

Relations with Community Organizations

KM

It is vital that community groups and associations play a strong role in the local school. The PTA has long been among the strongest supporters of public education. In fact, the PTA, playing an involved and active role, is vital to the success of any school organization. Principals, teachers and all other staff members shall seek to strengthen and support the Parent—Teachers Association by cooperating in any way possible to provide assistance, materials, facilities or other aid to assist the PTA in helping the schools.
