## 1- 99 crafting guide rs3 2019

Paul is very knowledgeable about Old School Runescape, with a maxed ironman, also maxed out on a regular account! Learn how to level up crafting in RuneScape 3 in an easy way. As a level up crafting runeScape 3Hi my new and improved 1-99 Crafting Guide to RuneScape 3 EOC. This guide will show you the fastest way, cheapest/profitable way and the most AFK way to teach crafting to get level 99 as soon as possible! Things that increase your experience ratesUse we start are some useful items that can improve experience indicators and levels for you faster! Artisan Outfit: First, pieces of artisan clothing that can only be gained off the treasure hunter. This gives a 1% bonus experience per unit, with an additional 1% if all 5 units are worn. This gives a 6% experience boost while teaching crafting – this adds up to the long term and saves many hours. Crafting Potions: Another useful element is crafting potions that allow you to increase your level to 3. Toolbelt Items: You can also add many items to your toolbelt to save on stock space such as chisel, needle, glass blowing pipe and most mold. Holy Clay Needles: These needles allow the user to get 24,450 bonus experiences while teaching crafting. They are derived from the creation of a theft minigame and play organized games that can give up to 120,000 bonus experiences per hour. Depending on your teaching methods, you may or may not choose to do so. If your method will get less than 120,000 exp/hour, then you should do the theft creation until you have enough experience to gain the desired level. Crafting a master cape, obtained after virtual level 120 CraftingCrafting training methodsThere are several different ways of teaching crafting. Depending on how much money you have and how long you have, you can choose to go on several different routes! Here I will show you three different ways: The fastest route cheapest route AFK Route Note, so that the fastest route is not technically correct- you can gain the most experience of cutting gems at the highest level. But I will give traditional methods with high exp rates. So now we can jump straight!1. Fastest route: Expensive/Fast methodThis players should start the same as the cheap method, low-level can be inefficient to switch training techniques, as experience rates are so low and the spacing between levels is thin. Exactly 1-54Thing has to train from 1-54 levels of Glassblowing. This is an easy way of training, which can gain about 40,000 experiences per hour. Moler glass can be made on the oven using a bucket of sand and soda ash. Soda ash is obtained by preparing seaweed on the range or fire. Fritz Glasblower is found in Entrana and can teach the player the basics. If the player does not want to do glass, they can buy them for about 300 each and then craft glass objects. Equal Levels You need to train when processing battlestaves. This must buy a limit of 100 in 4 hours, so it should be accumulated in a few days, it will give enough to get to a level of 63.Levels 63-99Here you should train up to 99 using Dragonhide Armor. This is the most experience per hour craft dragonhide body top notch possible. This provides between 300,000 and 450,000 experiences per hour, costing about 5 M–8 M per hour. The cheap method of training is still profitable.2. Cheapest methodLepai 1-75Here teach ceramics and jewelry, so the best thing is at your level. Most objects craftable at these levels are profitable, although you will only make a small difference because there is not much exp to get to level 75.Levels 75-89Getting to 89 from here can be done using Harmonium Harps in the Ithell district of Prifddin. If you don't have this requirements for your best choice is to continue training in ceramics and jewelry. Exactly 89–99Here you can teach flasks and crystal flasks, where you will start to profit. You need 81 mining my red sandstone or crystal flecked sandstone to find Prifddin. This is limited because you can only get 100/125 per day. Then sandstone can be made into molten glass, which can be blown into flasks for profit. If you can not do this, you should continue harmonium harp or make decorated cooking urns for minimal loss / Dragonstone bracelets for small gains. Harmonium Harps, found in the Ithell district of Prifddin.3. AFK MethodOne way to teach when processing AFK is the citadel of the clan. The player can train on the looms there, gaining about 120,000 experience per hour with minimal clicking. You can cap the citadel once a week to gain no more than 200,000 per week. Some other ways to teach crafting include questing, player-owned ports (Level 90+ required), and Dungeoneering getting exp passively. Crafting MethodsThank YouThanks read my guide; I hope this will help you reach 99 as soon as possible! Feel free to drop the question below and I will contact you as soon as possible. Also check out another one of my guides to help you get rich quickly or reach 99 in the next skill! CommentsKiwi April 24, 2020: no ftp info OSRS has a wide range of skills, each train helps you improve in some way. Some skills are useful for fighting, while others are not at all related to the fight. Crafting is one of these skills that are listed in the non-combat category. It is f2p skills that are used to craft various items such as armor. There are many different ways to teach crafting, some of them are cheap, and others are expensive. Expensive ways will always be much faster, and so we're going to focus on them reaching level 99 by crafting as fast as possible. Everything you need to know about OSRS Crafting Training people use this skill to make money, but in general it is not the best way to make money. Related RuneScape Guides: OSRS Crafting training from level 1 to 99 crafting can mainly be taught by fusing 2 items into a new item, doing that it takes a certain level of processing based on what kind of item is crafted. The training methods listed below require a good amount of OSRS Gold, which means you can visit our Gold Sales page to buy any amount of OSRS Gold to suit your needs. From level 1 to 33 Crafting to reach level 33 crafting is very fast and requires not so much gold. You will be crafting two different items to reach level 33. The first element will help you reach level 8, and the second element will reach the goal. The leather glove is the first point, and the Golden Amulet is the second point. You will need a needle, 30 threads, and 112 skins by processing enough skin gloves to level 8. After that, you will need amulet mold, 592 Gold Bars, and any furnace to start processing gold amulets. You will get 13.8 by processing XP by doing one leather glove and 30 XP by making one gold amulet. From 33 to 54 crafts to reach level 54 crafting can be done quickly, but it requires a good amount of OSRS Gold. Crafting using Glassblowing is the fastest way to reach level 54. You will be processing 3 items, all these elements require molish glasses and a glassblowing tube to be done. The first thing you need to craft is empty bottles, you will need 780 molar glasses to reach level 42 when processing. The second point is The Empty Fishbowl, 523 molar glasses must reach level 46. The third point is Unpowered Orb, 1579 Moler Glasses need to reach level 54. Three elements provide 35, 42.5 and 52.5 when processing XP respectively. Doing all this is quite simple, because you do not move anywhere to do it. Standing next to the Grand Exchange is the most effective way to do it. From level 54 to 63 When you reach level 54 when processing, the next level will be kinda harder to train and also need more money. The best way to reach level 63 is by crafting elemental Battlestaves, it is very expensive, but so fast compared to other teaching methods. To reach level 58 is needed by processing 736 Water Battlestaves. To create them, you will need 736 Battlestaves and 736 Water Orbs. After that, you will need to start processing Earth Battlestaves to reach level 62. You will need 972 Battlestaves near 972 Earth Orbs to achieve that. The last level of up to 63 can be done by crafting Earth Battlestaves, but you can craft Fire Battlestaves instead if you want to do it faster. 279 Battlestaves and 279 Fire Orbs need to reach the target. You will get 100, 112.5, and 125 Crafting XP respectively by processing one of the employees for each type of these elemental battlestaves. 63 to 99 Crafting Pasiecti lygj 99 Crafting Crafting even more gold and take more time. Crafting Dragonhide bodies will be the best and fastest way to reach level 99. Making these Dragonhide bodies requires threads and Dragon Leathers. Green Dragonhide bodies are the best thing for crafts to reach level 71 and you will need 7194 Green Dragon Leather and 1500 Themes to do so. Each Body skillfully provides 186 XP. From level 71 to level 77 you will have to start working in blue dras. 9,447 Blue Dragon Leather and 1,850 Themes need to do this. Each Body skillfully provides 210 XP. Once you reach level 77, you will unlock the ability to craft red dragonhide bodies. By crafting this will be the best way to reach level 84.18,921 Red Dragon Skin and 3700 Themes to be done. Each body skillfully provides 234 XP. After level 84 processing, you will only be crafting black dragonhide bodies to level 99. 134406 Black Dragon Skin and 26,900 Themes need to do so. Each body skillfully provides 258 XP. Final thoughts on RuneScape Crafting Training After the above training methods, you really don't need to be that active while training your crafting to level 99. Two or three clicks every few seconds will be enough to do it efficiently. In general, OSRS Gold is the key to speeding up game progress, which means you won't have to spend weeks and weeks while training your skills or completing your quests. So if you don't need gold to teach your crafting or other skills, you can always buy gold from Probemas. Need help with rs travel?
