

## **Student Health Services**

**JHC**

The purpose of the school health program will be to supplement the efforts and guidance of parents to bring about an awareness on the part of students of regular health care.

The objectives of the school health program are:

1. To promote good health habits among students;
2. To stimulate a sanitary and healthful environment in school;
3. To assist in detecting and recommending correction for medical, psychological and physical handicaps of students.

### **Health Records**

Health records will be maintained by the nursing staff and kept in the student's cumulative record folder.

### **Physical Examinations**

Annual examinations shall be required for participants in secondary athletic programs.

### **Annual Screening Programs**

Vision screening will be planned and administered by nursing personnel for selected grades.

Hearing screening will be planned and administered by speech correction personnel for selected grades.

### **Communicable Diseases**

Students showing symptoms of a communicable disease or infectious condition or illness or disability of a serious nature will be referred to the school nurse who will make judgment in the matter.
