

Trauma-Informed School Initiative

Missouri public school districts are required by state law to provide the web address for the trauma-informed school initiative developed by the Missouri Department of Elementary & Secondary Education. The web address for this initiative is as follows: <https://dese.mo.gov/traumainformed>.

The district is not presently participating in this initiative, but will be exploring the website and the resources and references presented on the website in order to determine if this approach might provide strategies that would be beneficial for use with students who have been experienced traumatic events.

If you would like to add comments or ask questions regarding this information, feel free to discuss with your child's principal or counselor. These comments are appreciated and will be shared with staff for consideration as we review and discuss the information.
