# PART 1 – AUDIT: TIME-BASED THINKING FAILURE

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## Diagnosing Time-Based Thinking Errors

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 0. Why You Need an Audit

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 1. Price Ontology

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

#### 1.1. Price Is Not a Continuous Process

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

#### 1.2. Price Is a State Label, Not a Result of Dynamics

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 1.3. Relationship Between Current Price and Future Price

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 2. Time ≠ Dynamics

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 2.1. Time Does Not Describe True Price Dynamics

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 2.2. Time Only Organizes Observation

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 3. Modeling Data ≠ Modeling Markets

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 3.1. What Do Most Models Actually Do?

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 3.2. Consequences of Modeling the Wrong Object

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 4. Error: Not Noise, But Structural Accumulation

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 4.1. Types of Common Errors

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 4.2. Why Parameter Tuning Can't Fix This

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 5. Indicators and Ontological Limits

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 5.1. Indicators Aren't Wrong Because of Formulas

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

### 5.2. Why Do Indicators Lag?

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6. CORE DIAGNOSTIC QUESTIONS

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.1. TIME AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.2. PRICE AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.3. STATE AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.4. ERROR AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.5. LIQUIDITY AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.6. REGIME AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.7. LAG AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.8. STATE SPACE AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.9. CAUSALITY AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.10. DEPENDENCY AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.11. DEGRADATION AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.12. ERROR ACCUMULATION AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

## 6.13. DISTRIBUTIONAL AUDIT

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

# 7. Scoring Results

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

**Calculation:**

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

**Classification:**

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

**8. Why No “Solution” in Part 1?**

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

**9. Transition Question**

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

**10. Important Notes**

This content is not available in the sample book. The book can be purchased on Leanpub at <https://leanpub.com/event-conditionedthinkingpartiaudit>.

# Writing in Markua

Writing in Markua is easy! You can learn most of what you need to know with just a few examples.

To make *italic text* you surround it with single asterisks. To make **bold text** you surround it with double asterisks.

## Section One

You can start new sections by starting a line with two # signs and a space, and then typing your section title.

### Sub-Section One

You can start new sub-sections by starting a line with three # signs and a space, and then typing your sub-section title.

## Including a Chapter in the Sample Book

At the top of this file, you will also see a line at the top:

```
1 {sample: true}
```

Leanpub has the ability to make a sample book, which interested readers can download or read online. If you add this line above a chapter heading, then when you publish your book, this chapter will be included in a separate sample book for these interested readers.

## Links

You can add web links easily.

Here's a link to the [Leanpub homepage](#).

## Images

You can add an image to your book in a similar way.

First, add the image to the “Resources” folder for your book. You will find the “Resources” folder under the “Manuscript” menu to the left.

If you look in your book’s “Resources” folder right now, you will see that there is an example image there with the file name “palm-trees.jpg”. Here’s how you can add this image to your book:

If you want to add a figure title, you put it in quotes:

**Figure 1. Palm Trees**

If you want to add descriptive alt text, which is good for accessibility, you put it between the square brackets:

**Figure 2. Palm Trees**

You can also set the alt text and/or the figure title in an attribute list:

**Figure 3. Palm Trees**

Finally, if no title is provided, and the `alt-title` document setting is the default of `all`, the alt text will be used as the figure title instead of as alt text.

**Figure 4. Palm Trees**

You can set the important document settings at Settings > Generation Settings.

## **Lists**

### **Numbered Lists**

You make a numbered list like this:

1. kale
2. carrot
3. ginger

### **Bulleted Lists**

You make a bulleted list like this:

- kale

- carrot
- ginger

## Definition Lists

You can even have definition lists!

### **term 1**

definition 1a

definition 1b

### **term 2**

definition 2

## Page Breaks

We don't recommend that you manually break pages, since that is brittle and can lead to unexpected formatting if you edit text earlier in your chapter and forget about the manual page breaks. But if you really want to add a page break, you use the `{pagebreak}` directive on a line by itself, with blank lines above it and below it.

## Code Samples

You can add code samples really easily. Code can be in separate files (a “local” resource) or in the manuscript itself (an “inline” resource).

### Local Code Samples

Here’s a local code resource:

**Figure 5. Hello World in Ruby**

---

```
1 require 'time'
2
3 # This is just some pointless code so you can see the syntax highlighting...
4 def display_info
5   pi = Math::PI.round(10)
6   time_last_year = (Time.now - 365 * 24 * 60 * 60).getlocal("-08:00")
7   formatted_time = time_last_year.strftime("%Y-%m-%d %H:%M:%S")
8   puts "Pi to 10 decimal places: #{pi}"
9   puts "The time 1 year ago in Pacific Time: #{formatted_time}"
10 end
```

---

### Inline Code Samples

Inline code samples can either be spans or figures.

A span looks like `puts "hello world"` this.

A figure looks like this:

```
1 require 'time'
2
3 # This is just some pointless code so you can see the syntax highlighting...
4 def display_info
5   pi = Math::PI.round(10)
6   time_last_year = (Time.now - 365 * 24 * 60 * 60).getlocal("-08:00")
7   formatted_time = time_last_year.strftime("%Y-%m-%d %H:%M:%S")
8   puts "Pi to 10 decimal places: #{pi}"
9   puts "The time 1 year ago in Pacific Time: #{formatted_time}"
10 end
```

You can also add a figure title using the title attribute:

Figure 6. Hello World in Ruby

```
1 require 'time'
2
3 # This is just some pointless code so you can see the syntax highlighting...
4 def display_info
5   pi = Math::PI.round(10)
6   time_last_year = (Time.now - 365 * 24 * 60 * 60).getlocal("-08:00")
7   formatted_time = time_last_year.strftime("%Y-%m-%d %H:%M:%S")
8   puts "Pi to 10 decimal places: #{pi}"
9   puts "The time 1 year ago in Pacific Time: #{formatted_time}"
10 end
```

## Tables

You can insert tables easily inline, using the GitHub Flavored Markdown (GFM) table syntax:

Header 1	Header 2
Content 1	Content 2
Content 3	Content 4 Can be Different Length

Tables work best for numeric tabular data involving a small number of columns containing small numbers:

Central Bank	Rate
JPY	-0.10%
EUR	0.00%
USD	0.00%
CAD	0.25%

Definition lists are preferred to tables for most use cases, since reading a large table with many columns is terrible on phones and since typing text in a table quickly gets annoying.

## Math

You can easily insert math equations inline using either spans or figures.

Here's one of the kinematic equations  $d = v_i t + \frac{1}{2} a t^2$  inserted as a span inside a sentence.

Here's some math inserted as a figure.

$$\left| \sum_{i=1}^n a_i b_i \right| \leq \left( \sum_{i=1}^n a_i^2 \right)^{1/2} \left( \sum_{i=1}^n b_i^2 \right)^{1/2}$$

**Figure 7. Something Involving Sums**

## Headings

Markua supports both of Markdown's heading styles.

The preferred style, called atx headers, has the following meaning in Markua:

```

1 {class: part}
2 # Part
3
4 This is a paragraph.
5
6 # Chapter
7
8 This is a paragraph.
9
10 ## Section
11
12 This is a paragraph.
13
14 ### Sub-section
15
16 This is a paragraph.
17
18 #### Sub-sub-section
19
20 This is a paragraph.
21
22 ##### Sub-sub-sub-section
23
```

```

24 This is a paragraph.
25
26 ##### Sub-sub-sub-sub-section
27
28 This is a paragraph.

```

Note the use of three backticks in the above example, to treat the Markua like inline code (instead of actually like headers).

The other style of headers, called Setext headers, has the following headings:

```

1 {class: part}
2 Part
3 ====
4
5 This is a paragraph.
6
7 Chapter
8 =====
9
10 This is a paragraph.
11
12 Section
13 -----
14
15 This is a paragraph.

```

Setext headers look nice, but only if you're only using chapters and sections. If you want to add sub-sections (or lower), you'll be using atx headers for at least some of your headers. My advice is to just use atx headers all the time. (The `{class: part}` attribute list on a chapter header to make a part header does actually work with Setext headers, but it's really ugly.)

Note that while it is confusing and ugly to mix and match using atx and Setext headers for chapters and sections in the same document, you can do it. However, please don't.

## Block quotes, Asides and Blurbs

Block quotes are really easy too.

—Peter Armstrong, *Markua Spec*

Asides are useful for longer text.  
But typing them like this isn't fun.

Asides can be written this way, since adding a bunch of A> stuff at the beginning of each line can get annoying with longer asides.

Blurbs are useful

Blurbs are useful

There are many types of blurbs, which will be familiar to you if you've ever read a computer programming book.

This is a discussion.

You can also specify them this way:

This is a discussion

This is an error.

This is information.

This is a question. (Not a question in a Markua course; those are done differently!)

This is a tip.

This is a warning.

This is an exercise. (Not an exercise in a Markua course; those are done differently!)

## Good luck, have fun!

If you've read this far, you're definitely the right type of person to be here!

Our last piece of advice is simple: once you have a couple chapters completed, publish your book in-progress!

This approach is called Lean Publishing. It's why Leanpub is called Leanpub.

If you want to learn more about Lean Publishing, read [this](#) or watch [this](#).
