

SUSTAINABLE BRANDS 2018

GRAPHIC SIGNAGE PANELS

ECOR®, NATURE'S COMPOSITE.™ The sustainable alternative to PVC foam, extruded polystyrene, acrylics, wood panel products and other printable surfaces.

ECOR® is an advanced environmental composite panel formed from abundant cellulose—sourced from urban, farm and forest fibers—combined with pressure and heat to create high performance panels with unlimited applications.

Representing the future of sustainable design, ECOR® is in a class of its own for printers and POP fabricators who demand sustainable products with superior attributes.

ECOR® FlatCOR™ Panels are perfect for signage and displays and comes in white, brown and is a direct print substrate.
