

COVID-19: BELFOR RESPONSE

BELFOR has been on the front lines since the beginning of the COVID-19 crisis. As the global leader in decontamination projects for more than 70 years, we are prepared for this unique fight.

From the beginning of the COVID-19 crisis, we have worked with leading toxicology and environmental health consulting firms. From establishing the proper cleaning protocols to providing post-cleaning inspection and verification, BELFOR has worked with the industry's best environmental minds.

Biohazard cleaning services have been provided for commercial, industrial and public facilities, including manufacturing plants, warehouses, office spaces and buildings, municipalities, health care facilities, schools and educational facilities, retail stores, fire stations, entertainment venues, utility companies and more.

Other major projects and COVID-19 cleaning experience includes, but is not limited to:

- Cleaned one of the first COVID-19 contaminated commercial airplanes to enter North America, as well as the military base where it landed and the hotel used to quarantine passengers.
- Cleaned the Diamond Princess in Japan (name used with permission) and began building drive-thru COVID-19 testing facilities for healthcare clients.
- Performed more than **3,500 COVID-19 cleaning projects** in the U.S.

SAFETY

BELFOR takes safety seriously as a company. All of our cleaning personnel wear Personal Protection Equipment (PPE). For COVID-19, we also understand the importance of employee monitoring, before and after project intervention.

PUBLIC RELATIONS

BELFOR understands the importance of confidentiality. However, with COVID-19 work, many clients want others to know that cleaning services have been performed by a professional company. If desired, BELFOR can work with companies to develop a cohesive strategy for this purpose.

EPA-APPROVED CLEANING SOLUTIONS

BELFOR only uses cleaning solutions on the EPA List N. We have had success with the following solutions:

Bioesque Disinfectant Solution	EPA #87742-1
Shockwave Concentrate - #8310, #8311 and #8310CA	EPA #61178-1-73884

BELFOR CLEANING PROTOCOLS - CORONAVIRUS

- **LEVEL 1 - PROACTIVE** - No exposure; precautionary.
- **LEVEL 2 - SUSPECTED** - Suspected COVID-19 contamination.
- **LEVEL 3 - CONFIRMED** - Confirmed COVID-19 case.

BELFOR may use a combination of wiping and spraying cleaning methods, depending on the protocol level and industry.

BELFOR is the global leader in integrated disaster recovery and property restoration services, offering the most extensive network of resources for commercial losses in the industry.

Our proven track record of superior response and comprehensive service offerings has made us the contractor of choice for multi-national property owners seeking consistency of service and quality.

BELFOR has a proven track record and the financial strength to complete the task at hand quickly and efficiently so you can get back to business — fast.

As the only international recovery company that is not franchised, BELFOR can provide greater corporate control over timelines, quality and distribution of resources.
