

Office of the Superintendent  
Scott Lucas  
806-883-2311

November 5, 2020

White Deer School Community we were notified today that an employee has tested positive for COVID-19. This employee was already under quarantine for close contact and was last on campus Monday, Nov 2nd. Anyone with close or secondary contact with the employee has already been contacted.

Having considered the increased number of COVID cases in Carson and Gray counties and the traditional cold and flu season arriving, we have reached out to a third-party company that specializes in providing a "deep clean." They will be arriving after school on Friday and will wipe all touch services which includes electronic devices and other frequently used items. They will also fog each room with an industrial machine that will provide an additional layer of sanitation and protection. We will be treating the entire district, including busses and athletic facilities.

We will continue to provide updated information through the district website, social media, and direct messaging services. If you have any questions, please contact any of our administrators at 806-883-2311.
