

What are student paper matches?

Student paper matches are sources where the student submission for the assignment matches another student paper in your institutional repository. VeriCite reports limit the information shown in matching student paper submissions to ensure that FERPA and other privacy regulations are strictly enforced. Students will not see any identifiable student data or text for the matching student paper; they only see that a student paper match has been found. By default, the instructor of the course in which the paper was submitted has access to all of the user and submission details, but other instructors at the institution see only that there is a match and the paper ID of the matching student submission. Privacy settings may be modified by the VeriCite Administrator at the institution.

Elon Reeve Musk (/ˈiːlɒn ˈmʌsk/; born June 28, 1971) is a South African-born Canadian American business magnate, investor and inventor.[7][8][9][10][11][12] He is the CEO and CTO of SpaceX, CEO and product architect of Tesla Motors and chairman of SolarCity. He is the founder of SpaceX and a cofounder of Zip2, PayPal and Tesla Motors.[13][14][15] He has also envisioned a conceptual high-speed transportation system known as the Hyperloop and has proposed a VTOL supersonic jet aircraft with electric fan propulsion.[16][17]

Early childhood[edit]

Musk was born June 28, 1971, in Pretoria, Gauteng, South Africa,[18] to an upper-middle-class family.[19] the son of Maye (née Haldeman), a Canadian-born model,[20] and Errol Musk, a South African-born electromechanical engineer (with whom he has a troubled relationship).[20][21][22][23] His paternal grandmother was British, and he also has Pennsylvania Dutch ancestry.[24][25] After his parents divorced in 1980, Musk lived mostly with his father in locations in South Africa.[24]

Manual of the video game Blaster

At age 10, he discovered computing with the Commodore VIC-20.[26] He taught himself computer programming and at age 12 sold a BASIC listing for a video game called Blaster to a magazine called PC and Office Technology for approximately US\$500.[27] A web version of the game is available online.[28]

Musk was severely bullied throughout his childhood, and was once hospitalised when a group of boys threw him down a flight of stairs, and then beat him until he blacked out.[29]

Musk was initially educated in private education, attending the English-speaking Waterloof House Preparatory School. Musk later graduated from Pretoria Boys High School and moved to Canada in June 1989, just before his 18th birthday.[30] after obtaining Canadian citizenship through his Canadian-born mother.[31][32] He did so before his South African military service, reasoning that it would be easier to emigrate to the United States from Canada than from South Africa.[27][33][34]

University[edit]

At the age of 19, Musk was accepted into Queen's University in Kingston, Ontario for undergraduate study, and in 1992, after spending two years at Queen's University, Musk transferred to the University of Pennsylvania (Penn) where, at the age of 24, he received a Bachelor of Science degree in Physics from Penn's College of Arts and Sciences, and a Bachelor of Arts degree in Economics from the Wharton
