

ACS Pallet Setup for Scanco Programming

ASC Multibin Options - Pallet Tab

ID Code Length – controls how long the Pallet ID will be when pallet ID is created by Scanco programs.

Default ID Type Code – this will fill in the ID Type in Scanco programs.

Required: Pallet Case ID Type Maintenance

Pallet ID Type MUST BE INCLUDED in the Next Pallet ID.

The screenshot shows two overlapping Sage software windows. The top window is titled 'Multi-Bin and WMS Company Options (ABC) 5/27/2016' and has a tab for '7. Pallet'. A red box highlights the 'Pallet Case ID Defaults' section, which contains two fields: 'ID Code Length' with a value of 15 and 'Default ID Type Code' with a value of 4S. The bottom window is titled 'Pallet Case ID Type Maintenance (ABC) 5/27/2016' and displays a table with the following data:

	PalletID Type	Description	Short Desc	Dflt Quantity	Next Pallet ID	Putaway Volum
1	4S	4S	4S	.00	4S0000000000047	0.00
2	CASE	Case Pack	Case	.00	CAS000000000134	0.00
3	CONT	Container	Container	.00	CONT000000000003	0.00
4	MAST	Master Pack	Master	.00	MAS000000000007	0.00
5	PAL	Pallet	Pallet	.00	PAL000000000011	0.00
6				.00		0.00
