

# Indberet arbejdstid

Som medarbejder i Københavns Professionshøjskole skal du hver dag registrere, hvor mange timer du har arbejdet.

Du har to muligheder, når du skal registrere din arbejdstid i mTIME.

1) Du kan enten klikke i feltet **Arbejdstid** og skrive din samlede arbejdstid.

Husk din arbejdstid skal registreres i 'timer og minutter'.

Det indtastede gemmes automatisk, når du forlader mTIME.

2) Eller du kan klikke i feltet **Komme/Gåtid** og udfylde din Fra og Til tid, så systemet udregner din arbejdstid for dig.

Husk i begge tilfælde, at du skal godkende din måned senest den 3. kalenderdag i den efterfølgende måned.

1. Har du behov for at ændre den måned du kigger på, gøres det ved først at vælge den måned du vil se, og efterfølgende klikke på en vilkårlig dato i datoskemaet nedenunder. Det er først når du klikker på en dato, at dit skema opdateres til den valgte måned

## 2. Brug Komme/Gåtid

### 2.1. Klik i feltet Komme/Gåtid og udfyld Fra kl. og Til kl., klik Gem og luk boksen

The screenshot shows a time tracking application. On the left is a sidebar with a tree view of categories like 'Komme/Gåtid', 'Difference', and various work types. The main area displays a calendar grid for February 2017. A modal window titled 'Komme gå tider d. 01-02-2017' is open, allowing the user to log arrival and departure times for a specific date. The modal includes fields for 'Fra kl.' (08:00) and 'Til kl.' (16:00), both highlighted with red boxes. It also has a 'Kommentar' field, dropdown menus for 'Årsag' and 'Anden årsag', and buttons for 'Gem', 'Ny', and 'Slet'.

💡 Tip: Du kan sagtens udfylde Fra kl., når du møder om morgenen og udfylde Til kl., når du går.

3. Når du har udfyldt din Komme/Gåtid, kan du se din samlede arbejdstid i feltet 'Difference'.Klik i feltet "Arbejdstid" og skriv din samlede arbejdstid.Husk din arbejdstid skal registreres i timer og minutter

| Uge                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |    |  |  |  |  |  |  |    |  |  |  |  |  |  |    |  |  |  |  |  |  |    |  |  |  |  |  |  |
