## 1.0 EXECUTIVE SUMMARY

IWM Consulting Group, LLC (IWM Consulting) conducted this Phase I Environmental Site Assessment (ESA) of the Retail Shopping Center property located at 1352 Lincolnway and 200 West US Highway 6, Ligonier, Noble County, Indiana, (herein referred to as the site) as authorized by Scheerer McCulloch Auctioneers. The assessment was conducted in accordance with ASTM International (ASTM) E1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process”.

The following is a brief summary of our report. Please refer to the full text of this report in its entirety for a comprehensive understanding of the information presented in this Executive Summary, as specifics are not fully discussed in this section.

### 1.1 Findings and Opinions

IWM Consulting’s findings and opinions for the Phase I ESA conducted for the site are summarized as follows:

**Current Site Conditions.** The site consists of three (3) contiguous land parcels containing a total of 5.4 acres. The site is improved with three (3) commercial buildings on the south portion that contain 17,403 square feet, 2,048 square feet, and 10,000 square feet of floor space. The buildings are occupied by a Family Dollar Store and an Ace Hardware store, Dari Point restaurant, and the Iglesia Nueva Vida/New Life Church. The north portion of the site is vacant land, with a dense overgrowth of trees and brush over the northwest portion.

A mound of soil approximately 10 feet high and covering an area approximately 130 feet from north to south and 30 from east to west is located in the southwest corner of the overgrown area, near the center of the east site boundary. The mound is also overgrown with trees and brush. Mr. Donald Holsinger, the site owner, stated that the Indiana State Police formerly occupied the property currently occupied by a McDonald’s restaurant on the property adjacent to the north of the site and that the mound of soil in the wooded area was used as a shooting range for the police. He stated that no investigations or testing of the soil in the mounded area has been conducted. No soil staining, odors, stressed vegetation, or other evidence of *hazardous substances* or *petroleum products* were observed on or around the soil mound.

Storm water drains are located on the south site boundary, the east site boundary, and east of the southwest church building, and two (2) drainage tiles were observed near the center of the site. No evidence of the disposal of *hazardous substances* or *petroleum products* to the drains was observed.

A used cooking grease barrel is located outside the north wall of the small restaurant building on the south-central portion of the site. The grease barrel is labeled for used cooking grease only and is serviced by Darling International. No evidence of the disposal of *hazardous substances* or *petroleum products* into the grease barrel was observed.

The properties adjacent to the site consist of apartments, a McDonald's restaurant, and a Casey's General Store convenience store/gasoline station to the north, a cemetery to the east, residences and a starter/alternator sales and service company to the west, and a Lassus Handy Dandy convenience store/gasoline station, CVS pharmacy, and a KFC/Taco Bell restaurant to the south. Gasoline USTs and fuel dispensing equipment were observed at the Casey's General Store and the Lassus Handy Dandy, but no evidence of releases of hazardous substances or petroleum products was observed on these properties.

**Historical Summary.** Historical review indicates the site was vacant land prior to construction of the existing buildings in the 1960s. Occupants of the site buildings have consisted of grocery stores, retail stores, restaurants, a lawn mower sales and small engine repair facility, and the New Life Church. The site owner and Fire Department personnel stated that no bulk storage of hazardous substances or petroleum products had been located at the lawn mower sales and small engine repair facility.

**Regulatory Review Summary.** Review of regulatory agency databases required by ASTM E1527-13 found that the Family Dollar Store on the site is registered as a conditionally exempt small quantity generator of hazardous waste. Personnel with Family Dollar stated this registration is for disposing of damaged containers and unsold quantities of household chemicals and cleaning products. No releases of hazardous wastes have been reported at the site. Based on this information, this listing is not a *Recognized Environmental Condition (REC)* for the site.

Review of the regulatory agency databases for properties within distances of the site specified in ASTM E1527-13 found nine (9) listings for the properties near the site. Based on the reported statuses of the listings and/or the down-gradient locations of the properties relative to the site, these listings are not *RECs* for the site.

**Interview Summary.** Mr. Don Holsinger of KRDH, LLC, the site owner, stated the buildings on the site were constructed in the 1960s. The large retail commercial building on the site was a grocery store until the Family Dollar Store and Ace Hardware store moved into the building in the 2000s. The south-central building has always been a restaurant. The southwest building was formerly occupied by a lawn mower sales and small engine repair company until the New Life Church moved into the building. No bulk storage of chemicals or *petroleum products* had been located at the southwest building and no releases of *hazardous substances* or *petroleum products* had occurred at the facility. Mr. Holsinger is not aware of any *RECs* associated with the site.

Mr. Kevin Straight with Family Dollar stated that the registration of the Family Dollar store on the site as a conditionally exempt generator of hazardous wastes is primarily a formality in order to deal with the disposal of defective containers or unsold household chemicals and cleaning supplies at the Family Dollar Store. He stated the registration is not associated with any significant generation of hazardous wastes at the site facility.

Personnel with the Ligonier Fire Department stated the large retail/commercial building on the site was formerly a grocery store before becoming a Family Dollar Store and Ace Hardware. The southwest building was a small engine repair facility before becoming a church. They stated that no USTs or other bulk storage of chemicals or *petroleum products* were located at the engine

repair facility, and no spills or releases of *hazardous substances* or *petroleum products* were reported at the facility. The south-central building on the site has always been a restaurant. The Fire Department personnel are not aware of any environmental concerns at the site property.

**Vapor Encroachment Screening (VES).** A Tier I VES was conducted for the site using standard environmental record sources. The results of the VES indicate a *Vapor Encroachment Condition (VEC)* does not currently exist at the site.

## 1.2 Conclusions

IWM Consulting has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of the Retail Shopping Center property located at 1352 Lincolnway and 200 West US Highway 6, Ligonier, Indiana. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has identified the following *Recognized Environmental Conditions* in connection with the site property:

- A mound of soil located in the wooded area on the northwest portion of the site, near the center of the west site boundary, was formerly used as a shooting range by the Indiana State Police. No investigations or testing of the soil in and around the mound has been conducted. Further investigation is necessary to determine if the soil in and around the mound has been adversely impacted by lead from the shooting range.

This summary is provided for the reader's convenience and is part of the complete report. Interpretation of this summary should be considered incomplete without reviewing the full Phase I ESA report and associated appendices. The reader is directed to the report text for additional information regarding areas and conditions of potential environmental concern.

## 2.0 INTRODUCTION

IWM Consulting conducted this Phase I ESA for Scheerer McCulloch Auctioneers (Client) of the Retail Shopping Center property located at 1352 Lincolnway and 200 West US Highway 6, Ligonier, Noble County, Indiana (the site). Our services were conducted in accordance with the ASTM E1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” (referred to as ASTM E1527-13).

### 2.1 Purpose

The purpose of this ESA was to determine the existence of “*Recognized Environmental Conditions*” (*RECs*) in connection with the site using an approach conforming to ASTM E1527-13. *RECs* are defined in ASTM E1527-13 as the “presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*.”

The definition of a *release* under CERCLA includes a number of exclusions, but does include contamination that is the direct result of a *release* into the environment from a non-natural source that migrates into a building or structure. For the purposes of the ASTM E1527-13 practice, *migrate* and *migration* refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

A *REC* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., property restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*) is defined as a *controlled REC* (*CREC*). A *CREC* shall be identified as a *REC* in the conclusions section of this report; however, the identification of a condition as a *CREC* does not imply that the environmental professional conducting the Phase I ESA has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented. A *CREC* differs from a *historical REC* (*HREC*) in that a *HREC* refers to a past *release* of *hazardous substances* or *petroleum products* that has occurred in connection with the site and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the site to any required controls.

*RECs* include *hazardous substances* or *petroleum products* even under conditions in compliance with laws but do not include “*de minimis* conditions that generally do not present a material risk of harm to public health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” Conditions determined to be *de minimis* are not *RECs*.

## 2.2 Scope of Services

The Scope of Services included a review of historical records and regulatory database information, a reconnaissance of the site and adjoining properties, interviews (historical and with those currently familiar with the site, where available), and preparation of this report.

Records were reviewed given that they were “reasonably ascertainable.” ASTM E1527-13 defines “reasonably ascertainable” as “information that is publicly available, obtainable from its source within reasonable time and cost restraints, and is practically reviewable.” The document examination generally includes the following tasks (refer to the agreed-upon scope of work):

- At a minimum, review of historical aerial photographs, city directories, and fire insurance maps of the site and adjoining properties. If these are not available, the Report will include a statement regarding the lack of availability.
- Review of property title records if provided by the Client, unless otherwise agreed.
- Review of regulatory database provider report of Federal, state, and local listings for the site and other properties/facilities found within the search distances specified by ASTM E1527-13.

The reconnaissance included the following tasks:

- Visual observations of the site to identify indications of *RECs*, such as above ground storage tanks (ASTs) and underground storage tanks (USTs), stained soil or floor areas, vegetative stress, filled areas, waste or material dumping.
- Interviews with the current owner and/or key site manager or other person as designated by the owner regarding the site’s current and past uses and information of environmental significance.
- Inquiries to appropriate local government offices (e.g., Fire Department or Health Department).
- Observations of adjoining properties (from site boundaries and public rights-of-way).

Photographic documentation and site diagrams are additional services that are not required by the ASTM E1527-13 Standard and are included at the discretion of the Environmental Professional.

Utilizing the information collected for the site during the Phase I ESA, a Tier 1 Vapor Encroachment Screening (VES) was conducted for the site according to guidance and processes provided in ASTM Designation E2600-10: *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM E2600-10). The objective of a VES is to determine if a *vapor encroachment condition* (VEC) exists, likely exists, or cannot be ruled out and provide information to support those conclusions. A VEC is defined by ASTM as the “presence or likely presence of *chemicals of concern* (COC) vapors in the subsurface of the *target property* caused by the release of vapors from contaminated soil or groundwater or both on or near the *target property* as identified by the Tier 1 or Tier 2 procedures” presented in ASTM E2600-10.

## 2.3 Standard of Care and Reliance

These Phase I ESA services were performed in a manner consistent with good commercial and customary standards and practices as applied by other consultants conducting similar investigations in the same geographic area during the same time period. No warranties, express or implied, are intended or made. Unless otherwise agreed, this Phase I ESA was prepared for the exclusive use and reliance of **Scheerer McCulloch Auctioneers** and **KRDH, LLC** for a period not exceeding 180 days from the date of each task performed, subject to the limitations expressed herein. Reliance on the contents of this report after 180 days is at the user's sole risk. Any use of this Phase I ESA or the information contained herein by persons or entities other than the Client (without the express written consent of the Client and IWM Consulting) will be at the sole risk and liability of such persons and entities.

## 2.4 Limitations and ASTM E1527-13 Exceptions of the Assessment

Findings, conclusions, and recommendations referenced herein are based upon, and limited to, those observations made during the listed reconnaissance date.

The site area included in this Phase I ESA was based upon available property lines, site surveys, property plat maps, verbal descriptions provided to IWM Consulting by the Client, and/or field observations (roadways, utilities, mow lines, etc.) observed by IWM Consulting's representative during the site reconnaissance. The information regarding the adjoining properties was obtained by visual reconnaissance from the subject site and/or public roads, and information obtained from record reviews and interviews with representatives of the site owner.

As indicated in the ASTM E1527-13 the "...practice does not impose on the environmental professional the responsibility to undertake a review of recorded land title records and judicial records for environmental liens or activity and use limitations (AUL)." As indicated in IWM Consulting's proposal, liens and AUL information developed for the site by others and provided to IWM Consulting prior to the generation of this report would be incorporated into IWM Consulting's review. User information regarding liens and AULs is presented in Section 4.0 of this Phase I ESA.

Phase I ESAs are limited to specific inquiries and are based upon records, reviews, and opinions rather than invasive testing services. Therefore, IWM Consulting cannot eliminate uncertainty as to environmental conditions at the site. Nor can we represent that the site contains no hazardous, petroleum or other products or substances (or other latent conditions) beyond those identified or observed from this scope of work. Information in this report is based upon the site's current use(s) and information obtained prior to issuance of the final report. IWM Consulting does not warrant the accuracy of information obtained from interviewees or other third party sources of information (such as other environmental firms, database companies or title companies).

Environmental issues or conditions may exist at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of ASTM E1527-13 (non-scope considerations). Examples of non-scope considerations include, but are not limited to, asbestos

containing buildings materials, radon, wetlands, lead-based paint, lead in drinking water, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological issues, indoor air quality unrelated to *releases of hazardous substances or petroleum products* into the *environment*, biological agents, mold, and high voltage power lines. These non-scope issues or conditions can be assessed during the ESA at the request of the Client.

Please note that no Phase I ESA can wholly eliminate uncertainty regarding the potential for *RECs* in connection with the site. Referring to the procedures in ASTM E1527-13 will reduce, but not eliminate, these uncertainties. It is possible, therefore, that all *RECs* or relevant environmental issues may not have been identified. The failure to discover these, using a reasonable and mutually agreed upon scope of services, does not guarantee the absence of such *RECs* or issues, but only that they were not found as a result of this assessment. The services herein are in no way to be construed or relied upon as a legal interpretation, opinion or advice.

### 3.0 PROPERTY OVERVIEW

The site is located at 1352 Lincolnway and 200 West US Highway 6, Ligonier, Noble County, Indiana. Geographically, the site is located in the southeast  $\frac{1}{4}$  of the southwest  $\frac{1}{4}$  of Section 27, Township 35 North, Range 8 East in Noble County as shown on the Ligonier, Indiana 7.5-minute USGS topographic quadrangle map. More specifically, the center of the site is located at approximately 41.453086° latitude and -85.587436° longitude.

The site consists of three (3) contiguous land parcels containing a total of 5.4 acres. The property parcel numbers are as follows:

- 57-01-27-300-305.000-014 – 0.62 acre
- 57-01-27-300-308.000-014 – 1.99 acres
- 57-01-27-300-309.000-014 – 2.79 acres

The site is improved with three (3) commercial buildings on the south portion that contain 17,403 square feet, 2,048 square feet, and 10,000 square feet of floor space. The buildings are occupied by a Family Dollar Store and an Ace Hardware store, Dari Point restaurant, and the Iglesia Nueva Vida/New Life Church. The north portion of the site is vacant land, with a dense overgrowth of trees and brush over the northwest portion.

Historical review indicates the site was vacant land prior to construction of the existing buildings in the 1960s. Occupants of the site buildings have consisted of grocery stores, retail stores, restaurants, a lawn mower sales and small engine repair facility, and the New Life Church.

The site is located approximately  $\frac{3}{4}$  mile south of the Ligonier, Indiana, central business district. Properties in the immediate site vicinity are occupied by retail stores, restaurants, automobile parts sales facilities, gasoline stations, a cemetery, residences, and apartments.

A topographic site location map and site area map are presented in **Appendix A**. Photographs of the site taken during the site reconnaissance are presented in **Appendix B**.

## 4.0 USER-PROVIDED INFORMATION

The U.S. EPA's All Appropriate Inquiry (AAI) rules places emphasis on "User" obligations. As specified in the ASTM E1527-13 standard, certain responsibilities lie with the "user" of the assessment, who is defined as the party seeking to use ASTM E1527 to complete an *environmental site assessment* of the site property and may include, without limitation, a potential purchaser, an owner of the property, a lender, a property manager, or a potential tenant of the property. The User has specific obligations for completing a successful application of the ASTM E1527-13 practice for performing certain tasks that will help identify the possibility of *RECs* in connection with the property that do not require the technical expertise of an *environmental professional*. The required tasks/information include; (1) a search for environmental cleanup liens filed or recorded against the site, (2) *Activity Use Limitations* in place on the site, (3) specialized knowledge or experience related to the property or nearby property, (4) relationship of the purchase price being paid for the property to the fair market value, if not contaminated, (5) commonly known or reasonably ascertainable information about the property, and (6) any obvious indications pointing to the presence, or likely presence, of contamination at the property. Although the AAI Rules and ASTM E1527-13 do not require the *User* to share this information with the *environmental professional*, failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

IWM Consulting provided a user information questionnaire containing the aforementioned questions to the User of this report. Ms. Karen Richmond and Mr. Donald Holsinger of KRDH, LLC, the site owners, completed the User information questionnaire and returned it to IWM Consulting prior to the generation of this report. Their responses are summarized in the following sections. A copy of the completed user questionnaire is presented in **Appendix C**.

### 4.1 Environmental Liens or Activity and Use Limitations

Ms. Richmond and Mr. Holsinger have no knowledge of environmental liens or *Activity Use Limitations* (*AULs*), such as engineering controls, land use restrictions, or institutional controls, that have been filed for, or recorded against, the site under federal, tribal, state or local law. They stated a search of land title records for environmental liens and/or *AULs* for the site has not been conducted.

### 4.2 Specialized Knowledge

Ms. Richmond and Mr. Holsinger have no specialized knowledge or experience material to identifying *RECs* related to the site.

#### **4.3 Valuation Reduction for Environmental Issues**

Ms. Richmond and Mr. Holsinger stated they have no reason to believe the purchase price for the site has been reduced in comparison to fair market value due to contamination known, or believed to be, present on the site.

#### **4.4 Commonly Known or Reasonably Ascertainable Information**

Ms. Richmond and Mr. Holsinger are not aware of any commonly known or reasonably ascertainable information that is indicative of releases or threatened releases of *hazardous substances* or *petroleum products* at the site. They have no knowledge of any obvious indicators that point to the presence or likely presence of contamination at the site.

#### **4.5 Reason for Performing Phase I**

Ms. Richmond and Mr. Holsinger stated the Phase I ESA is being conducted to as part of the due diligence requirements associated with the sale of the site.

#### **4.6 Other Information**

Ms. Richmond and Mr. Holsinger did not provide any reports of previous environmental assessments or investigations conducted for the site.

## 5.0 RECORDS REVIEW

This section presents a summary of the results of an Envirosearch Corporation (Envirosearch) regulatory database search for the site and properties within distances of the site as specified in ASTM E1527-13. A copy of the database report is provided in the **Appendix D**. Identification or confirmation of database listings shown as “unmappable or orphan sites” was out-of-scope. Local government inquiries are presented in *Section 8.2 – Interviews with Local Government Officials*. When referring to “up-gradient, cross or side-gradient and down-gradient,” this usage refers only to the topographic gradient. Groundwater gradient and flow direction often mirror topography (actual groundwater gradient and flow direction cannot be confirmed without information obtained from on-site or nearby wells).

The names listed for the registered facilities and/or incidents in the following sections are those presented in the Envirosearch database report. Facilities registered in more than one database may have different facility names reported in the databases. Databases included in the Envirosearch report that are supplemental to the databases required by ASTM E1527-13 were reviewed for the site address only.

### 5.1 Federal Database Review

| Federal Database Title and ASTM Search Distance                                                                                    | Site Listed (Y/N) | Area Facilities Listed (0/#) |

| <b>Emergency Response Notification System (ERNS)</b><br>Search Distance – Site only                                                | N                 | 0                            |
| <b>Federal Institutional Control/Engineering Control Registries</b><br>Search Distance – Site only                                 | N                 | 0                            |

Details provided for the listed facilities are summarized in the following sections.

### 5.1.1 Site Listings

Family Dollar Store 7021 located at 1352 Lincolnway South at the site is registered as a conditionally exempt small quantity generator of hazardous wastes under RCRA (EPA ID INR000139980). This facility is also registered in the Environmental Compliance History On-line (ECHO) database and in the Facility Registry System (FRS) in association with the RCRA registration. This registration is associated with the disposal of defective containers or unsold household chemicals and cleaning supplies at the Family Dollar Store. No significant quantities of hazardous wastes are generated by the site facility. Based on this information, this listing is not a *REC* for the site.

### 5.1.2 Adjacent Property Listings

CVS Pharmacy #6500 located at 101 West US Highway 6, adjacent to the south and up-gradient from the site, is registered as a large quantity generator of hazardous wastes under RCRA (EPA ID IND984971291). Hazardous wastes generated at this facility include pharmaceutical wastes, ignitable wastes, broken fluorescent bulbs, corrosive wastes, toxic solids, oxidizing liquids, and medical wastes. No violations of RCRA regulations or releases of hazardous wastes have been reported for this facility. Based on this information, this facility is not a *REC* for the site.

### 5.1.3 Site Area Listings

No other facilities within the distances specified in ASTM E1527-13 were listed on the reviewed Federal databases.

## 5.2 State Database Review

| State & Tribal Database Title and ASTM Search Distance                                                                 | Site Listed (Y/N) | Area Facilities Listed (0/#) |
|------------------------------------------------------------------------------------------------------------------------|-------------------|------------------------------|

| <b>State &amp; Tribal Voluntary Remediation Program (VRP)</b><br>Search Distance – ½ mile                              | N                 | 0                            |
| <b>State &amp; Tribal Brownfield Sites</b><br>Search Distance – ½ mile                                                 | N                 | 0                            |
| <b>State &amp; Tribal Spills</b><br>Search Distance – Site and Adjoining Properties                                    | N                 | 0                            |

Details provided for the listed facilities are summarized in the following sections.

### **5.2.1 Site Listings**

The site was not listed on any of the reviewed State databases.

### **5.2.2 Adjacent Property Listings**

**UST Facility.** Lassus #44 located at 100 US Highway 6 West, adjacent to the southeast and cross-gradient to down-gradient from the site, is registered as UST facility 3116. Provided information shows that three (3) 6,000-gallon gasoline USTs are currently in use at this facility and one (1) 550 gallon used oil UST was removed from the facility in 1989. Review of documents on the Indiana Department of Environmental Management (IDEM) Virtual File Cabinet (VFC) shows the 6,000-gallon USTs were installed in 1965 and were relined in 1989. No releases from the USTs have been reported. Based on this information, these USTs are not a *REC* for the site.

**UST Facility/LUST Release Incident.** Yoders Service located at 101 US Highway 6 West, adjacent to the south of the site across US Highway 6 and down-gradient from the site, is registered as UST Facility ID 7399. Review of documents on the IDEM VFC indicates one (1) 1,000-gallon UST and two (2) 500-gallon USTs for unknown substances and one (1) 550 gallon used oil UST were removed from this property in 2006. Evidence of a petroleum release was discovered on the property during the UST removal and LUST ID 200610512 was assigned for the release. Petroleum contaminants in the soil were found to be below the Risk Integrated System of Closure (RISC) Industrial Default Closure Levels (IDCLs). Groundwater monitoring was conducted at the site and the concentrations of benzene, toluene, ethylbenzene, xylenes, and methyl tertiary butyl ether (BTEX/MTBE) were below their RISC Residential Default Closure Levels for five (5) consecutive quarters. Groundwater flow was shown to be to the southeast, away from the site. Based on the laboratory testing results, IDEM issued No Further Action (NFA) Status pursuant to RISC Guidance for the release incident. Based on the current status for the USTs and release incident on this property and the reported groundwater flow direction beneath the property, these USTs and the associated release incident are not *RECs* for the site.

**UST Facility/LUST Release Incident.** Heide's Corner formerly located at 101 US Highway 6 East on the northeast corner of US Highway 6 and Lincolnway, adjacent to the southeast and down-gradient from the site, is registered as UST facility ID 14833. Records indicate that one (1) 6,000-gallon gasoline UST, two (2) 2,000-gallon gasoline USTs, one (1) 3,000-gallon gasoline UST, one (1) 4,000-gallon gasoline UST, and one (1) 550-gallon diesel fuel UST were removed from the property in 1993. An investigation conducted in 1990 identified petroleum contamination in the groundwater beneath the property and Incident Number 199010505 was assigned for the release. The groundwater flow direction beneath this property was found to be to the northeast, away from the site. Additional investigation was requested by IDEM, but the site owner had filed for bankruptcy and no reports of additional investigation or remedial activities at the property are posted in the VFC. The status of the release incident is Active. Based on the reported groundwater flow direction beneath the property to the northeast, this facility and the associated release incident are not *RECs* for the site.

**UST Facility.** Casey's General Store #3208/Dale's Floral and Gift Shop located at 1304 Lincolnway South, adjacent to the northeast and down-gradient from the site, is registered as UST Facility ID 17888. Review of documents on the IDEM VFC shows that one (1) 1,500-gallon gasoline UST and one (1) 1,000-gallon UST for unknown substances were removed from Dale's Floral and Gift Shop on this property in 1963. One (1) 20,000-gallon gasoline UST, one (1) 12,000-gallon gasoline UST, and one (1) 8,000-gallon diesel fuel UST were installed at the Casey's General Store facility on this property in 2012 and are currently in use. No releases from the USTs have been reported. Based on the reported statuses of the USTs and the down-gradient location of the property from the site, this facility is not a *REC* for the site.

### 5.2.3 Site Area Listings

**Leaking UST Release Incidents.** The following properties within 0.5 mile of the site are registered on the LUST List:

| Facility Name                                       | Distance/Gradient from Site          | Incident Number | Media Affected | Status                                    |
|-----------------------------------------------------|--------------------------------------|-----------------|----------------|-------------------------------------------|
| Speedway 8066<br>100 East US Highway 6              | 300 feet southeast/<br>Down-gradient | 199011509       | Soil only      | Deactivated – No Release Confirmed        |
| Emro Marketing United 6081<br>1100 Lincolnway South | 0.2 mile north/<br>Down-gradient     | 199506517       | Soil only      | No Further Action – Unconditional Closure |

Based on the reported statuses for these release incidents and the down-gradient location of the properties relative to the site, these release incidents are not RECs for the site.

## 6.0 PHYSICAL SETTING INFORMATION REVIEW

The following section presents information as to the site's physical setting. Note the terms "up-gradient, cross or side-gradient and down-gradient" may be used in this report and refer to the topographic gradient. Groundwater flow direction and gradient often mirror topography. However, the groundwater flow direction and the depth to any shallow groundwater may vary based upon many factors, including seasonal changes (e.g., precipitation amounts), subsurface soil types and conditions, and the depth to the soil/bedrock interface. Actual groundwater gradient, depth, and flow directions cannot be confirmed without information obtained from groundwater monitoring wells installed on the site and/or nearby properties.

### 6.1 Topographic Map Information

The site is part of the southeast  $\frac{1}{4}$  of the southwest  $\frac{1}{4}$  of Section 27, Township 35 North, Range 8 East in Noble County as shown on the Ligonier, Indiana 7.5-minute series topographic quadrangle map prepared by the United States Geological Survey. The elevation of the site ranges from approximately 915 to 930 feet above mean sea level. The topography of the site and the surrounding area is generally level except for a mounded area near the center of the west site boundary. A copy of the topographic map for the site area is presented in **Appendix A**.

### 6.2 Surface Water Characteristics

The nearest surface water feature to the site is Indian Lake, located approximately 1,000 feet east and down-gradient of the site. Other surface water features near the site include the Elkhart River, located approximately 3,500 feet northeast and down-gradient of the site. Review of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for the site area, the site is not located within the 100-year or 500-year flood plains of the area surface water features.

### 6.3 Soil and Bedrock Characteristics

According to the United States Department of Agriculture Soil Survey of Noble County, Indiana, the subject site is located on the Fox-Oshtemo soil association. These soils are well drained, nearly level to moderately steep soils that have a moderately coarse textured to moderately fine textured subsoil and are moderately deep and deep over sand and gravel. These soils are located on outwash plains and uplands. The specific soil types on the site were identified as follows:

**Fox sandy loam, till plain, 0 to 2 percent slopes** - This soil is located on the south portion of the site and is composed of sandy loam, sandy clay loam, gravelly loam, and stratified sand to gravel. It varies in depth from 0 inches to 79 inches. The Soil Survey indicates the permeability of this soil is moderately high to high. The risk of corrosion to uncoated steel in this soil is rated as high.

**Fox sandy loam, till plain, 2 to 6 percent slopes** - This soil is located on the northeast portion of the site and is composed of sandy loam, sandy clay loam, gravelly loam, and stratified sand to gravel. It varies in depth from 0 inches to 79 inches. The Soil Survey indicates the permeability of this soil is moderately high to high. The risk of corrosion to uncoated steel in this soil is rated as high.

**Warsaw loam, 0 to 2 percent slopes** - This soil is located on the northwest portion of the site and is composed of loam, sandy clay loam, gravelly sandy clay loam, and stratified sand to gravelly coarse sand. It varies in depth from 0 inches to 60 inches. The Soil Survey indicates the permeability of this soil is moderately high to high. The risk of corrosion to uncoated steel in this soil is rated as high.

The Bedrock Geologic Map of Indiana shows bedrock beneath the site is the Ellsworth Shale of Devonian Age. The Ellsworth Shale consists of green shale with some black shale in the lower part. The depth to bedrock near the site is approximately 300 feet.

#### **6.4 Groundwater Characteristics**

Information regarding groundwater conditions specifically for the site is not readily available. Groundwater in the site area is obtained from surficial sand and gravel aquifers and buried sand and gravel aquifers. The surficial sand and gravel aquifers consist mostly of outwash, outwash-fan deposits, isolated hills and ridges of ice-contact stratified drift, and Holocene alluvium. Thicknesses of surficial sand and gravel aquifers range from a few feet to 160 feet. Precipitation is the principal source of recharge to the surficial sand and gravel aquifers. Yields from wells in the surficial sand and gravel aquifers range from 25 to 2,000 gallons per minute. The buried sand and gravel aquifers are composed of outwash-related material. Much of the buried sand and gravel aquifer lies beneath the surficial sand and gravel aquifer. A clay layer of variable thickness separates the two (2) aquifers. Yields from wells in the buried sand and gravel aquifers range from 25 to 1,000 gallons per minute.

## **7.0 HISTORICAL INFORMATION REVIEW**

This section presents historical information that is both reasonably ascertainable and readily available as per ASTM guidelines in order to reveal the site's obvious usage from 1940 or its first developed use, whichever is earlier. Reasonable attempts were made to interview those with historical information about the site. Historical records review for non-adjoining properties was out-of-scope.

### **7.1 Site Ownership**

According to information obtained from the Noble County, Indiana Noble County on-line Geographic Information System (GIS), the site is currently owned by KRDH, LLC.

KRDH LLC acquired the 2.79 acre parcel number 57-01-27-300-309.000-014 from Lucille Holsinger in 2015. Lucille Holsinger acquired the parcel from Harry Holsinger in 2011.

KRDH LLC acquired the 1.99 acre parcel number 57-01-27-300-308.000-014 from Donald Holsinger in December 2011. Donald Holsinger acquired the parcel from Lucille Holsinger in November 2011.

KRDH LLC acquired the 0.62 acre parcel number 57-01-27-300-3095.000-014 from Lucille Holsinger in 2015. Lucille Holsinger acquired the parcel from Farmers State Bank in 2011. Farmers State Bank acquired the parcel from Anthony Owsley in 2010 and Anthony Owsley acquired the parcel from Chester A. Reid in 2002.

Property transfer records were not reviewed to determine the names of site owners prior to those listed in the GIS records. No obvious environmental concerns are associated with the names of the listed owners from the GIS records.

### **7.2 Aerial Photographs**

Aerial photographs depicting the site area for the years 1948, 1951, 1957, 1960, 1973, 1981, 1986, 1998, 2003, 2005, 2010, and 2016 were obtained from Historical Information Gatherers (HIG) of Hopkins, Minnesota. The aerial photographs are described below. Note that the scale and clarity of aerial photographs necessarily affect and limit evaluation of features and conditions that may be depicted. Copies of the provided aerial photographs are presented in **Appendix E**.

The 1948 and 1951 photographs show the site as mostly vacant agricultural land, with a small driveway traversing the northeast corner. Lincolnway South was located along the east site boundary and US Highway 6 was located along the south boundary. A commercial building was located adjacent to the north of the northeast corner of the site. The properties adjacent to the northwest and west of the site were vacant agricultural land, and a cemetery was located adjacent to the east. Two (2) small commercial facilities were located on the property adjacent to the south of the site and the facility to the southwest appears to be a gasoline station. Properties

farther east, west, and south of the site were mostly vacant land. Vacant land and residences were located farther north.

The 1957 photograph shows the site and adjacent properties mostly unchanged from 1951 except for the construction of what appears to be a gasoline station adjacent to the southeast of the site at the intersection of Lincolnway and US Highway 6. Minor commercial development had taken place farther southeast and southwest of the site along Highway 6 and farther south along Lincolnway South. Residential development had taken place farther northwest of the site.

The 1960 photograph shows the site and surrounding properties mostly unchanged since 1957 except for a circular drive that was constructed on the southeast portion of the site. What appear to be semi-truck trailers were parked along the west side of the drive.

The 1973 and 1981 photographs show the site improved with two (2) large commercial buildings on the central and southwest portions and a smaller commercial building on the south-central portion. The southeast portion of the site not covered by the buildings was paved. The north portion of the site had remained vacant land. The properties adjacent to the site were mostly unchanged from 1960 except for the construction of a small commercial building west of the south portion of the site. What appear to be gasoline stations are again visible to the southeast and south of the site. Some commercial development had occurred farther north of the site along Lincolnway South, and a small mobile home park had been constructed farther to the west.

The 1986 photograph shows the commercial building on the central portion of the site had been expanded to the south. The remaining areas of the site and the properties adjacent to the site were mostly unchanged from 1981. What appear to be gasoline stations are again visible southeast and south of the site. Commercial development had taken place farther to the west of the site.

The 1998 and 2003 photographs show the site mostly unchanged from 1986. A new commercial building had been constructed on the property adjacent north of the northeast corner of the site. The properties adjacent to the east, west, and south of the site were mostly unchanged since 1986. Significant commercial and residential development had taken place farther to the northwest of the site, and some commercial development had taken place farther north. What appear to be gasoline stations are again visible to the southeast of the site.

The 2005 photograph shows the site and the properties adjacent to the north, east, and south mostly unchanged from 2003. A commercial building had been constructed on the property adjacent to the northwest of the site, and the property adjacent to the west of the north portion of the site was under development. Properties farther from the site were mostly unchanged from 2003.

The 2010 and 2016 photographs show the site mostly unchanged from 2005. The northwest portion of the site had become overgrown with trees. The properties adjacent to the north and east of the site were mostly unchanged from 2005. A residential neighborhood had been constructed on the property adjacent to the west of the north portion of the site. What appears to be a gasoline station is visible on the property adjacent to the southeast of the site. The property

adjacent to the south of the site across Highway 6 had been redeveloped with a commercial facility. Properties farther from the site were mostly unchanged from 2005.

The provided aerial photographs show the site was mostly undeveloped through the 1960s. Three (3) commercial buildings were constructed on the south portion of the site in the 1960s. The site remained mostly unchanged through 2016 except that the northwest portion of the site became overgrown with trees. No obvious environmental concerns are visible on the site on the reviewed photographs. Environmental concerns on the properties adjacent to the site consist of what appear to be gasoline stations to the southeast and south of the site from the 1950s through 2016.

### 7.3 City Directories

City directory listings for the site and surrounding properties along Lincolnway South and US Highway 6 West were obtained from HIG. Listings from the years 1999, 2007-08, and 2010-11 were provided by HIG. Copies of the provided directory listings are presented in **Appendix F**. The listed occupants of the site and adjacent properties are summarized below. Note that the site address may or may not appear in the provided directory listings.

The site address of 1350 Lincolnway South was occupied by Freed's IGA grocery store in 1999, and by Family Dollar Store and Kaiser Supermarket in 2007-08. This address was not listed in the 2010-11 directory.

The site address of 1352 Lincolnway South was occupied by Stickley Hardware in 1999, and by Ace Hardware in 2007-08 and 2010-11.

No other site occupants were listed for the site addresses along Lincolnway South.

The site address of 150 West US Highway 6 was occupied by the Dari Point restaurant in 1999, 2007-08, and 2010-11.

The site address of 200 West US Highway 6 was occupied by Reid's Lawn Mower Shop in 1999, Hastings Real Estate and Tony's Small Engine in 2007-08, and by Tony's Small Engine in 2010-11.

No other site addresses along West US Highway 6 were included in the provided directories.

Potential environmental concerns associated with the listed site occupants consist of the likely use of *petroleum products* and *hazardous substances* at the lawn mower shop and small engine shop at 200 West US Highway 6.

Listed occupants of the properties adjacent to the site included gasoline stations, restaurants, auto parts and supply stores, realtors, a florist, and other retail stores. Environmental concerns

associated with the properties adjacent to the site include the gasoline storage and dispensing at the gasoline station adjacent to the southeast of the site.

#### **7.4 Historical Fire Insurance Maps**

Historical Sanborn fire insurance maps for Ligonier were reviewed on the Indiana University Union List of Sanborn Maps and at the Allen County Public Library in Fort Wayne, Indiana. The site and adjacent properties are not included on the available Sanborn fire insurance maps.

## 8.0 RECONNAISSANCE

This section presents information gathered during the reconnaissance of the site and adjoining properties. This non-invasive reconnaissance was conducted to observe accessible and representative portions of the site for evidence of *RECs*. The following indicators of *RECs*, as per ASTM guidelines, were the focus of this reconnaissance: stained soils, stressed vegetation, transformers, evidence of above ground or underground storage tanks, trash and debris, and use and/or storage of hazardous substances or petroleum products. IWM Consulting also interviewed (or made reasonable attempts to do so) the site representative identified by the Client to gain more information about the site uses and environmental issues, if known by the interviewee.

The reconnaissance was conducted on October 25, 2018 at approximately 10:00 a.m. by Hugh Smith of IWM Consulting. Mr. Donald Holsinger of KRDH, LLC, the site owner, arranged access to the site. Mr. Smith was unaccompanied during the inspection of the site facility. Weather conditions were cloudy, with the temperature near 40 degrees Fahrenheit.

The inspection consisted of accessing the on-site buildings and noting interior conditions. Readily accessible areas of building interiors were inspected; however, inaccessible areas (such as crawl spaces, pipe chases, false ceilings, attics, roofs, etc.) were not inspected as a part of this assessment. Inspection of the exterior portions of the site consisted of walking the site on a crossing pattern to provide overlapping fields of view of the ground surface. The northwest portion of the site is covered with a dense overgrowth of trees and brush that limited access to those areas and prevented a thorough inspection of the overgrown area.

### 8.1 General Site Setting

The site is located approximately  $\frac{3}{4}$  mile south of the Ligonier, Indiana, central business district. Properties in the immediate site vicinity are occupied by retail stores, restaurants, automobile parts sales facilities, gasoline stations, a cemetery, residences, and apartments.

Access to the site is from Lincolnway South, located east of the site, and from US Highway 6, located south of the site. The site consists of 5.4 acres and is improved with three (3) commercial buildings. The site is occupied by a Family Dollar Store, an Ace Hardware store, Dari Point restaurant, and the Iglesia Nueva Vida/New Life Church. A Site Area Map showing details of the site and adjacent properties is presented in **Appendix A**. Photographs of the site and the surrounding properties are presented in **Appendix B**.

The City of Ligonier provides water and sewer services for the site. No evidence of water wells or septic systems was observed on the site. Indiana Michigan Power provides electricity for the site and the Northern Indiana Public Service Company (NIPSCO) provides natural gas.

### **8.1.1 Site Structure Descriptions**

A large one-story retail commercial building located on the central portion of the site is occupied by the Family Dollar Store and Ace Hardware. This building contains approximately 17,403 square feet of floor space and appeared to be in good condition. Property assessment records show the building was constructed in 1956, but historical aerial photographs indicate the building was constructed in the 1960s. Exterior construction consists of a concrete slab-on-grade foundation, masonry walls, and a flat membrane roof. Interior construction consists of vinyl tile and concrete floors, masonry, wood, and gypsum board walls, and suspended acoustical tile ceilings. The building is heated with natural gas fueled furnaces and cooled with electric air conditioning units. The north 11,693 square feet of the building are occupied by the Family Dollar Store, discount department store, and the south 5720 square feet of the building are occupied by the Ace Hardware store. Mr. Holsinger stated that this building has always been occupied by grocery stores and retail stores.

A small one-story commercial restaurant building is located on the south-central portion of the site. This building contains 2,048 square feet of floor space and appeared to be in good condition. Property assessment records show that this building was constructed in 1964. Exterior construction consists of a concrete slab-on-grade foundation, masonry and metal walls, and a metal and membrane roof. Interior construction consists of vinyl tile floors, painted gypsum board and wood and Formica panel walls, and a suspended acoustical tile ceiling. Food preparation and storage areas are located in the north portion of the building and customer seating is located in the south portion. This building is heated with a natural gas fueled furnace and is cooled with an electric air conditioning unit. Ms. Ann Peterson, the owner of the Dari Point restaurant stated that she had purchased the restaurant from her brother and sister approximately 25 years ago and the building has always been used as a restaurant.

A one-story commercial/industrial building is located on the southwest corner of the site. This building contains 10,000 square feet of floor space and appeared to be in good condition. Property assessment records show this building was constructed in 1964. Exterior construction consists of a concrete slab-on-grade foundation, metal walls, and a metal roof. The majority of the building interior is unfinished, with approximately 1,200 square feet of finished area in the south end of the building. Interior construction of the finished area consists of vinyl tile floors, painted gypsum board walls, and attached acoustical ceiling tiles. The building is heated with a natural gas furnace and space heaters and is cooled with an electric air conditioning unit. This building is currently occupied by the Iglesia Nueva Vida/New Life Church, but was formerly occupied by a lawn mower sales company and small engine repair service. No evidence of the storage or use of *hazardous substances* or *petroleum products* was observed in this building. The floors were clean and in good condition. No floor drains are located inside the building.

### **8.1.2 Site Observations**

The south portion of the site not covered by the buildings is paved with asphalt for vehicle parking, with an asphalt paved drive extending north from the northeast corner of the parking lot to the property adjacent to the north. The north portion of the site is vacant land.

The northwest portion of the site is densely overgrown with trees and brush. A mound of soil approximately 10 feet high and covering an area approximately 130 feet from north to south and 30 from east to west is located in the southwest corner of the overgrown area, near the center of the west site boundary. The mound is also overgrown with trees and brush. Mr. Holsinger stated that the Indiana State Police formerly occupied the property currently occupied by a McDonald's restaurant on the property adjacent to the north of the site and that the mound of soil was used as a shooting range for the police. He stated that no investigations or testing of the soil in the mounded area has been conducted. No soil staining, odors, stressed vegetation, or other evidence of *hazardous substances* or *petroleum products* were observed on or around the soil mound.

Three (3) pole mounted electrical transformers are located near the center of the site at the northwest corner of the large retail/commercial building. Two (2) of the transformers are labeled as not containing polychlorinated biphenyls (PCBs), but the third transformer is not labeled. The transformers appeared to be in good condition and no evidence of releases of coolant oil from the transformers was observed. Tags on the utility pole for the transformers indicates the transformers are owned by the Indiana Michigan Power Company, which is responsible for the cleanup of any releases of materials from their equipment. No other equipment suspected to contain PCBs was observed on the site.

Three (3) storm water drains are located on the south site boundary along US Highway 6, one (1) storm water drain was observed on the east site boundary along Lincolnway South, one (1) storm water drain was observed east of the southwest church building, and two (2) drainage tiles were observed near the center of the site on the north side of the site buildings. No evidence of the disposal of *hazardous substances* or *petroleum products* to the drains was observed.

A used cooking grease barrel is located outside the north wall of the small restaurant building on the south-central portion of the site. The grease barrel is labeled for used cooking grease only and is serviced by Darling International. No evidence of the disposal of *hazardous substances* or *petroleum products* into the grease barrel was observed.

No evidence of the use and/or storage of *hazardous substances* or *petroleum products* was observed on the site.

No evidence of USTs or ASTs was observed on the site.

No strong, pungent, or noxious odors were observed on the site.

No pools of liquid were observed on the site.

No drums or containers with *hazardous substances* or *petroleum products* were observed on the site.

No stained soil and/or pavement was observed on the site. No staining or corrosion was observed on floors, walls, or ceilings of the site buildings.

No stressed vegetation was observed on the site.

No evidence of the disposal of solid waste was observed on the site and no evidence of fill material from an unknown origin was observed.

No evidence of wells (including dry wells, irrigation wells, injection wells, abandoned wells, monitoring wells, or other wells) was observed on the site.

## 8.2 Reconnaissance: Descriptions of Adjoining Properties

Current uses of adjoining properties were assessed via visual reconnaissance from the subject site and/or public right-of-way areas. Details and orientations of these properties are depicted on the site area map presented in **Appendix A**. Observed uses of adjoining properties and observable evidence of environmental concerns or *RECs* are described as follows:

**North Adjoining Property.** The adjoining property north of the site is occupied by the Town Village Apartments to the northwest and by a McDonald's Restaurant to the northeast. A Casey's General Store convenience store and gasoline station is located farther northeast on the north side of the McDonald's Restaurant. A storm water retention pond is located on the west end of the McDonald's property. No staining, odors, stressed vegetation, or other evidence of *hazardous substances* or *petroleum products* were observed on or around the retention pond. Gasoline USTs and fuel dispensing equipment were observed at the Casey's General Store, but no evidence of releases of hazardous substances or petroleum products on the property was observed. *RECs* were not observable on these properties as viewed during the site inspection. These properties are located topographically cross-gradient to down-gradient from the site.

**East Adjoining Property.** Lincolnway South is located along the east site boundary. The property adjacent to the east of the site, across Lincolnway South, is occupied by the Oak Park Cemetery. *RECs* were not observable on this property as viewed during the site inspection. This property is located topographically down-gradient from the site.

**West Adjoining Property.** The adjoining property west of the north portion of the site is occupied by single-family residences. The adjoining property west of the south portion of the site is occupied by Starters/Alternators Sales and Service. *RECs* were not observable on these properties as viewed during the site inspection. These properties are located topographically up-gradient from the site.

**South Adjoining Property.** The adjoining property southeast of the site, on the northwest corner of Lincolnway South and US Highway 6, is occupied by a Lassus Handy Dandy convenience store and gasoline station. Gasoline USTs and fuel dispensing equipment are located on this property, but no evidence of releases of hazardous substances or petroleum products was observed. The property adjacent to the south of the site, across US Highway 6, is occupied by a CVS Pharmacy, with a KFC/Taco Bell restaurant to the southwest. *RECs* were not observable on these properties as viewed during the site inspection. These properties are located topographically cross-gradient to down-gradient from the site.

## 9.0 INTERVIEWS

Reasonable attempts were made to interview those with information concerning the site's past and current uses and environmental issues or problems, if any. Completed interviews are summarized below. Records of communication are presented in **Appendix G**.

### 9.1 Interview with Owner, Site Manager and/or Occupants

Mr. Don Holsinger of KRDH, LLC, the site owner, was interviewed. Mr. Holsinger stated the buildings on the site were constructed in the 1960s. The large retail commercial building on the site was a grocery store until the Family Dollar Store and Ace Hardware store moved in in the 2000s. The south-central building has always been a restaurant. The southwest building was formerly occupied by a lawn mower sales and small engine repair company until the New Life Church moved into the building. He stated no bulk storage of chemicals or *petroleum products* had been located at the lawn mower/small engine repair company and no releases of *hazardous substances* or *petroleum products* had occurred at the facility. Mr. Holsinger stated that the Indiana State Police formerly occupied the property currently occupied by the McDonald's restaurant on the property adjacent to the north of the site and that the mound of soil in the wooded area in the wooded area of the site, near the center of the west site boundary, was used as a shooting range for the police. He stated that no investigations or testing of the soil in the mounded area has been conducted.

Mr. Kevin Straight with Family Dollar was interviewed. Mr. Straight stated that the registration of the Family Dollar store on the site as a conditionally exempt generator of hazardous wastes is primarily a formality in order to deal with the disposal of defective containers or unsold household chemicals and cleaning supplies at the Family Dollar Store. He stated the registration is not associated with any significant generation of hazardous wastes at the site facility.

### 9.2 Interview with Local Government Officials

Personnel with the Ligonier Fire Department were interviewed. They stated that the large retail/commercial building on the site was formerly a grocery store before becoming a Family Dollar Store and Ace Hardware. They stated the southwest building was a small engine repair facility before becoming a church. They stated that no USTs or other bulk storage of chemicals or *petroleum products* were located at the engine repair facility, and no spills or releases of *hazardous substances* or *petroleum products* were reported at the facility. The south-central building on the site has always been a restaurant to the best of their knowledge. The Fire Department personnel are not aware of any environmental concerns at the site property.

## 10.0 TIER 1 VAPOR ENCROACHMENT SURVEY

A *Tier 1 VES* was conducted for the site to determine if current or historical practices at the site and surrounding properties may have resulted in a *VEC* at the site. The *VES* was conducted in accordance with ASTM Standard E2600-10. The objective of a *VES* is to determine if a *VEC* exists, likely exists, or cannot be ruled out and provide information to support those conclusions. The Tier 1 screening consisted of an evaluation of the existing and planned use of the site; the types of structures existing or planned on the site; Federal, state, and tribal government records for the site area to identify potentially contaminated property sources with *COC* on or within the *area of concern (AOC)*; historical records related to prior use of the site and surrounding properties to identify known or potentially contaminated property sources having *COC*; the general physical setting information; and natural and man-made conduits that can serve as preferential pathways.

The *VES* consisted of a review of the regulatory agency database records noted in Section 5.0 of this report for properties located in the *AOC*, a review of current and historical property use information, and a review of User provided information regarding the site usage and conditions. The *AOC*, also referred to as the *approximate minimum search distance*, is 1/3 of a mile for *COC* and 1/10 of a mile for petroleum hydrocarbon *COC* and may be reduced based on factors such as groundwater flow direction, hydrogeological and hydrologic considerations, subsurface geologic features, topographical gradients, and/or available groundwater flow information.

Properties within the *AOC* that are registered on the reviewed databases are evaluated to determine whether or not *COC* are likely to be present. If known, groundwater flow direction, depth to groundwater, the presence of vapor conduits that may result in preferential pathways, the cleanup status for a contaminated property, and soil characteristics are evaluated to determine if a *VEC* at the site (1) exists, (2) is likely to exist, (3) cannot be ruled out, or (4) does not exist.

A *VES* was completed for the site and surrounding properties utilizing the standard environmental record sources described above. Based on the site observations and review of regulatory agency databases, a *VEC* does not currently exist at the site.

## 11.0 DATA GAPS

ASTM E1527-13 defines a *data gap* as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” IWM Consulting conducted this Phase I ESA for the site and has identified the following *data gaps*:

- The historical use of the property could not be identified back to first developed use. Historical aerial photographs show the site was vacant agricultural land from at least 1948 through the early 1960s. Properties surrounding the site were mostly vacant land, with a large cemetery to the east of the site. Based on this information, the lack of information regarding site usage prior to 1948 is not a significant data gap for this Phase I ESA.
- IWM Consulting was unable to interview the previous owner. However, the current site owner stated that the property had been owned by his father. Based on this information, the lack of an interview with the previous site owner is not a significant data gap for this Phase I ESA.

## **12.0 ADDITIONAL SERVICES**

Additional services provided in the Phase I ESA Report include the following:

- Site photographs
- Site area map
- Copies of historical aerial photographs
- Copies of historical city directory listings

### **13.0 DEVIATIONS**

No deviations were incurred during the Phase I ESA activities.

## 15.0 PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property (the site)*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Copies of the environmental qualifications of the Environmental Professionals are included in **Appendix H**.

**APPENDIX C**  
**USER PROVIDED INFORMATION**

## USER INFORMATION QUESTIONNAIRE

The following questionnaire was adapted after Appendix X3 of ASTM's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, E 1527-13 and after Appendix X3 of ASTM's Standard Guide for Vapor Encroachment Screening on Property involved in Real Estate Transactions, E 2600-10. EPA's All Appropriate Inquiry (AAI) final rule states that the "user" is responsible for providing certain information to the environmental professional. The user is the party seeking to use the standard, E 1527, to complete an environmental site assessment (ESA) of the property. The user may include, without limitation, a potential purchaser, a potential tenant, an owner, a lender, or a property manager. In order to qualify for one of the Landowner Liability Protections (LLPs) the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Two of the user questions below are associated with environmental liens and Activity Use Limitations (AULs), which are an indication(s) of a release on the subject site and/or neighboring property. An environmental lien is a charge, security or encumbrance on the title of the property to secure payment of a cost, damage, debt, obligation or duty arising from response actions, cleanups or other remediation actions. An AUL may provide information on the chemicals of concern, potential for exposure and pathways, control measures, which may be used to provide access to monitoring locations or remediation equipment, or similar information and/or purposes. While some AUL information may be obtained in state and/or local records others may only exist only in project documentation, which is typically not readily available. Liens and AULs are often recorded in the land title records (as opposed to a chain of title) and can be obtained by the user's title company.

Liens and AUL information, which have been developed for the property by others and provided to IWM, will be incorporated into IWM's review; however, IWM will not perform a land title or judicial record search for the site.

The information requested in the Vapor Encroachment Screening (VES) questionnaire should be provided by the User, if known, prior to conducting the VES. If the property owner or operator is not the User, then, absent an applicable legal requirement, the property owner or operator is not required to provide any information to the User or the environmental professional conducting the VES; however, the User should still complete the questionnaire indicating that the requested information is not known by the User, if necessary. The information requested in the questionnaire is intended to assist the environmental professional in properly conducting the VES.

In order for IWM to include the aforementioned information into our opinions, documentation of this information must be provided before the report is generated and preferably before the site reconnaissance is performed. The report will state which information was, or was not, provided from the user. For your convenience a checklist of this information is presented below, which must be completed and returned to IWM. This information can be e-mailed to the appropriate project manager or faxed to IWM at (260) 471-7071.

Site Property Owner Name: \_\_\_\_\_

**PHASE I ESA USER'S QUESTIONNAIRE**

In order to qualify for protection from landowner liability under CERCLA as an *innocent landowner*, *bona fide prospective purchaser*, or *contiguous property owner*, ASTM standard practice E1527-05 and the federal AAI rule (40 CFR 312) require that the *user* of the Phase I ESA report provide certain information (if available) to the *Environmental Professional* completing the assessment. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. Information that is not or cannot be provided to the *Environmental Professional* may be identified as a "data gap" in the Phase I ESA report.

Please answer the following questions as completely as possible. Attach additional pages as needed.

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).** Are you aware of any environmental cleanup liens against the site that are filed or recorded under federal, tribal, state or local law?

\_\_\_\_\_ Yes ☒ No

If yes, please provide known details of the lien \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

Has a search of land title records for environmental liens and/or AULs been conducted for the site?

\_\_\_\_\_ Yes ☒ No

2. **Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).** Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry as applicable to the site as a result of environmental contamination, investigation, cleanup, or related matters?

\_\_\_\_\_ Yes      ☒ No

If yes, please provide known details of the AULs \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

3. **Specialized Knowledge or Experience of the person seeking to qualify for the LLP (40 CFR 312.28).** As the user of this ESA, do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property, such that you would have specialized knowledge about chemicals and processes used by this type of business?

\_\_\_\_\_ Yes      ☒ No

If yes, describe or attach details of your specialized knowledge or experience: \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

4. **Relationship of purchase price to fair market value of site if it were not contaminated (40 CFR 312.29).** Does the purchase price being paid for this site reasonably reflect the fair market value of the site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the site?

\_\_\_\_\_ Yes, I have reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the site?

☒ No, I have no reason to believe that the purchase price for the property has been reduced in comparison with the fair market value due to contamination known or believed to be present at the site?

\_\_\_\_\_ Not applicable. User is not involved in a purchase of the site.

5. **Commonly known or reasonably ascertainable information about the site (40 CFR 312.30).** Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases of hazardous substances or petroleum products at the site? For example:

Do you know the past uses of the site?

\_\_\_\_\_ Yes (describe) \_\_\_\_\_

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

☒ No

Do you know of chemicals, hazardous substances or petroleum products that are present or once were present at the site?

☐ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

☒ No

Do you know of spills or other releases of chemicals, hazardous substances or petroleum products that have taken place at the site?

☐ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

☒ No

Do you know of any environmental cleanups that have taken place at the site?

☐ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

☒ No

6. **The degree of obviousness of the presence or likely presence of contamination at the site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).** As the *user* of this ESA and based on your knowledge and experience related to the site, are there any *obvious* indicators that point to the presence or likely presence of contamination at the site?

☐ Yes (describe) \_\_\_\_\_

\_\_\_\_\_

☒ No

The following information, if available, should be provided to the *environmental professional* conducting this ESA. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. This information includes:

- Why is the Phase I ESA being performed? (e.g., to satisfy one of the requirements to qualify for Landowner Liability Protections, to reduce the uncertainty regarding the potential for Recognized Environmental Conditions in connection with the property, etc.)

\_\_\_\_\_

\_\_\_\_\_

- The type of property (e.g., agricultural, residential, commercial, industrial) and type of property transaction (e.g., sale, purchase, exchange, etc.)?

commercial Sale

- Identification of the parties who will rely on the Phase I ESA (IWM's project budget provides for one original and one copy of the report and reliance by the client and up to one additional party. Additional report copies and/or reliance by more than two parties may be prepared/granted for an additional fee).

- Identification of the site contact and how the contact may be reached.

- Any other *user* knowledge or experience with the site that may be pertinent to the *environmental professional* (e.g., copies of any available prior environmental site assessment reports, documents, correspondence, etc., concerning the site and its environmental condition). If possible, please provide copies of available reports and/or documents to IWM for review.

**VAPOR ENCROACHMENT SURVEY USER'S QUESTIONNAIRE**

1. Property Type:

☒ Commercial    ☐ Industrial    ☐ Residential    ☐ Multi-tenant    ☐ Vacant Land

2. Are there any buildings on the site property?

☒ Yes    ☐ No    ☐ Unknown

If yes, what is the type of construction?

stick built / block / metal buildings

3. Will buildings/structures be constructed on the site in the future?

☐ Yes    ☐ No    ☒ Unknown

If yes, what is the type of construction?

\_\_\_\_\_

4. If buildings exist or are proposed, do/will they have elevators?

☐ Yes    ☒ No    ☐ Unknown

5. Type of level below grade (existing or proposed)?

☐ Full Basement    ☐ Crawl Space    ☒ Slab on Grade    ☐ Parking Garage    ☐ Multi-level

6. Ventilation in level below grade?

☐ Yes    ☐ No    ☒ Unknown

7. Sump pumps, floor drains, or trenches (existing or proposed)?

☐ Yes    ☒ No    ☐ Unknown

8. Radon or methane mitigation system installed?

☐ Yes    ☐ No    ☒ Unknown

9. Heating system type (existing or proposed)? Check all that apply.

|                                                 |                                              |                                             |
|-------------------------------------------------|----------------------------------------------|---------------------------------------------|
| <input type="checkbox"/> Kerosene Heater        | <input type="checkbox"/> Fireplace           | <input type="checkbox"/> Radiant Floor Heat |
| <input type="checkbox"/> Fuel Oil Furnace       | <input type="checkbox"/> Electric Baseboard  | <input type="checkbox"/> Heat Pump          |
| <input type="checkbox"/> Wood Stove             | <input type="checkbox"/> Steam Radiation     | <input type="checkbox"/> Coal Furnace       |
| <input checked="" type="checkbox"/> Gas Furnace | <input type="checkbox"/> Hot Air Circulation | <input type="checkbox"/> Hot Air Radiation  |
| <input type="checkbox"/> Hot Water Radiation    | <input type="checkbox"/> Other               |                                             |

10. Type of fuel energy (existing or proposed)? Check all that apply.

- ☒ Natural Gas    ☐ Electric    ☐ Propane    ☐ Fuel Oil  
☐ Kerosene    ☐ Wood    ☐ Coal    ☐ Solar    ☐ Other

11. Have there ever been any environmental problems at the site?

- ☐ Yes    ☒ No    ☐ Unknown

If yes, please describe?

---

---

12. Does/will a gasoline station or laundry dry cleaning facility operate anywhere on the site?

- ☐ Yes    ☒ No    ☐ Unknown

13. Do any tenants use hazardous chemicals in relatively large quantities on the site?

- ☐ Yes    ☒ No    ☐ Unknown

If yes, please describe?

---

---

14. Have any tenants ever complained about odors in the on-site building (if present) or experienced health-related problems that may have been associated with the building?

- ☐ Yes    ☒ No    ☐ Unknown    ☐ Not applicable (no buildings present)

15. Are operations (or proposed operations) performed on the site regulated under OSHA?

- ☐ Yes    ☒ No    ☐ Unknown

16. Are there any existing or proposed underground storage tanks (USTs) or aboveground storage tanks (ASTs) on the site?

- ☐ Yes    ☒ No    ☐ Unknown

If yes, please describe?

---

---

17. Are there any sensitive receptors (e.g., children, elderly, people in poor health, etc.) that occupy or will occupy the site?

- ☐ Yes    ☒ No    ☐ Unknown

### Source Description :

IN-TEMPO is Indiana's central repository for facility data and includes permits, surveillance, enforcement, and remediation information.

### Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

**Source Description :**

IN-TEMPO is Indiana's central repository for facility data and includes permits, surveillance, enforcement, and remediation information.

**Source Description :**

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

**Source Description :**

The Indiana Department of Environmental Management (IDEM) implemented the IN-FRS, which provides the interface and processes to link facility data monitored by multiple State and EPA program systems. In addition, IN-FRS enables IDEM to reconcile environmental data and exchange it with EPA FRS using the electronic data exchange over the Network Node.

**FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST**

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 08/03/2018  
Agency Update Frequency: Varies  
Planned Next Contact: 12/21/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 215-814-2469  
Most Recent Contact: 10/12/2018

RCRA\_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 08/03/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 12/21/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 215-814-2469  
Most Recent Contact: 10/12/2018

**FEDERAL CERCLIS LIST**

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/26/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 11/12/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 800-424-9346  
Most Recent Contact: 09/03/2018

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 07/26/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 11/12/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 800-424-9346  
Most Recent Contact: 09/03/2018

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 07/26/2018  
Agency Update Frequency: Varies  
Planned Next Contact: 11/12/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 703-603-8712  
Most Recent Contact: 09/03/2018

SEMS\_8R\_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 07/26/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 11/12/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 703-603-8867  
Most Recent Contact: 09/03/2018

SEMS\_8R\_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 07/26/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 11/12/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 703-603-8867  
Most Recent Contact: 09/03/2018

**FEDERAL RCRA CORRACTS FACILITIES LIST**

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 08/03/2018  
Agency Update Frequency: Quarterly  
Planned Next Contact: 12/21/2018

Agency: U.S. Environmental Protection Agency  
Agency Contact: 202-566-1667  
Most Recent Contact: 10/12/2018

**FEDERAL DELISTED NPL SITE LIST**

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 07/26/2018  
Agency Update Frequency: Quarterly

**RECORDS OF COMMUNICATION**

---

**Record of Communication**

---

Record #1                      Date: 11/6/2018                      Time: 1:40 p.m.                      Project #: 18-685-10

Name: Mr. Don Holsinger, Site Owner                      Phone# (260) 856-2380

Company: KRDH, LLC

From: Mr. Hugh Smith                      IWM Consulting Group, LLC

Type of Communication:

☐ Discussion                      ☒ Phone Call                      ☐ Correspondence                      ☐ Other

---

Subject of Communication: Current site conditions, historical site usage.

---

Mr. Holsinger stated the buildings on the site were constructed in the 1960s. The large retail commercial building on the site was a grocery store until the Family Dollar Store and Ace Hardware store moved in in the 2000s. The south-central building has always been a restaurant. The southwest building was formerly occupied by a lawn mower sales and small engine repair company until the New Life Church moved into the building. He stated no bulk storage of chemicals or *petroleum products* had been located at the lawn mower/small engine repair company and no releases of *hazardous substances* or *petroleum products* had occurred at the facility. Mr. Holsinger stated that the Indiana State Police formerly occupied the property currently occupied by the McDonald's restaurant on the property adjacent to the north of the site and that the mound of soil in the wooded area in the wooded area of the site, near the center of the west site boundary, was used as a shooting range for the police. He stated that no investigations or testing of the soil in the mounded area has been conducted.

---

Record #2                      Date: 11/8/2018                      Time: 1:30 p.m.                      Project #: 18-685-10

Name: Mr. Kevin Straight                      Phone# (704) 708-1909

Company: Family Dollar

From: Mr. Hugh Smith                      IWM Consulting Group, LLC

Type of Communication:

☐ Discussion                      ☒ Phone Call                      ☐ Correspondence                      ☐ Other

---

Subject of Communication: Hazardous waste generation on the site.

---

Mr. Straight stated that the registration of the Family Dollar store on the site as a conditionally exempt generator of hazardous wastes is primarily a formality in order to deal with the disposal of defective containers or unsold household chemicals and cleaning supplies at the Family Dollar Store. He stated the registration is not associated with any significant generation of hazardous wastes at the site facility.

---

## Record of Communication

Record #3                      Date: 10/25/2018                      Time: 1:30 a.m.                      Project #: 18-685-10

Name: \_\_\_\_\_ Phone# (260) 894-3123

Company: Ligonier Fire Department

From: Mr. Hugh Smith

Type of Communication:

  X   Discussion             Phone Call             Correspondence             Other

Subject of Communication: Environmental concerns reported at the site.

Personnel with the Ligonier Fire Department stated that the large retail/commercial building on the site was formerly a grocery store before becoming a Family Dollar Store and Ace Hardware. They stated the southwest building was a small engine repair facility before becoming a church. They stated that no USTs or other bulk storage of chemicals or *petroleum products* were located at the engine repair facility, and no spills or releases of *hazardous substances* or *petroleum products* were reported at the facility. The south-central building on the site has always been a restaurant to the best of their knowledge. The Fire Department personnel are not aware of any environmental concerns at the site property.

**APPENDIX H**  
**IWM CONSULTING GROUP, LLC PERSONNEL QUALIFICATIONS**

**Professional  
Qualifications:**

Mr. Smith is a Senior Geologist for IWM Consulting Group, LLC located in Fort Wayne, Indiana. Mr. Smith has approximately 30 years of professional experience. His experience qualifies him as an Environmental Professional as defined in the EPA's All Appropriate Inquiries rules. Mr. Smith's responsibilities include preparation of Phase I environmental site assessments, preparation of work scopes and budgets for Phase II environmental investigations and property remediation projects, and oversight of site investigations and remediation. Mr. Smith also works with local and State regulatory agencies in preparation of grant applications for potential Brownfields properties. Mr. Smith has managed Brownfield sites funded through the Indiana Finance Authority and has worked with the Indiana Department of Environmental Management (IDEM) Brownfields Program to obtain Comfort Letters and Site Status Letters to facilitate the sale and redevelopment of Brownfields properties.

**Project  
Experience:****Phase I Environmental Site Assessments**

Mr. Smith has completed more than 500 Phase I environmental site assessments and environmental transaction screens on properties in Indiana, Ohio, Michigan, Illinois, Kentucky, Kansas, Texas, New Mexico, and South Carolina. He participated in all aspects of the data collection and evaluation, field activities, and report preparation. Data collection included locating and reviewing historical aerial photographs, city directories, and fire insurance maps, obtaining and reviewing regulatory database listings for facilities in the vicinity of the subject property, and obtaining and reviewing previous environmental investigation reports for the subject property. Subject properties have included gasoline stations and convenience stores, metal fabrication facilities, steel and aluminum foundries, automobile and truck service facilities, injection molding facilities, waste collection and recycling facilities, electronic component manufacturers, lumber yards, nursing homes and assisted living facilities, laundry dry cleaning operations, restaurants, metal machining facilities, railroad yards, a 6,000 acre ranch, multi-family residential properties, and vacant properties.

Mr. Smith has also been subcontracted to review and evaluate environmental assessment reports and environmental concerns identified in the reports for properties being considered as collateral in real estate loan transactions for a major financial institution in Dallas, Texas.

**Phase II Environmental Investigations**

Mr. Smith has conducted Phase II environmental investigations to determine if soil and/or groundwater were adversely by environmental concerns identified on properties (such as active or abandoned underground fuel storage tanks, improper storage of petroleum products or hazardous substances, or spills or releases of petroleum products or hazardous substances). Responsibilities included the development of the project work scope and budget, scheduling and coordination of subcontractors and field activities, soil boring, monitoring well installations, soil and groundwater sample collection and submittal of samples to laboratories, evaluation of analytical and field data, and preparation of project reports detailing field methodologies, and sampling results.

**Brownfields Investigations**

**EPA Assessment Grants.** Mr. Smith has participated in investigations for several properties in Indiana as part of EPA Brownfield assessment grants for those properties. Mr. Smith managed Phase I environmental site assessments and/or NESHAP asbestos surveys for these properties and assisted in Phase II investigations of the properties. The properties investigated included a former dry cleaning facility/restaurant building, a former manufacturing and recycling/salvage yard, a former automobile parts distribution center and recycling facility, a former coal/oil company and automobile salvage yard, a warehouse and former metal plating facility, former railroad yards/roundhouses, a former chemical mixing and distribution facility, a 29,000 square foot office/warehouse building originally constructed in the 1920s, a regional hospital campus, and a former tuberculosis sanitarium constructed in 1907 that was later converted to a mental health hospital.

**IDEM Brownfield Grants.** Working with the IDEM and local municipalities, Mr. Smith has investigated and remediated several Brownfields properties across northeast Indiana. The properties were listed as Brownfields due to past use as automotive service facilities and gasoline stations with little or no documentation relative to petroleum storage and disposal. The Brownfields investigations included Phase I environmental site assessments, geophysical surveys of the properties utilizing remote sensing equipment to locate subsurface anomalies, Phase II environmental investigations to evaluate soil and groundwater conditions, excavation and removal of underground storage tanks and petroleum contaminated soils identified on the properties, and confirmation sampling of soil and groundwater to determine contaminated soil and groundwater had been adequately addressed. A final report detailing field methodologies, laboratory testing results and all investigation findings was prepared for each property.

**Landfill Cap Evaluation**

Mr. Smith conducted an evaluation of the cap of an abandoned landfill in central Indiana by advancing soil borings on a grid pattern across the landfill. Soil samples were evaluated to determine the extent of the landfill, the thickness of the soil cap, and composition of the soils in the cap. Contour maps were prepared to illustrate the thickness of the cap across the landfill and the results were utilized to prepare strategies to repair the cap to meet IDEM requirements.

**Asbestos Surveys**

Mr. Smith has conducted several hundred asbestos surveys ranging in scope from initial screening surveys for real estate transactions to full surveys in accordance with the National Emission Standards for Hazardous Air Pollutants (NESHAP) requirements for demolitions and renovations. Surveyed buildings have included single-family and multi-family residential units, retail shopping centers, office buildings, warehouse/distribution centers, and industrial facilities. The surveys included visual inspections of each building, determination of homogeneous areas of building materials, collection and documentation of the required number of samples of each suspect asbestos containing material (ACM), submission of the building material samples to an accredited laboratory, preparation of a report detailing survey methodologies and testing results, and coordination with asbestos abatement contractors during removal of ACM from structures.

**Licenses, Certifications,  
and Professional  
Associations:**

IDEM, Asbestos Building Inspector License 192026102  
American Association of Petroleum Geologists (AAPG), Member since 1984  
Charter Member, AAPG Division of Environmental Geosciences  
Bi-annual American Red Cross, Standard First Aid Certification  
Bi-annual American Red Cross, Adult/Child/Infant Cardio-Pulmonary Resuscitation  
Certification  
OSHA 40-Hour Hazwoper Hazardous Waste Site Investigation Certification, October 21, 2002,  
with annual 8-Hour Hazwoper Refresher Training Certifications through April 2017

**Professional  
Qualifications:**

Mr. Johnson is a licensed Professional Geologist with over 18 years experience in environmental project management, including field investigations for hydrogeologic site characterization, contamination delineation, and environmental assessment, including soil and ground-water sampling, well installation, aquifer testing, asbestos inspection, and data analysis..

**Education:**

|                               |                                 |
|-------------------------------|---------------------------------|
| B.S. Geology                  | Indiana University, 1980        |
| M.S. Geology & Hydrogeology   | Indiana University, 1981        |
| Grad. Studies in Hydrogeology | Houston Community College, 1989 |
|                               | University of Houston, 1990     |

**Project Experience:**

Phase I environmental site assessments in Indiana, Ohio, Tennessee, Florida, Louisiana, Texas and Michigan, and follow-up Phase II soil and ground-water studies to investigate areas of potential environmental concern.

Ground-water sampling, data analysis, and agency reporting for a RCRA impoundment site in Fort Wayne, IN.

Ambient air and monitoring well head-space air sampling at various industrial sites in Indiana, Michigan and Ohio. Monitored parameters include VOCs, CO, CO<sub>2</sub>, O<sub>2</sub> and CH<sub>4</sub>.

Ground-water quality monitoring, analytical data analysis, and ground-water response evaluation for a subsidence-stabilization test project at which fixated electric-utility scrubber sludge was injected into an abandoned underground coal mine in south-central Indiana.

Monitoring, sampling, assessment of soil and ground-water contamination, and project documentation during the removal of underground storage tanks in Indiana, Iowa, Ohio, Illinois, Michigan, and West Virginia.

Project leader for an \$89 million exploration project, including the administration of a 2.1-million-acre leasehold area. Generated recommendations for the \$13 million drilling program, coordinated drilling and leasing operations, and interfaced with interdepartmental groups and federal/state agencies.

Design and installation of ground-water monitoring networks at a sanitary landfill in Whitley County, IN, and a bulk petroleum facility in Huntington, IN.

Preparation of storm water pollution-prevention plans for numerous industrial facilities in northeastern Indiana, including field reconnaissance, runoff sampling, and facility-employee storm water sampling training.

Field sampling and characterization of unknown drummed wastes, including use of a magnetometer to locate buried drums; coordinated the analysis, documentation, transport, and disposal of drums.

Field geophysical study to locate buried drums at an illegal disposal site in southern Indiana.

Soil-contamination delineation, remediation oversight, and project documentation during removal of a wire-drawing pit at an industrial site in Bennettsville, SC.

Conducted pilot tests for air-sparging and soil-vapor extraction remediation systems in Indiana, Michigan, and West Virginia.

Downhole-camera operator for vertical risers of a leachate-collection system at a RCRA hazardous-waste landfill in Indiana; work performed in Level-B PPE.

Air-delineation drilling and borehole temperature profiling of burning subsurface areas at a Superfund site in eastern Pennsylvania; work performed in modified Level-B PPE.

Regional basin analysis and detailed stratigraphic investigations for petroleum exploration in the Michigan Basin, Cincinnati Arch, West Texas Central Basin Platform, Columbia Plateau (Washington), and Gulf of Mexico.

Authored numerous in-house technical reports documenting investigation conclusions, PSA reports, closure plans, proposals, project drilling results, quarterly and semi-annual division reports, regulatory permits and summaries, and drilling recommendations for projects ranging from \$1 million to \$12 million.

Construction oversight, air-quality monitoring and site safety of an air-sparging and vapor extraction system at a former industrial site in Lexington, Ohio.

Conducted numerous site investigations utilizing direct-push (i.e., Geoprobe™) methods to depths of 102 feet, to obtain soil and ground-water samples and for the installation of piezometers.

Analyzed borehole data to provide geologic characterizations and lithologic interpretations for numerous projects, including a 25-foot deep slurry-trench wall in Indianapolis, Indiana; a chlorinated solvent recovery system for a defense manufacturing facility in Fort Wayne, Indiana; a recovery trench in Wawaka, Indiana; the delineation of a chlorinated solvent plume in close proximity to a public well field in Lexington, Ohio; and a constructed wetlands for a state museum and park in Battle Ground, Indiana.

Coordinated drilling activities (approximately 225 penetrations) and interfaced with local governmental agencies and departments, land owners and the OEPA during the delineation of an extensive chlorinated solvent plume proximal to a public well field in Lexington, Ohio.

Over 18 years of geologic work experience with extensive field operations experience and 14 years of geologic/hydrogeologic experience in the Indiana, Michigan, Ohio vicinity.

Performed field slug tests, pumping tests, and near-surface soil-infiltration tests with subsequent data reduction and analysis for the hydrogeologic characterization of various sites.

Extensive geologic experience interpreting soil samples, bedrock cores and cuttings obtained from hollow-stem augers, direct-push methods, and rotary drilling and coring methods.

#### **Licenses and Certifications:**

Certified Professional Geologist, Indiana  
Licensed Well Driller, Indiana  
Licensed Professional Geologist, Illinois  
OSHA Site Supervisor Certification  
HAZWOPER Trainer Certification

IWM CONSULTING

NEAL C. JOHNSON

.....  
SENIOR GEOLOGIST

UST Certification, Indiana  
UST Certification, International Fire Code Institute  
Asbestos Inspector Certification, Indiana  
OSHA 40-Hour Health and Safety Training for Hazardous Waste  
Operations  
American Red Cross First-Aid and CPR Training
