Parents,

This is the calculator that we will be using in 8th grade. We have class sets in our classrooms, but it will be necessary for students to purchase their own calculators to use on homework outside of the classroom. This is the same calculator that is used at the high school, so it will be useful to your student for several more years. Blackwell Walmart did not carry it last year. I can purchase them for you on Amazon if you pay in advance. I will send home a price printout from Amazon once your student lets me know that you would like me to purchase it. The cost over the past year was \$15 to \$20. Orders will be placed the same day that I receive the money and the calculator should arrive in 3 days.

Mrs. Lambert
