

## **Non-School Employment by Professional Staff**

**GCQA**

The Board considers teaching or administrative duties in the district as full-time employment. However, if an experienced staff member is in good health, a limited amount of teaching adult education classes or educational work with other agencies may be a rewarding experience in professional growth. Staff members engaging in this work may expect the cooperation and encouragement on the part of the Board.

Any other type of outside work by staff members shall be the concern of and warrant the attention of the Board, only as it may directly prevent the staff member from properly performing his assigned functions during duty hours or be prejudiced to his effectiveness in his professional position.
