

About the Author

Moch Lutfi Yahya, widely known as Zacky Vicent, is a rare breed — a fearless fisherman at sea and a sharp-minded digital writer across the globe. He lives between two worlds: the brutal reality of ocean waves and the limitless realm of digital civilization.

Zacky doesn't just write — he digs deep. From the origins of ancient civilizations to the rise of artificial intelligence and decentralized finance, he seeks one ultimate answer: How does the world truly work?

Through his digital brand, ZV Store, Zacky shares raw insights, bold thoughts, and unfiltered truths. His words don't just inform — they awaken. Every page he writes is a call to action:

To rise. To prove. To take control of your own future.

As a strong believer in Bitcoin and blockchain technology, Zacky stands at the frontline of the crypto revolution — helping others break free from the old systems and embrace financial independence.

“Rise and Prove It. The world won't wait for you. You must fight, think, and burn your own path.”
