Check hardware compatibility in your office with the latest SOAPware

Click [here to check the recommended and required specs](#) for the latest version of SOAPware. Make sure that all your PCs in the office meet at least the minimum requirements. For optimal use, ensure they meet the recommended specs.

**Note: The current version of Data Manager 2012.0.1019.*

SOAPware 7.0.5051

SOAPware CloudSync

SOAPware CloudSync is a new utility that transfers a QRDAI data file of a patient's chart from SOAPware to SOAPware's Clinical Quality Measure calculation engine in order for users to obtain the CQM statistics.

Please click the following link for instructions on downloading and installing CloudSync: [Installing SOAPware CloudSync](#).
