepen	to call

Perfect tense: *hebben* or *zijn* + past participle.

- *Ik heb de walvis gezien.* (I have seen the whale.)
- *Hij is naar zee gegaan.* (He has gone to sea.)

Past participles of weak verbs: **ge-** + stem + **-d/-t**. Strong verbs: **ge-** + stem (vowel changed) + **-en**.

Separable verbs: Dutch has many verbs where a prefix separates and moves to the end.

- *aankomen* (to arrive) → *Ik kom morgen **aan***. (I arrive tomorrow.)
- *opstaan* (to stand up) → *Hij staat vroeg **op***. (He gets up early.)
- In subordinate clauses, they rejoin: *Ik denk dat hij vroeg **opstaat***.

Negation

Use **niet** (not) or **geen** (no, not a):

- *niet* negates verbs, adjectives, adverbs, prepositional phrases: *Ik zie de walvis **niet***. (I don't see the whale.)
- *geen* negates indefinite nouns (replaces *een*): *Ik heb **geen** geld*. (I have no money. — literally “I have no money.”) vs *Ik heb het geld **niet***. (I don't have the money.)

Questions

Yes/no questions: verb first.

- *Zie je de walvis?* (Do you see the whale?)

Wh-questions: question word + verb + subject.

- *Waar is de walvis?* (Where is the whale?)
- *Wat zie je?* (What do you see?)
- *Wie is dat?* (Who is that?)

Diminutives

The diminutive **-je** (and variants *-tje*, *-pje*, *-kje*, *-etje*) is extremely common in Dutch — far more than in English or German. It conveys smallness, affection, informality, or belittling:

- *schip* (ship) → *scheepje* (little ship)
- *man* (man) → *mannetje* (little man, male animal)
- Used constantly in everyday speech with no particular “small” meaning.

Language-Specific Notes

Dutch is Close to English

Dutch and English are both West Germanic languages. Many basic words are cognates that you'll recognize:

Dutch	English	Dutch	English
water	water	land	land
schip	ship	vis	fish
hand	hand	voet	foot
dag	day	nacht	night
zon	sun	maan	moon
goed	good	koud	cold
drinken	drink	eten	eat
helpen	help	komen	come
zitten	sit	staan	stand

But watch out for false friends:

- *wil* = want (not will — that's *zal*)
- *slim* = clever (not slim — that's *slank*)
- *braaf* = well-behaved (not brave — that's *dapper*)
- *meer* = lake (but also means “more”)
- *door* = through (not door — that's *deur*)
- *zijn* = his (but also means “to be”!)
- *waar* = true (but also means “where”)

Compound Words

Like German, Dutch loves compound nouns. They're written as one word with no spaces:

- *walvisvaart* = whaling (walvis + vaart — whale + voyage)
- *scheepsjongen* = cabin boy (schip + jongen — ship + boy)
- *zeeman* = sailor (zee + man — sea + man)
- *doodskist* = coffin (dood + kist — death + chest)

In the translation, superscript numbers mark the meaningful roots within compounds.

The Ubiquitous “er”

Dutch uses the particle **er** constantly — it has no single English equivalent:

- Existential: *Er is een walvis.* (There is a whale.)
- Locative: *Ik ben er.* (I am there.)
- Partitive: *Ik heb er drie.* (I have three of them.)
- With prepositions: *ermee* (with it), *ervan* (of it), *erop* (on it)

You’ll see *er* everywhere in the translation. It’s never numbered.

Formal vs. Informal “You”

Dutch distinguishes *jij/je* (informal) and *u* (formal). Moby Dick uses informal among sailors, formal in hierarchical or respectful contexts. The translation follows the same pattern.

Nautical Dutch

The Netherlands has a rich maritime history, and Dutch has an extensive nautical vocabulary that maps naturally onto Moby Dick:

English	Dutch
harpoon	harpoen
mast	mast
sail	zeil
anchor	anker
deck	dek
bow	boeg
stern	achtersteven
starboard	stuurboord
larboard / port	bakboord
whale	walvis
whaling	walvisvaart

English	Dutch
whaler	walvisvaarder
blubber	blubber / spek
captain	kapitein
crew	bemannig
voyage	reis / vaart

Dutch contributed many nautical terms to other languages (including English words like *yacht* from *jacht*, *skipper* from *schipper*, *buoy* from *boei*, *deck* from *dek*).
