Clinton School District Facilities Usage during Covid-19 Pandemic

The Clinton School District received word from a Department of Elementary and Secondary Education official on Wednesday, October 8, 2020 that the District, if it chooses, can allow district facilities to be used by outside entities for non-school sponsored activities if certain criteria are met by the outside requesting entity.

Any outside entity must submit to the Arkansas Department of Health an event plan submission packet. The entity must submit the signed, dated, and approved plan documentation from the Arkansas Department of Health to the Clinton School District administration building upon receipt and approval.

If the requested event is found to be an event that is sanctioned on the public school level by the AAA, all of the Arkansas Athletic Activities Association guidelines must be followed as well as all Arkansas Department of Health requirements and Clinton Schools Facility Usage requirements.

No food or drink will be sold by any outside entity using Clinton School District facilities during the Covid-19 Pandemic.

Acceptance of the outside entities event plan by the Arkansas Department of Health does not ensure approval by the Clinton School District for facility usage.

The outside entity must complete all required Clinton School District Facility Usage agreements and documentation prior to approval by the Clinton School District.

An additional sanitizing and cleaning fee may be charged to the outside entity during the Covid-19 Pandemic.

The Clinton School District is not liable for enforcement of all Arkansas Department of Health and Arkansas Activities Association guidelines by the outside entity. Non-compliance or enforcement of Arkansas Department of Health and Arkansas Activities Association guidelines could result in forfeiture of usage by the outside entity. All penalties incurred adhere to the outside entity.
