The uncertainty in the lines and corners found or established by this survey are as follows:

- (A) Availability and condition of reference monuments:  
Monuments found are described and depicted on the survey drawing.  
Uncertainty created by the location of the monuments found or set on the subject property due to variations in reference monuments (monuments found on the subject property and on adjacent properties) is the difference between "measured" and "platted" or "recorded" angular or distance measurements as depicted on the survey drawing.  
The maximum uncertainty for this survey is 0.05 feet.
- (B) Occupation or possession lines:  
No uncertainty was created by visible occupation or possession lines.
- (C) Clarity or ambiguity of the record description and or adjoiner's descriptions:  
No uncertainty was created by the above mentioned documents.
- (D) This survey falls under the classification of a "Suburban" survey. The acceptable relative positional precision (random errors in measurements) = 0.13 feet (40 millimeters) plus 100 parts per million as specified in Section 7 of said Rule 12.
