Poster Roster in Canvas

The photo roster is a Yale created tool. Only individuals with the roles of Instructor or TA can view this tool. Although other roles can see it on the course site navigation, it will appear blank, without student data.

What information is available in Photo Roster?

When you click on Photo Roster from Course Navigation, you are brought to the photo view. To access the list view, click on “list”. You will be able to see the student’s name, role, class year, declared major, residential college, and email address. From list view, you can export or print the roster.
