

**MIDWAY ISD**  
**INDEPENDENT SCHOOL DISTRICT**  
**Randel Beaver Superintendent**

**PUBLIC NOTICE**

Midway ISD/Public Water System #0390020 failed to collect the required number of triggered source bacteriological samples for fecal indicator monitoring of the ground water system during the month of **June 2017**. This monitoring is required by the Texas Commission on Environmental Quality’s “Drinking Water Standards” and the federal “Safe Drinking Water Act,” Public Law 95-523

Triggered source samples are used to monitor water quality and indicate if the water is free of fecal indicator bacteria. Following a positive routine total coliform result in our distribution system, our water system is required to submit one triggered source sample for every active ground water well. Failure to collect all required triggered source samples is a violation of the monitoring requirements and we have been informed that we are **required** to notify you of this violation even though it occurred last year.

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified immediately.

The required triggered source samples have been submitted each month since then and the water system has proved to be free of any coliform contamination.

If you have any questions regarding this violation, you may contact Randel Beaver, Superintendent of Midway ISD. The phone number is listed above.

This notice is provided to each employee, posted in a public place and on our website. Posting has been made as of March 1, 2018.
