

Covid Update
02.02.2021

CCSD#2 follows Carbon County Public Health (CCPH) guidance related to all quarantines. According to CCPH, each quarantine decision is considered individually and based on confidential information that cannot be shared. The parameters that CCPH uses in their decisions have changed and may continue to change as we live through this Covid situation. If you have any specific questions regarding process (not questions regarding an individual's confidential specific quarantine information), please contact one of the District Nurses for clarification. They will be glad to share non-confidential information regarding the process – or seek further information from CCPH. Our goal is for CCPH to bring staff and students back to school as soon as safely possible. Again, thanks for all the support during this Covid situation!

Dr. Jim D. Copeland, Supt.
