

## Serena Sees Her Footprints on the Moon

Illustrated by Sam Beck  
Written by Sean Reed

---

“Never tell me the sky’s the limit when  
there are footprints on the Moon.”

Twelve people have walked on the Moon. Here are their footprints.

Serena sees her own footprints on the Moon, next to theirs.

Her footprints are next to pieces of the rockets that landed the astronauts there, and pieces of the rockets that launched them back home.
