Thank you for your order!

Folks like keep the site going – and best of all you've got a fab Engine shed that you can do lots with.

Please, please don't just print it out and stick it together... it'll look okay, but to make it look like John's, you need to add some layers.

Copy and paste this URL in to your browser, and you'll be taken straight to John's tutorial:

https://www.youtube.com/watch?v=ad_1d9CIcpE

And here's a pic of how the engine looks when you it's finished:

Now scroll down for the print outs.

Have fun – and don't forget to send in pics.

Best

Al
