

Return to Work

GDBD-R

A doctor's note is required for an employee to return to work after an extended absence due to illness, surgery, or an accident. The Board recognizes the importance of returning to work only when an employee has fully recovered.

An employee will need to communicate with his/her immediate supervisor to determine the return to work date. Each situation is unique and will be handled accordingly. Specific information to be considered include physical restrictions such as how many pounds of weight can be lifted and how long the individual can be on his/her feet. The superintendent has the final decision.

Effective: January 1, 2019
